14285. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-11-01 12:25:36 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14285

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

14286. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)

From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14286

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

14287. Fire Season over Nov 3 SHU, TGU

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-11-02 05:04:18 UTC
From: Jake H
Topic: 14287 Message: 14287

Monday marks the end of Fire Season 2008 for Shasta/Trinity Unit and Tehama/Glenn Unit. I haven't seen a press release for Butte, but typically they follow suit with SHU and TGU season openings and closing. In fact I wouldn't be surprised if most or all of California Northern Region closes the season on Monday.

Thanks for a great season on the list. I noticed quite a drop in postings this season shortly after the lightning fires. I think many of us went into overload pretty quick. However we did have a quick jump in subscribers during that time. A few of us put our heads together later with ideas about public fire info, live scanners et. al. and determined this list NorCalFire will prioritize on fire radio and not necessarily on blow-by-blow fire info like many of the public were looking for during the lightning fires. Many noticed CalFire really dropped the ball on timely and accurate public info during the lightning fires and citizens were turning everywhere they could for fire info, including here. Some info hotspots in Redding included the comment section of Redding.com which provided very timely info from many sources, including those in the middle of the inferno sticking with their homes instead of evacuating. Centralized media such as redding.com is someplace where many people will naturally, probably congregate to during crisis. Butte residents found solace and info at thenet411.net and the local papers chicoer.com and paradisepost.com

There are some great ideas cooking over the winter and hopefully by next season we'll have a solid base of info sites available for locals and other Northern California events, with NorCalFire providing the core of fire radio info.

Thanks for a helpful, friendly, informative group here Jake!!
I have made many new friends, and met angels on here! Bless you all for your prayers, advice and help!

My son called last night to say TGU is letting him go tomorrow morning. Now to find a job...he's gonna miss his unit.

In gratitude,
Lisa Saldano

Thanks for the site Jake!

been a weird season and So Cal still has a lot of potential for a firestorm this year.

This long time member would like A shout out for my own site Cal Fire News <http://calfire.blogspot.com/> my contributors and I work real hard to deliver accurate and timely California fire news with a focus on wildland fires throughout the state. I can say we did real well this year with the only problem being my assignment for the duration of the Summit Fire and the Butte lightning complex Fires which affected coverage on those fires because I was simply to tired.

I depend on sites such as yours Jake as I attempt to aggregate and sift the daily fire news.

I've been watching this since 1:00am and its been getting worse and worse. Various news stations are carrying it online (http://abclocal.go.com/kabc/livenow?id=6507463) and there is an online scanner feed here: http://feeds.scannerbuff.net:8010/lapd-valley.m3u

At 4:30am they started screaming about losing water sources and talking about hundreds of homes already lost. This is going to be very, very bad.

Expect heavy traffic on the following highways during the below closures:

SR126 between Castaic and Ventura
SR118 between SR23 and I-210
US101 between Ventura and I-5
SR23 between SR118 and US101

Expect heavier than normal traffic on the following highways
SR41 SB from I-5 to US101
SR46 WB from I-5 to US101

US101 SB from SR41

Sayre Incident, City of Los Angeles, Los Angeles County

The Sayre Incident began on 11/14/08 at approximately 2249 hours in an unincorporated area near Sylmar in Los Angeles County.

There are currently 882 personnel assigned to this fire per the Firescope 209 at 0430 hours at 11/15/08 hours..

There are reports of 2 firefighter injuries at this time.

Los Angeles County and Los Angeles City FD are in Unified Command.

Structures threatened include 5000 residences, 500 commercial and 200 outbuildings.

Structures damaged ~100 residences

Structures destroyed ~65 residences

Evacuation Centers/Shelters:

There are 3 Red Cross shelters opened in support of the Fire in Sylmar:

170 people at Sylmar High School, 13050 Borden Avenue, Los Angeles, CA 91342

40 people at San Fernando High School, 1113 Omelveny, Los Angeles, CA 91340

No numbers at Kennedy High School, 11254 Gothic Avenue, Granada Hills, CA 91344

Jake et al,
I think you nailed it Jake. Firstly, thanks for keeping this running, pretty much seamlessly for the users, and for making it available.
I, for one, got really burned out with the simple volume of information after the lightening seige. My fire "indegestion" started really with the Paradise incident that was so ugly and really scary. I had several friends running for their lives so it brought home to roost the danger up there that has been talked about for a long time but has never seen any attention from the county fathers. I still don't see attention to the problem btw.
The lightening seige was just about overwhelming. I actually turned off the scanner here as It was getting pretty confusing and started to sort of piss me off because I couldn't keep up with the happenings. The troops did an amazing job, I just couldn't keep up with them as I have always done.
I've lived in Northern Califormia pretty much all of my life and I have fought fire for a lot of my younger years. I simply can't remember anything even close to what this year has whacked us with....it has to be the worst in history. Now what is happening down south, double ugly and just adds to this year of devistation. I don't know how the state will pay for the supression efforts frankly as it has to be the highest in history.
Just want to say thanks to all on the list who kept us all informed and especially to the fron line troops who were nothing short of amazing in the way the handled these challenges of 2008! I, for one, am happy to see the season go...rain baby, RAIN.

Kim...so hand out mud toboggans first and let 'er rip. Nice easy rain every day for about six hours would do it...let it soak in...repeat for oh...a couple multiples of forty days and forty nights... ;)

Nitrobear, I know EXACTLY what you mean on the scanner stuff during all that. Keeping up with any of it was hard, much less broadening the scope by much at all! Then the lightning siege...wowsers, that was amazing to hear. Couldn't track a darn thing but amazing.

To pun about it, I think we got burnt out with the sheer scope and scale this year. Scary stuff, and everyone has an area of interest to watch hardest. The whole evacuation from Paradise thing is a major mess, right enough...but is running them all further up the hill the answer? Probably not. Scared people camping out don't pay enough attention to things like lights and smokes and sparks.

Encouraging vegetation control and maintenance along the roads down into the valley is likely one of the better courses....I can't see them, logistically, finding a way UP and out.

Subject: Re: [NorCalFire] Fire Season over Nov 3 SHU, TGU

Jake et al,
I think you nailed it Jake. Firstly, thanks for keeping this running, pretty much seamlessly for the users, and for making it available.
I, for one, got really burned out with the simple volume of information after the lightening seige. My fire "indegestion" started really with the Paradise incident that was so ugly and really scary. I had several friends running for their lives so it brought home to roost the danger up there that has been talked about for a long time but has never seen any attention from the county fathers. I still don't see attention to the problem btw.
The lightening seige was just about overwhelming. I actually turned off the scanner here as It was getting pretty confusing and started to sort of piss me off because I couldn't keep up with the happenings. The troops did an amazing job, I just couldn't keep up with them as I have always done.
I've lived in Northern Califormia pretty much all of my life and I have fought fire for a lot of my younger years. I simply can't remember anything even close to what this year has whacked us with....it has to be the worst in history. Now what is happening down south, double ugly and just adds to this year of devistation. I don't know how the state will pay for the supression efforts frankly as it has to be the highest in history.
Just want to say thanks to all on the list who kept us all informed and especially to the fron line troops who were nothing short of amazing in the way the handled these challenges of 2008! I, for one, am happy to see the season go...rain baby, RAIN.

---------- Original message ----------
From: Jake H < yahoo@... >
Monday marks the end of Fire Season 2008 for Shasta/Trinity Unit and
Tehama/Glenn Unit. I haven't seen a press release for Butte, but
typically they follow suit with SHU and TGU season openings and closing.
In fact I wouldn't be surprised if most or all of California Northern
Region closes the season on Monday.

Thanks for a great season on the list. I noticed quite a drop in
postings this season shortly after the lightning fires. I think many of
us went into overload pretty quick. However we did have a quick jump in

subscribers during that time. A few of us put our heads together later with ideas about public fire info, live scanners et. al. and determined this list NorCalFire will prioritize on fire radio and not necessarily on blow-by-blow fire info like many of the public were looking for during the lightning fires. Many noticed CalFire really dropped the ball on timely and accurate public info during the lightning fires and citizens were turning everywhere they could for fire info, including here. Some info hotspots in Redding included the comment section of Redding.com which provided very timely info from many sources, including those in the middle of the inferno sticking with their homes instead of evacuating. Centralized media such as redding.com is someplace where many people will naturally, probably congregate to during crisis. Butte residents found solace and info at thenet411.net and the local papers chicoer.com and paradisepost.com

There are some great ideas cooking over the winter and hopefully by next season we'll have a solid base of info sites available for locals and other Northern California events, with NorCalFire providing the core of fire radio info.

Jake

Here is a link to the blog...down the page a couple articles:

http://calfire.blogspot.com/

For sure they are burning 2 seperate places on the Tahoe NF and probably still smoking on the El Dorado NF too. Up in the same area they were running around stomping out last weekend...go figure!

14304. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-12-01 13:48:09 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14304

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

14305. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-12-01 13:48:09 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14305

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

Just received this from another group I belong to, am passing it
along (with no comment from me included)

Yahoo is Tracking Group Members

If you belong to ANY Yahoo Groups - be aware that Yahoo is now using
"Web Beacons" to track every Yahoo Group user. It's similar to
cookies, but allows Yahoo to record every website and every group you
visit, even when you're not connected to Yahoo. Look at their updated
privacy statement at
<http://info.yahoo.com/privacy/us/yahoo/details.html>http://info.yahoo.com/privacy/us/yaho
o/details.html

About half-way down the page, in the section on cookies, you will see
a link that says WEB BEACONS.

Click on the phrase "Web Beacons." On the page that opens, on the
left find a box entitled "Opt-Out."

In that section find "opt-out of interest-matched advertising" link
that will let you "opt-out" of their snooping. Click it and then
click the opt-out button on the next page.

Note that Yahoo's invasion of your privacy - and your ability to
opt-out of it - is not user-specific. It is MACHINE specific. That
means you will have to opt-out on every computer (and browser) you use.

Please forward this to your other groups. You might complain, too,
but I'm not sure if anyone is listening. I remember when they signed
all users up to get spam and we had to opt out of that a few years ago.

I was aware Yahoo had such a thing as of a couple of years ago or further back but I was under the impression this was a new tracking cookie program compared to that one.
Perchance I was mistaken in which case a thousand apologies all of you.
I'm not particularly concerned by this even if less than thrilled as Google does the same thing as well as others.
However, in the context of thinking this was a new dealy-bob they are using I wanted folks to be aware so they could make their own personal decision as to be or not to be concerned and as to what extent if any to be upset with Yahoo.
I'm for giving people information and then letting them reach their own conclusions.

From: nitrobear@comcast.net
Topic: 14314 Message: 14314

Hi Group,
I feel like I've sort of deserted the group here. I was completely blown away with the volume of fires this summer in Butte county and the north state. I think I was not alone. It wzs an amazing year, like nothing 'Ive seen...EVER in terms of the number of fires, the intgensity of traffic and the volume of messages on the reflector not to mention that the scanner was on it's back with traffic at the height of the fire seige after the lightening storm.
Thanks to everyone who kept the thing going and especially to Jake for keeping us all in line. Great reflector IMHO. Thanks Jake!
Let us hope and pray that 2009 will be a little better in the north state for incidents and thanks to all the crews and troops from From Cal Fire, USFS. BLM and the military guys for pulling it out along with all the out of state and out of country troops who did an amazing job to keep our butts safe!
I hope we don't see anther one like this. Haqppy New Year to all on the list. Great bucn of folks who do an amazing job of keeping us informed!

Cheers and Happy New Year!

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

14320. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)

Topic: 12013 Message: 14320

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

Hi All,

As this is the off season. Perhaps this is time for a Critique of the past season and this groups actions.

What to improve, what is mission of group?

Amass and desiminate information, what type information?
Any and all, general.
Or area specific.
Or locating personel (how ya doing, where are you, etc) (bolo for lost or stolen fire gear, good idea).
Or information on scanners for areas, where on net are repeaters operating.

I realize we have FAQ's to operate under. Just thinking of lessons learned last season to improve this group next season.

And to all esp, Pamala, Jake, Harry,and so many others I can not recall at the moment. A big THANKS.

Thoughts anyone.

14322. Why NorCalFire exists

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-01-05 00:14:06 UTC
From: Jake H
Topic: 14314 Message: 14322

Thanks Joe and others. From myself and the moderator team here, let me say first that this list requires zero effort from any of us. I think we've had to ban maybe 1 person in 3-5 years, and heavily moderate less than 5 during that same period. All of YOU readers are what make the list work and operate. It isn't me or the moderators that's for sure. Compared to other california scanning lists, this one is a vacation.

As for the purpose of NorCalFire; it will remain the same function into next fire season as it has the past many years. That is, primarily the discussion of fire communications in northern california. Anything about better listening to fire comms on scanners etc. This includes reporting new fires (of a size that provides reasonable monitoring enjoyment etc.), and keeping tabs on major fire updates etc. It provides a resource to learn the communications structure of any fire in NorCal. In turn, listeners can tune into those fires with their own scanners, or online scanners and gather further info on their own.

However, and this last season tested this theory, NorCalFire cannot support fire information that the common, non-scanner listening citizen would expect to hear, such as closed roads, precise evacuations etc. This includes logistical needs like lost or stolen fire gear, striketeam personnel locations etc. The occasional post is allowed, but if it becomes a common occurrence, we'll need to protect the in-boxes of the majority of the members who came here for fire radio info. A lot of us feel NorCalFire has just the right amount of traffic and perfect info people are looking for. Not too little, and not too much.

With that, there is still a major hole in timely fire information for the common citizen. CalFire Public Info can't even begin to start filling that, and failed miserably during the lightning fires. Personally, I and a few others with access to the info helped fill the void in Redding giving updates out on the local newspaper's message board where naturally, many citizens came for info. There's definitely a need there, but NorCalFire can't and won't fill it. However I do know of one key person on this group that is/was looking at a solution to filling that need and if it works out, would be an awesome supplement to NorCalFire.

With that, I again thank all of you for making this list a breeze to manage. I joke that I don't have to moderate, I facilitate.

Jake,
NorCalFire need not apologize for its coverage of the fires last Summer.
Many of you work away from the computer and can't be there all the time.
In spite that reality your coverage was fine I thought.

However, speaking to the subject of the sorts of information you don't
want to see clogging the works on NorCalFire such as evacs and closures
and other such non-fire coms/fire size-up related matters
Californiadisasters
Group covered that information thoroughly and in a timely fashion as it
became available from local and regional government and media sources.

We neither try to nor care to compete with the fire and scanner groups
but fill the gaps in between them and address the bigger picture and also
cover anniversaries of past events and post articles about future hazards
to go along with play-by-play of ongoing incidents.

Being a statewide group we strive to pull everything together into one place

and collate it and post it in a timely and concise fashion so as to offer
the
most information for the least amount of inbox "fillage".

We have created a sister discussion group for those who wish get into
extended discussions and thus keep the main channel clear.

I invite everybody to visit us sometime.

CLEAR LAKE/SOUTHERN LAKE COUNTY-
NORTHEAST FOOTHILLS/SACRAMENTO VALLEY-MOTHERLODE-
WESTERN PLUMAS COUNTY/LASSEN PARK-
WEST SLOPE NORTHERN SIERRA NEVADA-
534 PM PST SAT JAN 10 2009

...UNSEASONABLY WARM AND DRY WEATHER OVER THE INTERIOR OF NORTHERN
CALIFORNIA CONTINUES INTO NEXT WEEK...

VERY STRONG HIGH PRESSURE WILL DOMINATE THE WEATHER OVER THE
INTERIOR OF NORTHERN CALIFORNIA AND WILL CONTINUE THE UNSEASONABLY
WARM AND DRY WEATHER CONDITIONS OVER THE AREA THROUGH THE MIDDLE OF
THE WEEK. HIGH TEMPERATURES ARE EXPECTED TO REACH INTO THE 60S TO
MID 70S IN PARTS OF THE CENTRAL VALLEY AND SURROUNDING FOOTHILLS...
AND INTO THE 40S TO LOW 60S IN THE MOUNTAINS FOR MUCH OF THE WEEK
AHEAD. THESE TEMPERATURES MAY POSSIBLY BE WARM ENOUGH TO APPROACH
OR ESTABLISH NEW RECORD HIGH TEMPERATURES AT SOME LOCATIONS.

IT WILL NOT BE UNUSUAL FOR FOOTHILL LOCATIONS TO BE WARMER
THAN THE CENTRAL VALLEY LOCATIONS FOR THE NEXT COUPLE OF DAYS DUE
TO A STRONG TEMPERATURE INVERSION...WHERE TEMPERATURES ARE
WARMING WITH HEIGHT. IN THIS WEATHER PATTERN...THE AIR TEMPERATURE
IS ACTUALLY WARMING WITH HEIGHT UP TO AROUND 4000 FEET...AND THEN
BEGINS TO COOL.

NORTHERLY WINDS WILL BLOW AT TIMES AND LIMIT THE AREAL COVERAGE
OF FOG IN THE CENTRAL VALLEY.

THE STRONG RIDGE OF HIGH PRESSURE HAS DEFLECTED THE JET STREAM
AND THE STORM TRACK WELL NORTHWARD INTO THE PACIFIC NORTHWEST.
THUS...DRY WEATHER WILL CONTINUE OVER NORTHERN CALIFORNIA DESPITE
THIS MONTH NORMALLY BEING THE WETTEST MONTH OF THE YEAR.

THE LIST BELOW INCLUDES THE RECORD HIGH TEMPERATURES FOR THE WEEK
AHEAD AT VARIOUS LOCATIONS.

14326. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-02-01 12:59:53 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14326

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

Topic: 12013 Message: 14327

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

14332. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-03-01 12:18:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14332

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

14337. Online Feed Pilferage

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-03-28 00:33:28 UTC
From: Butte County Public Safety Scanner
Topic: 14337 Message: 14337

I have a question for online scanner feed providers around the state. But first, a little backstory.

Lately I have had several run-ins with individuals and companies who are attempting to make money by pilfering freely available scanner feeds around the country.

In one instance a piece of software was written for Windows platforms that allowed users to simply run an application on their computer, click on a city, and be automatically tuned into a scanner feed from that area. What was really happening behind the scenes is that the application was nothing more than a poorly written application that had links to free scanner feeds and used the Windows Media API to display Windows Media Player in the application. This individual was charging $10 for this application. Fortunately, by the time I found him his software had been shut down by many legal threats from feed providers. He is now trying to create a freeware application to do the same thing while giving credit to the feed providers and not making any money off of the deal.

In another instance, I discovered several connections to my ShoutCast feed with a strange player ID. All of the IDs were "{A: Police%20Scanner/1.0 CFNetwork/342.1 Darwin/9.4.1}". After some digging I happened across an iPhone app called, what else, "Police Scanner". I had a friend with an iPhone download the $2.99 application from the IPhone store and confirmed that in the list of available feeds was my feed. No credit was given to the originating website and the application makes no mention that the feeds are not actually provided by the application distributor. I suggest that all of you feed providers check your ShoutCast or IceCast logs looking for player ID strings that match the above.

Finally, I was contacted by an individual that wanted to put yet another scanner in my feed origin location for use by a private interest. After being quizzed as to why another scanner would be needed in an area already completely covered by a scanner feed, I was given a completely bogus excuse that it was for a private entity that most definitely did not want to make money on the feed by charging to listen to the feeds but would be willing to pay myself and other scanner providers "rent" to keep their hardware in our origin locations.

All of the above has happened in the space of about three weeks and I quite honestly don't know what to make of it. The vast majority of online scanner feed providers make these feeds freely available despite the ongoing costs associated with making them public and free because they love their communities and love their hobby. But lately a lot of people have been jumping on the bandwagon looking to make money off of the hobby. While I don't necessarily have a problem with someone trying to make money, I have a

huge problem with it when they are attempting to do so by leeching off of someone else's hard work or at the expense of someone else's hard work, time, money, and dedication.

I realize that the majority of you do not provide online scanner feeds but many of you do listen to them when there is an incident in the area of one of these feeds so I value all of your opinions on this issue. Should the feed providers not fight for the credit they deserve when applications make money by selling applications that point to their feeds and consume their bandwidth? Are these applications good for the general public by making these feeds available to those that want or need to listen to them and not worry about where they came from?

Thanks for reading,

Thomas Miller

Tom and Jake ,

I whole heartedly agree with your opinion! Totally! Whoever creates the feed should get credit and should be able to do whatever they want with it.. It's their money. No one should squat on a feed for commercial use or rip off someone else's feed for their own. Being the person who you describe as person #3 in a previous email and a person who had many feeds on a website I can talk on this matter. I can easily say that and also state that I have people who will pay people to setup scanners at certain locations for live feeds for private use. There are many reasons for that, commercial or non commercial. There's nothing wrong with it and it's all legitimate. Just because you've never heard of it doesn't mean it's bogus. We're not ripping anyone off and we're not charging people to listen to feeds, but I'm utterly amazed at your close mindedness and utter lack of thinking skills in this matter It sounds more like you're trying to create a monopoly on your area rather than "the good for the hobby.

But for one second lets play devils advocate.

Who made you the scanner hobby morals police?

Who made you the people that is in charge of passing judgment on people and what they do with their feeds? So what if someone comes to you asking to setup a live feed for private use? It's called colo'ing or just renting server space.

*"JUST as dangerous/humiliating to us because it invites the entire world
*

to listen to a bandwidth-limited feed that was primarily put up for the local and regional community, not commercial interests hundreds of miles away".

I'm amazed at this statement considering the fact that online feeds are not just used for the purpose of regional awareness. How many "out of the area" scannerists hop on a feed to listen to some type of fire whether it's residential structure, wildland, commercial or even a mass casualty incident just to listen and gauk. It's great that you guys open the feed up to a large amount of people when there are large wildland incident like last summer in Butte, but If you're going to use the above statement as a theory then just put your feed up when someone big happens. But don't use that excuse when the feed is up 24/7 for anyone to listen.

Respectfully submitted
Ben

So either make the moral decision to stay free, and provide a feed to who ever uses it, or go professional and make a buck.
This is the "Land of the Free", and also "The Land Of Opportunity" ...
Go figger...conflict, contradiction, Constitution, or just some guys trying to create markets for online info. Not everyone is just a pirate.

Such feeds are very valuable to those who need information to make a living also...Living is defined by more than just safety.* Did you ever realize *folks might eat because of your feed? Children might get what they need...people might stay employed? It's a REALLY big chain we have forged here.

BTW, I contacted FCC because I am probably someone you would hate for making a living off my ability to research via all available sources...maybe I am one of those pirates...

I asked the direct question, "what are the laws regarding the use of scanners to monitor public safety agencies?"

Here is all they had to say to me about cautions in any laws regarding scanning public agencies:

*"You are receiving this email in response to your inquiry to the FCC.

FCC Rules prohibit manufacture and importation of scanners capable of receiving, or being altered to receive, frequencies allocated to the Cellular Radiotelephone Service.

Scanning receivers are required by Rule Section 15.101(a) to be certified by the Commission. Section 15.121 states that scanning receivers and frequency converters designed or marketed for use with scanning receivers, must be incapable of operating or being altered by the user to operate, within the frequency bands allocated to the Cellular Radiotelephone Service.

Manufacturing a scanner to receive cellular telephone frequencies is a violation of Section 302(d) of the Communications Act of 1934 and Sections 15.37(f) and 15.121 of FCC Rules.

Use of scanners by individuals to intercept and divulge cellular radiotelephone communications is subject to Section 705 of the Communications Act of 1934, as amended (Communications Act), and potentially a violation of other federal criminal statutes.

Any suspicion of eavesdropping of cellular radiotelephone communications should be referred to your local FBI office.

Rule: Communications Act Section 302(d) and 705
47 CFR Sections 15.101(a) (Certification), 15.121 (no modifying)

Web Site(s): http://wireless.fcc.gov/rules.html

1. Is it illegal to listen to cellular radiotelephone communications with a scanner?
Use of scanners by individuals to intercept and divulge cellular radiotelephone communications is subject to Section 705 of the Communications Act, as well as the federal criminal statute, 18 USC 2511.

2. How do I report someone eavesdropping on my cellular radiotelephone conversations?
Any suspicion of eavesdropping of cellular radiotelephone communications should be referred to your local FBI office.

3. Do scanners need to be certified?
Scanning receivers are required by Rule Section 15.101(a) to be certified by the Commission. Section 15.121 states that scanning receivers and frequency converters designed or marketed for use with scanning receivers, must be incapable of operating or being altered by the user to operate, within the frequency bands allocated to the Cellular Radiotelephone Service. The Commission defines a scanning receiver as a radio receiver that automatically switches among two or more frequencies anywhere in the range of 30 to 960 MHz and that is capable of stopping at and receiving a signal detected on a frequency.

4. Can I modify my scanner in any way?
Section 15.121 states that scanning receivers and frequency converters designed or marketed for use with scanning receivers, must be incapable of operating or being altered by the user to operate, within the frequency bands allocated to the Cellular Radiotelephone Service. Thus, at a minimum, you cannot modify your scanner to operate within the frequency bands allocated to the Cellular Radiotelephone Service.

5. Who do I report the sales of illegal scanners to?
Report the sales of illegal scanners to the FCC. You can file your complaint using FCC Form 2000F by any reasonable means, including electronically on the Internet at www.fcc.gov/cgb/complaints.html; by sending an e-mail to fccinfo@...; by calling 1-888-CALL-FCC (1-888-225-5322) voice or 1-888-TELL-FCC (1-888-835-5322) TTY; by faxing 1-866-418-0232; or by postal mail to:
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554.
You may also submit your complaint in an alternate format audio-cassette recording or Braille.

Your complaint should include the following:

" your name, address and any additional contact information;
" the type of company that is the subject of your complaint;
" the details of your complaint, including the dates, times and nature of any conduct or activity complained of and identifying information of any companies, institutions or individuals involved.

Thank You

Rep Number : TSR09"*

That's straight off my email. I don't see where a lawyer, or anyone else can really find an argument with "the horses mouth" in this matter. I've seen people try, but they were not the FCC.

And who is the new judge of "the good people" all of a sudden? WTF?

So if you are a Coal Miner you are a "bad people" cause you rape the earth? So if you are a cop, in someones uneducated opinion you are a "bad people" cause you deny someones right to rape, pillage and burn? Who are these new judges, that we should all fear our own lifestyles and careers?

Are you a sellout for ...Pepsi...Rap....Coke...Rock... or maybe you like Streisand better than scanning..FOR SHAME!!

If you are a scanner fan, and you put it in public domain, it's not really yours anymore. Any more than when you put a video on Youtube. Or an online scanner feed. Where is your copyright?

I get where you feel that the greatest need is for those nearby who will be affected by the information, but this is where the "market" $#!^ hits the fan, and why it improves. Because there is a need, and usually because it lines someones pockets. The internet is NOT free...no one goes online without someone paying and nothing gets posted without a $ transfer somewhere.

Do you have any idea how many Insurance Adjusters & Contractors use Firedispatch.com (sorry to bring you guys in)...are they complaining...are they busting the users...are they even concerned about credit?

The "good of the hobby" is fine, but what about the good of the public in general? People who are trying to struggle to survive, to make a business a success? You can help, or you can complain. What does your contribution mean overall?

And Ben makes an excellent point about those who jump on a feed during a major incident. I can tell you for certain I introduced a Sacto news station to such feeds back when Malibu went up a couple years back, Shame on them for listening!! They should not tie up the precious bandwidth...or maybe the net should just adapt and provide better available resources? Oh wait, that happened last Spring in Oroville when others offered extra bandwidth to maintain feeds (applaud that effort now please.."We are the world, we are the children...")
And then there is the more pointed issue of "Feed Lookey Lou's" who just want the nitty gritty horror of it all when it gets hot....shame on them too, for keeping the locals off the feed. Hell, locals can buy a dang scanner and join the fun free too! More so than the rest of us with towers and racks and an investment. And they get less static.

I could go on, but flaming is a bad thing....shame on you for knocking Ben too. He has learned what the potential is here and uses it as a

professional.

Ok, trash me now...

Robert, the ones I know for Northern CA are the following:

wildlandfire.com/scan (covers state/fed fire in Butte, Tehama, Shasta, Plumas and surrounding areas)

redding.com (covers fire/law dispatch for Shasta/Tehama Counties with minimal tactical, command, or air)

thenet411.net (covers fire/law for Butte with ability to go into Plumas/Lassen USFS and Tehama/Glenn/Sutter)

scancal.org (covers fire in Tehama/Shasta and all surrounding Forests)

http://sandrserve.com/eldoscanner/main.htm (fire for El Dorado and Amador)

http://www.spiral.com/nevada_county_scanner.php (covers fire/law Nevada county area)

looks like a bigger list on wildlandfire.com
http://www.wildlandfire.com/news/scanners.htm

14347. new fire.... Yuba City.

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-03-30 03:59:58 UTC
From: Helitack
Topic: 14347 Message: 14347

this is between the levee and Feather River Yuba City (Sutter County). 15-20 acres, heavy brush and trees. Flame length in some places is 40-60ft with 15 mph northwest wind. Moderate of spread. Command on Yuba City Tac1 154.34

This is in a area heavy with homeless people and have lost all of their belonging in the fire. Red Cross and several churches are working on placing these people.

I could give GPS if I were infont of my computer. Maybe tomorrow.

Tularcitos
Bear valley (Helitack)
Beaver dam
Antelope
Hollister
Bradley
Parkfield
Lockwood
Aromas
King city
Hollister Air Base
Gabilain camp @ Soledad prison
Gonzales

Might have missed one or two.

Subject: Re: [NorCalFire] Cal fire BEU stations

I could give GPS if I were infont of my computer. Maybe tomorrow.

Tularcitos
Bear valley (Helitack)
Beaver dam
Antelope
Hollister
Bradley
Parkfield
Lockwood
Aromas
King city
Hollister Air Base
Gabilain camp @ Soledad prison
Gonzales

Might have missed one or two.

Craig

Earth: 36°34'26.43"N 121°54'50.92"W

I am not sure if Gonzales is a CAL Fire Station anymore as they do not list
themselves as one on their website
http://www.ci.gonzales.ca.us/indexfire.html

However here is their address: 109 4th St. Gonzales, CA 93296 Don't have
LAT/LONG at the moment.

Subject: [moderatorcentral] Planned Outage: Monday, April 13, 2009

On Monday, April 13th, 2009 Yahoo! Groups will undergo scheduled maintenance. During this time your group will be unavailable for 30-60 minutes.

The outage is currently scheduled to begin at 1 pm PT, 8 pm GMT. At this time, 1/4 of all Yahoo! Groups will become unavailable while the team services these groups. Once maintenance is complete on that 1/4 of Groups, they will be made available again, and the next 1/4 will become unavailable until all of the groups have been serviced.

In total the maintenance period should last around 5 hours, with the maintenance concluding around 6 pm PT, midnight GMT.

While your group is being serviced, all features of your group, including messages, photos, attachments, etc. will be completely unavailable. However, once your outage time concludes, your group and all of its features should return and any messages that were posted to the group via email during this downtime will be sent out. Please note that your group's outage should only last around an hour.

In an effort to better communicate to all of you, a blast message will be posted to all groups starting today and continuing on through April 13th, 2009, linking to this message on the blog. This blast message is visible on all groups to all members and moderators.

Thank you for your patience-during the outage, the blog (http://www.ygroupsblog.com) will remain up (and comments will remain open) and we will update you all as information becomes available.

Melissa Daniels
Yahoo! Community Manager

Note to moderator note:

>1 pm PT, 8 pm GMT

8pm GMT = 2000 GMT

2000GMT - 700 (GMT->PDT) = 1300 PDT = 1pm PDT.

I believe their conversion is correct.

What they can't do is ADD:

8:00PM GMT + 5 hours is 01:00 (the next day) GMT, not midnight...

0100 GMT is indeed 18:00 (or 6:00PM) PDT.

;-)

Heard that there was a 30-50 acre fire in the Camptonville area. Ended puting smokejumpers on it yesterday evening. Lots of smoke and not much flames.

Is this an indication of things to come? Seems a bit early for that high up.

14369. Volunteers and Out of county pay

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-04-24 05:02:53 UTC
From: Brian
Topic: 14369 Message: 14369

I was reading in one of the local newspapers out of Lassen County and saw that volunteers were terminated for getting paid for going out of county on wildland assignments. This sounds like it can stir up a lot of issues with departments that are volunteer based. The way the season is looking we will need to depend on these departments for assistance. Check out the links. http://lassennews.com/News_Story.edi?sid=5485&mode=thread&order=0 http://lassennews.com/News_Story.edi?sid=5484&mode=thread&order=0

14370. Volunteers and Out of County

From: Brian
Topic: 14370 Message: 14370

I read this morning about 15 volunteers losing their positions at the department for recieving pay for going on wildland fire assignments and recieving pay. Really causing a stir in Lassen county and possibly with other volunteer departments. With the way fire season looks so far these departments will be needed to support fires. Read the links very interesting and not sure if there is some amendment to the law they are talking about or not.

The fire departments, rural fire district, or whatever get paid for the use (rental)of their equipment engine, water tender, or brush rig, I wonder how that fits this case. This (rental) could amount to a nice amount of unanticipated revenue to fire districts.

Date: 2009-04-24 09:33:55 UTC
From: twobells2@charter.net
Topic: 14370 Message: 14372

About 15 years ago the state and federal agencys who requested fire department services. The first X number of hours about 10 were free mutual aid, then they paid the department for equipment and each firefighter directly. The issue then was some departments wanted a piece of the firefighters pay. " Without the equipment you wouldn't have made that money". You (district) were paid for the rental of that equipment. Without firefighters putting our butts on the line that equipment wouldn't move out of the station. In fact the State of California came out with a memorandum to all departments that they were in no way to pressure firefighters to give or repay departments any money.

This country since it's inception, has enjoyed the low cost of volunteer fire departments service. Now in another case of lawyers getting involved in another area such as injury, malpractice and all the TV ads for, if you had, think you had, knew a friend who had, call now. Imangine the millions in legal fees to be made on this issue, and the result.

It will make all departments go to paid, and our property taxes will rise out of sight.

I can't wait until they have a open season on lawyers.

I don’t know if anyone would be interested in
this but Gerber Fire department (A Volunteer township dept. of 5000 people)
Was shut down due to not enough funds. This department covers an area of 25
sp. Miles, Needs to operate for thetownship and has 4 qualified CPR men and women. “ALSO”
2 engines and equipment,something like this, CDF Fire could over take and cover in funds
instead of
paying private owners $60.00 an hour. If you see what I am talking about. They
would be paid at the Gerber fire dept there regular wages instead of the out
rageous price. And it is a VERY needed department for township and CDF so they would not
run shot in fire season. Maybe this does not need to be?

Be sure to stop by both our sites at;

Government workers/employees always cost more than private sector. If you can put a fire fighter on the line with an engine for $60 bucks per hour including overhead that's a great price! What needs to change fast is the laws about volunteers getting paid occasionally or reimbursed for PPE, radios etc.

And the divisions between paid(so called pro's), Privates and volunteer firefighters is so sad ever time I see it rear it's ugly head...

To almost everyone on this thread,
WHOA BIG FELLA ! Lets all take a BIG breath and calm a little.
First, Volunteer F/F's ARE classified as unpaid employees. They have the same rights to workers comp., OSHA Reg's, PPE, Labor laws etc as the paid folks.
Second, It is not unlawful to pay Volunteer F/F's. It just has to be done following all the laws applicable. Unemployment Insurance, SDI, FICA, State & Local taxes etc. Once all the underlying taxes/fees are paid the pay rate comes down to about $16.00 per hour (take home pay). "See dan muttering and biting lip" Where did you come up with this $60.00 per hour c*"@!!+p ???
Last, just because you terminated someone it does not mean that they (the Terminated) do not have recourse via State & Fed labor codes. What district policy did they break to justify Termination ? Sounds like the Board may have had a knee jerk reaction and opened Pandora's box.

Apples to oranges gentlemen...

Cost to the government, (including Overhead and Equipment costs) is not comparable to take home pay.

No need to use colorful language.

(Unless as a tax payer you start to wonder what you're getting for the difference between $60/hour and the $16/hour that the FF gets...)

14378. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-05-01 09:12:24 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14378

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

14379. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-05-01 09:12:24 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14379

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

Dan,
Wish I had known you about 15 years ago. When a member of our fire district board of directors decided he would run for the County board of supervisors by "cleaning up the fire district."
"Those firemen are hanging around the fire hall too much."

Not to mention the firemen built a 14 X 80' addition to the main station including a classroom, showers, washer, dryer, new bathrooms, and bay for antique fire engine as they had completed a frame off restoration. Oh and taking classes at least every other weekend many times out of county. And fire calls yea we did that too. and Saturdays to maintain and clean the equipment

It started with a fireman getting a letter after 7 years service that he didn't meet minimum requirements. Several weeks later same fireman comming home from late night job in neighborhing district noticed a home on fire and managed to lead two elderly people to safety.

After several incidents including previous to next Christmas party board member reminded fireman planning dinner, that he liked X type of wine and wife liked Y type wine. The firemen were paying for this dinner as always, so the courtesy of having the board members sit at the head table was changed and the firemens association officers sat at the head table, board members and wives sat in the cheap seats with the firemen and drank same wine as everybody else.

Next it was decreeded that the monthly oil fill of the heating oil was to cease, leaving the station without heat. The next election with a polling place at the fire station, election workers and voters asked if something was wrong with the heating system as they froze.

Next in a "cost saving measure" the hot water was ordered to be turned off for good. Firemen returning from calls especially medical got to clean up in cold water.

Then there was the issue of having the firemen pay for their own Hepitas shot series. Thats when I left. They were running off guys with 25 years service.

I'd like to see some real safeguards for volunteer firefighters. The fireman dosen't have the funds to persue action on a termination and what does one win , being placed back in the same situation. I have heard of so many departments ruined by one or two dimwit board members with no knowledge, and trying for higher seats as supervisor or school district.

A good place for CSFA to do some good organizing, defending, and lobbying volunteers. In our case CSFA didn't want to get involved as all members wern't signed up. Some firemen were afraid to sign up as board said we were forming a union. Enough said.

14381. Engine movement

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-05-06 15:14:53 UTC
From: Helitack
Topic: 14381 Message: 14381

Anyone heard of CDF engine movement out of Placer county, headed north?

passed 9 type 3's and a type 4 headed north on Hwy 65 towards Marysville. There was no Batt chief with this convoy, unless they are meeting up somewhere.

The new (yesterday afternoon) Jesusita Fire near Santa Barbra has ST's coming in from around So Cal and reportedly as far north as Monterey County, maybe more. http://tinyurl.com/Jesusita Not showing on Inciweb yet.

Could be meeting up to go there, or conceivably to fill in.

Topic: 14388 Message: 14388

Latest news story on the fire in Santa Barbara said that there were some 29 firefighter injuries, and I heard 5 were from one burnover last week :(. Hopefully they are including sprains and dings in that, because otherwise it's going to be a painful year on the fireline, and who wants it?

Please, all of you out there on the lines, be careful and keep up the good work! You are appreciated! :)

The east Sierra is getting hit with lightening strikes. Both Inyo and Mono Counties, and probably
Alpine.

Mono County has two fires going, one on the north side of Mono Lake and the other at Devils Gate
north of Bridgeport.

Joe,
Isn't flaming fellow list-members enough to get you kicked off this group or any well-managed group?

Likewise, telling a list-owner what he/she should do to manage his/her group rarely ingratiates oneself to a list-owner.

I realize you have an "in" with Jake who let's you get by with murder and you thrive on Flamescan because, well, it's Flamescan.

Your anti-social bent wouldn't fly well most anywhere else on Yahoo Groups.

The incident in late September 2007 was an accident as I am a member of NorCalFire and NorCalRocks and accidentally sent a message to one group intended for the other.

As for this incident, I was trying to invite 19 friends from my Googlemail address book to be my friends on Facebook and accidentally sent out an invitation to everybody in my Gmail addy book. Like I said, it was an accident...sue me!

I'm regret to hear you delicate constitution cannot weather the blow of receiving an invitation to California Disasters group.

I sent those invites to you smart-assedly in response to your being jerk with me on several occassions last year...apparently you can dish it out but can't take it....the classic bully...but one who must be one over the internet which requires no courage.

As for the rest of the membership of NorCalFire, I beg your pardon for the accidental message to this group.

Sincerely,

Kim Patrick Noyes
Atascadero, CA

14403. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-01 09:01:26 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14403

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

Topic: 12014 Message: 14404

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

14405. Lightning west Sac Valley

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-03 05:39:11 UTC
From: Jake H
Topic: 14405 Message: 14405

The past week we've had intense lightning with very heavy hail and rain all along the western slope and ridges of Sac Valley in upper MNF and lower SHF and western TGU and SHU. Last night and tonight the storms have lingered well past sunset, but still have significant rain. TGU activated lightning plan for Paskenta area. Expect significant air recon Wed morning by Copter 205 and Air Attack out of Redding.

169.175 MNF Forest Net
171.575 SHF Forest Net
170.4875 SHF Southfork District Net
151.370 TGU Local

Extreme lightning over Beale airforce base heading north into Oroville now and due to hit Chico and Tehama County by midnight. Some cells went through Hwy 70 Yankee Hill area earlier this evening in Butte County starting multiple fires. Butte County lightning ops is heavy on Cmd 1 151.355. Tehama Lightning ops was on Cmd 2 151.265. Heavy precip with these storms luckily.

A few more days of this I think? Lots of air recon the past few mornings. CWN aircraft up doing recon.

All on scancal.org live scanner.

Thanks Pam! My brother almost got hit a few times near Vina Helitack taking pictures - luckily he was in the car. Poles hit two poles down from him. I just got back myself from Hwy 36 near Tuscan Buttes. Fun pictures. At one point most of the valley blacked out and came back later. Definitely stayed in the car.

LOTS of precip with this. Copter 205 will remain in TGU for recon in the morning I heard admin chit chatting.

Currently at 0130 the east side in Colusa is getting slammed. Snow Mtn Wilderness, Mt. St. John, Goat Mtn area all west of Stonyford - slow moving northwest. Unreal. Maybe we'll do this all again tomorrow night?

We actually had a person hit by a lightning strike up here in Plumas county (Dellekar) yesterday afternoon. Pretty intense hail storm followed. Elderly lady was life flighted to Reno, so don't know the condition. Orig went over the scanner as a possible DOA due to lightning strike. Kinda caught me by surprise up here as I had just came back from a week out in Gerlach, NV., where it's been pretty awesome watching the storms roll through out there in the smoke creek/blackrock deserts. Couldn't get all the antennae disconnected fast enough!

PNF 170.550 broadcasting another week of this stuff ??

Later,
Todd...

14413. New online Tuolumne area fire scanner

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-08 00:02:53 UTC
From: Richard Tidd
Topic: 14407 Message: 14413

Hi

Thanks to a friend who is housing an online fire scanner I supplied, we now have
new online fire scanner for the Tuolumne County area of California that is hosted
by ScanAmerica at the following address: http://tuolumne.ca.scanamerica.us/index.php

The fire scanner covers the Tuolumne, Calaveras and Mariposa & Alpine Co.'s
area of California. The scanner is located at a friend's house in Tuolumne Co.

We are scanning CalFire, air attacks, Columbia air attack base, NIFC & other
fire frequencies for this area as well as Stanislaus NF & Yosemite NP.

This is a combined endeavor of two Ham’s
& fire buff’s, (KE6HNY & WA6AVR)..

Just in time for fire season, so
listen in.

Also, thanks to other stream volunteers
& ScanAmerica, many areas of the Sierra Nevada Mountains & others areas
are covered online.

Checkout the California streams at
ScanAmerica at: http://ca.scanamerica.us/index.php

Thank You
Richard Tidd
richtidd1@...

Listen to my online scanners at ScanAmerica.
San Mateo Co. FD & PD scanners:

14414. Fw: [moderatorcentral] Yahoo! Groups downtime this Thursday (June 11, 2009)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-09 21:36:22 UTC
From: Dana Johnson
Topic: 14414 Message: 14414

Just sharing information for those belonging to YahooGroups.
Dana

- - - -

This Thursday (June 11th, 2009) Yahoo! Groups will be undergoing maintenance. During this time 50% of groups will be unavailable for up to an hour. The outage is scheduled to begin some time between 2 and 3 pm PT (10-11 pm GMT).

While the maintenance is going on, all features of affected groups, including messages, photos, attachments, etc. will be completely unavailable. However, once the outage concludes, any messages that were posted to these groups via email during this downtime will be distributed.

For more information (or to comment), see this blog post:
http://tinyurl.com/20090611downtime
http://www.ygroupsblog.com/blog/2009/06/09/planned-outage-thursday-june-11-2009/

Thanks, and our apologies for any inconvenience the downtime may cause.

Well, it would be if they could find the darn fire! They can see the column and have whittled it down to the vicinity of the corner of Bald Rock and lower Zinc Roads and are running vehicles up all those little side roads trying to find the fire's actual location.

Apparently neither of the two reporting parties knows exactly where it is either but can see either fire or smoke from their locations.

Gonna be a long night...

Vegetation fires, scattered along Forbestown Road, cross of Lumpkin;
Forbestown closed from Robinson Mill Road to Lumpkin immediately.

Two tankers on site w/air tac and copter 205 dropping on largest spot now to
hopefully halt hazard to structures along Forbestown Road.

Structure involved at 2151 and heavy threat to 2157 Forbestown....Total of 3
tankers, at least 4 dozers, 4 additional handcrews, etc.

Cause apparently some yahoo in a Toyota who blew a tire then drove on the
rim.....

14429. Scanner mp3 streams native on iPhone 3.0

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-23 02:36:46 UTC
From: Jake H
Topic: 14429 Message: 14429

iPhone 3.0 software now allows most/all standard mp3 encoded streams natively in Safari (such as Shoutcast streams). And since it's "within Safari" it is background-task enabled and allows you to do other things on the iPhone while the audio stream is playing (like check google maps, photo the fire and dutifully send the fire update to your local yahoogroup. :)

It works over wifi, EVDO and 3G signals. (at least my 24kbps stream)

Have fun this season, and lets see some more shoutcast streams in the fire areas of California!

You're hearing the Rumsey Incident in northwest Yolo County. Their initial tac was white 2. I'm sure due to the size they've grown a few tacs. Sounds like they surpassed 500acres on this one. Expect to hear more tomorrow, and probably some resources moving over.

Pamela - for all the radio traffic you DON'T hear in Butte, the hole you're in seems to do quite well for Yolo. ;)

14461. Rumsey fire update 1430 Tuesday

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-06-30 21:35:56 UTC
From: Jake H
Topic: 14461 Message: 14461

Approx 630acres. Command is on Command 1 151.355 which I'm picking up crystal clear in Red Bluff on the live scancal.org scanner.

Air Attack looking for a 1530 relief, and copters 102 and 104 are at Rumsey Helibase being reconfigured for initial attack, but kept at Rumsey incase of immediate need back on the fire. Priority is still left flank, which I am presuming is the west side of the fire since I thought the winds were out of the south yesterday in the area, putting the head of the fire on the north side. The left flank would be the most remote side, and that's where they've been having access problems with crews.

Jake

Subject: [NorCalFire] Rumsey fire update 1430 Tuesday

Approx 630acres. Command is on Command 1 151.355 which I'm picking up crystal clear in Red Bluff on the live scancal.org scanner.

Air Attack looking for a 1530 relief, and copters 102 and 104 are at Rumsey Helibase being reconfigured for initial attack, but kept at Rumsey incase of immediate need back on the fire. Priority is still left flank, which I am presuming is the west side of the fire since I thought the winds were out of the south yesterday in the area, putting the head of the fire on the north side. The left flank would be the most remote side, and that's where they've been having access problems with crews.

Jake

The fire is about 16mi north of the casino on Hwy 16.

14464. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-01 09:06:41 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14464

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

14466. Public Meeting Hwy 108 Fire Safe Council

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-03 00:27:53 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14466 Message: 14466

County Residents Invited to Discuss Fire Protection Strategy

(Sonora, CA July 2, 2009)…Fire Safe Council President Jerry Tannhauser today announced that on Thursday, July 9, the Highway 108 FireSafe Council is inviting Tuolumne County residents to meet and discuss fire protection, emergency preparedness, and fire prevention measures needed to protect life, property, and resources from wildland fires.

The open public meeting is scheduled to be held at 6:00 p.m. Thursday, July 9, 2009 at the CAL FIRE Columbia Air Attack Base, located in Columbia on North Airport Road (turn onto North Airport Road from Parrotts Ferry Road, proceed ¼ mile on North Airport, and look to the left for the CAL FIRE sign and automatic gate). The purpose of the meeting is to provide private landowners and local fire agency officials the opportunity to discuss, consider, and form a strategic planning link that connects fire protection, emergency access routes, defensible space around homes, and additional fire prevention measures to support agency firefighting efforts.

Attendees will enjoy a first class tour of the CAL FIRE Columbia Air Attack Base and a program on its distinguished 50-year history. Featured will be a presentation on the air base operation, and a site tour of the aerial firefighting facility. Agency officials also will be on hand to discuss California Public Resources Code 4291 requirements to ensure a 100-foot defensible space around homes and structures, and local community projects designed to reduce flammable fuels in the area.

The FireSafe Council is seeking ideas and comments from residents of Tuolumne County to help fire agencies better identify the existing wildland fire danger present on public lands administered by the Forest Service (FS), and adjacent private property located within the county and state responsibility area protected by the Tuolumne County Fire Department, California Department of Forestry and Fire Protection(CAL FIRE), and direct protection area of the USDA Forest Service.

A significant portion of Tuolumne County consists of private land located in the wildland-urban interface (WUI), with portions bordering FS land. The entire county is considered a priority concern due to the level of flammable vegetation, adjacent homes, and the threat to life, property, and other values at risk due to the high potential for large and damaging wildlfires. The public is asked to help agency officials identify priority areas for strategic fuel reduction projects, generally located on private land adjacent to federally administered lands and surrounding communities.

The Highway 108 FireSafe Council works with the Tuolumne County Fire Department, CAL FIRE, USDA Forest Service, USDI Bureau of Land Management, Columbia Fire Protection District, Tuolumne Me-Wuk Tribal Fire Department, Tuolumne City Fire Protection District, Sonora City Fire Department, local fire districts, and local communities to develop and implement strategic community wildfire protection plans.

Director

14467. "LT" ? Incident in SRF:

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-03 19:56:00 UTC
From: Harry Marnell
Topic: 14467 Message: 14467

Six Rivers NF has some fires they've been working since yesterday, but I'm not receiving clearly enough (dang narrowband) to determine what or exactly where, though it seems to be in the Willow Creek area, as there's mention of Willow helibase. They're using crews, engines and copters, and requesting "crews" at least thru tomorrow night.

Might be related to the SHF "Lightning Complex" or SRF's Suzy Incident.

Using 168.125, 122.225 air-to-air, and I think I heard 166.675 as a tac frequency.

It's on my scanner feed at http://www.radioreference.com/apps/audio/?ctid=194 You can listen right on that page (to the right of the map) or scroll down and select the audio player of your choice.

Anyone on the Willow Creek or Trinity side of the mountain who can hear it better?

OK, got someone's lat/long of 40?52.201 N, 123?32.40W which is about 10 miles west of Hayfork, as well as these maps:

Tom sounds like MNF is getting a cell over letts lake now. :)

Harry try this for some info
http://www.redding.com/news/2009/jul/03/fire-crews-continue-find-lightning-fires-shasta-tr
/

I've been listening to these fires the past few days and the recon
flights that found them. Try these victors out too. They were mentioned
between various recons over Wed and Thur between Hayfork and
Weaverville. You also have LNF Copter 510 from Chester working around
Willow Creek. TGU Copter 205 was up there too yesterday but came back
last night. Not sure if it's back there or not today. I think they are
flying at least 2 heavies, possibly 4 for an 80acre fire up there. Lead
55 working. Air Attack mentioned decent torching in the trees, although
lack of wind has the fire not pushing hard against the retardant lines.
Wanted Rohnerville for reload but it was fogged in.

Subject: [moderatorcentral] Planned Outage: July 14, 15, and 16

This week (July 14, 15, and 16), we'll be performing maintenance on the remaining 75% of Yahoo! Groups that were not affected by last Wednesday's outage.

This maintenance will take place over a three-day period (July 14, 15, and 16), as we'll be working on 25% of Yahoo! Groups at a time. This means you may be able to access some of your groups, but not all, during the outages. For the affected groups, mail will be delayed, but will return to normal once the outage is complete.

All of the outages will take place at 3pm PT (10pm UTC/GMT-to determine what time the outage will take place in your neighborhood, please visit this link: http://www.timeanddate.com/worldclock/converter.html) on the 14th, 15th, and 16th.

While we know that outages sometimes seem to come at exactly the wrong time, we again hope to have these next three done within 2 hours.

Once the maintenance has been completed, we'll update the blog (http://www.ygroupsblog.com).

Thanks for your patience!

Melissa Daniels

From: Pamela Alley
Topic: 14475 Message: 14475

Is there a map we can get hold of that shows where the various 'lines' are??
(Begging here..it would be nice to be able to look these up! :))

Vegetation, lookout shot from Sawmill Peak LO. East side of Feather River,
almost due north of Sawmill. Apparently pretty clear to the lookout.

Will post followup; far as I can tell, full wildland callout. Access from
Jarbo Gap side. Bridge limitation makes Engine 33 (Paradise side response)
unable to access from Jordan Hill side. Will go around.

6:30am update per Cal Fire:

Fire is now 50% contained. The main fire is estimated at 20 acres with additional spots burning in timber. Difficulties include very steep terrain, blowing winds, and getting water has been difficult. There are currently 20 engines, 4 hand crews with 2 more hand crews being ordered. Aircraft will be launched as soon as possible with at least 2 tankers and 1 helicopter sometime after 8am.

And my lonely little Humboldt Feed at
http://www.radioreference.com/apps/audio/?ctid=194

My favorite feature (I think I already mentioned this, so stop me if you've heard it before) is that you can listen via the player right there o the right side of the map, or scroll down to the drop-down and select to play it through the player of your choice (RealPlayer, WinAmp, Windoze Media player, iTunes, etc). Or choose *several* for a cool reverb effect... and boost my "hit" numbers. LOL.

Seriously, I've got SRF and HUU in priority for the Backbone and a couple smaller incidents over here, though I can only pick up the far west side of it, and it's been fairly quiet on the radio the last two days.

Harry

Per Cal Fire:

Due to the experience and hard work of the firefighers in a very difficult situation the fire will be contained at 6:00pm this evening, 7/14/09.

35 acres so far and likely the final total.

PNF working a fire just east of La Porte. 50-60 acres with spotting half mile ahead. South winds 5-7. Just camped last year at Little Grass Valley Reservoir and it's ripe up there. Limited ground access so as many aircraft and jumpers as they can get it sounds like.

No, 172.400 is not a Plumas freq. They would either stay on forest
net & use different tones for the different repeaters or switch to
crew net 168.200 or possibly one of the NIFC freqs 168.050 or 168.600
air to ground 170.000
the other possibility is if there are some local fire depts there
also they will use 1 of the white tac freqs to be able to communicate
with each other
white 1 154.280
white 2 154.265
white 3 154.295

Plumas is also on a brush fire just N of the hiway 70 intersection
with US 395 on the E side of 395.
They were using white 1 with a local fire dept on that one.

172.400 popped up as PNF Rich IC last year during the lightning fires on 7-29-08. Mohawk and Plumas dispatches were heard on it then, just like PNF Forest Net, and I'm hearing it again now. Could it be a PNF Service Net? It's a common service net repeater for other R-5 forests.

PS hi Dan/Chief! ;)

That is a possibility that it is a service net repeater they have set up to stay off the forest net, it is not something connected directly to Plumas that I have seen before. I should be seeing one of them in the next couple of days & will ask. For now it is still a Plumas run fire, nothing about an IMT yet.

14496. Re: [NorCalFire] Plumas Forest: La Porte (Howland IC)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-16 05:34:08 UTC
From: Jake H
Topic: 14490 Message: 14496

Thanks Brian - if you could check I would really appreciate it. If you can get me an alpha name for it, such as Service Net or Fire Net. My last channel plan for the PNF from 2004 does not mention 172.400, or any Service or Fire Net. Just an Admin Net of 171.425. 172.400 is definitely Howland IC for PNF and was strictly fire traffic. Lots of logistics back to Plumas for resources and lunches and tomorrow's orders and engine coverage for the Forest etc. At one point Plumas seemed to mistake what tone he was on and mentioned "Sunset" and then corrected himself and was on "Lexington" which was surprisingly great coverage into Cottonwood and Red Bluff. I know Sunset Mtn is somewhat poor into Red Bluff with a lot of multipath. Lexington Hill is also a PNF Forest Net location. It is approx 5700ft just west of La Porte, shadowing La Porte basically and line of sight to the fire location.

If I understand the PNF Forest Net, it's all microwave based on the west side, so a unit on the west side could be on one tone and use that mountain top as a local repeater, or switch tones and the mountain top would take him over microwave back to Plumas/Mohawk dispatch.

No plume seen from top of Tuscan Buttes in Tehama County tonight, but definite drift smoke from the south winds pushing it over the west slope sierra nevadas into Lassen Park. Last word on wildlandfire.com hotlist was 120 acres at 5pm.

The Howland fire on 172.400 is on scancal.org live scanner now for duration of fire.
Jake

Just left Sonora Safeway (approx 2:10), and the smoke disappeared while I shopped. There was still a plane above the scene, but I assume it's winding down.

From: Pamela Alley
Topic: 14500 Message: 14500

149 toward El Dorado, but still on NEU side. A note was made earlier that this was a working NEU fire down in the ARC (I want to say Mannon? area?). Strike team from Butte just sent down initially as move up and cover but now upgraded to Code 3 initial attack on the fire.

Not sounding real cheerful. Anybody got a feed?

149 toward El Dorado, but still on NEU side. A note was made earlier that this was a working NEU fire down in the ARC (I want to say Mannon? area?). Strike team from Butte just sent down initially as move up and cover but now

upgraded to Code 3 initial attack on the fire.

Not sounding real cheerful. Anybody got a feed?

And the only way to *get* the frequencies on there is to contact the person supplying the feed (his contact info should be on that webpage in the "Links" section) and see if he can/will add them... if he's within range of the tac channels.

Harry

I made a mod in my programming for this.
Fore now, the right side of my stream is SAR related traffic only.
The left side is still the SMCo TRS. The OES TG is there as well.
They are part of the SO & working this search.

You can listen here: SMCo.: http://www.radioreference.com/apps/audio/?ctid=223
Choose the San Mateo County TRS and city police departments:

Thank You

MPROSD as well.

http://cbs5. com/local/ missing.hiker. search.2. 1090372.html

Massive Search On For Missing Hiker Near Woodside
SAN CARLOS (CBS 5 / BCN) --

Scores of San Mateo County sheriff's officers were looking for a man who never came home from a Thursday evening hike in the Skeggs Point area of unincorporated San Mateo County.

Douglas May, 55, left his home in San Carlos around 5:30 p.m. to go hiking, but family members became alarmed and contacted the sheriff's office when he never returned.

A sheriff's deputy found May's car just before 1 a.m. Friday in the Skeggs Point parking lot. Authorities do not suspect foul play but believe May could be lost or injured.

water tender 1223 is a eagle lake water tender in Lassen county it might be the eagle lake fire department or the Stones Benguard fire dept you are hearing.. Lassen and part of plumas county fire are dispatched from SCIFC out of susanville on 154.445 and on 151.250 CDF local.

Are you asking the list who is using CalFire Command 1? Or are you
answering someone else?
Nothing on Command 1 from Red Bluff for a few weeks here.

Tuolumne Calaveras Ranger Unit was using Cmd 1 earlier this afternoon for a Vegatation Fire in East Sonora.
Local Net was handling numerous Medical Calls.

I thought it depended on where you were as to who you might hear? Is that wrong?

I could swear I heard traffic from the Valley IC in Orinda on it earlier today.

Could have been Sonora since I live here, but I know I wasn't hearing Plumas. I never do from here, and definitely not Lassen.

Now I wish I had paid more attention.

Bonfire of sorts, perhaps an old travel trailer. Sawmill can see it; a type 3 engine is enroute to assist with access. Per Sawmill, a vehicle in the vicinity as well--it's pretty close to the tower.

Unknown as to what's really going on but I'm headed to bed early for a change. :)

14534. scanner question

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-21 01:05:57 UTC
From: Brian Verhalen
Topic: 14534 Message: 14534

I am looking for some suggestions on what scanner to recommend to my neighbor. He would like to listen to some of what is going on around us in Plumas County. Probably handheld would be the first choice.
I own both the Pro-96 & 2096 (along with a couple of older ones) but these are a lot more scanner than what he needs, wants or would like to pay for. Where we live trunking is not needed, conventional only.
I do travel, am in Reno & Marin (moved from Bay Area after retiring) regularly & like the better scanners & trunking.
Computer programing would be nice but not a big deal if it does not have that. I can program it for him with little effort. Not a long list of freqs here.

Thanks for any suggestions.

14535. Sheppard Incident - Mendocino County (Ukiah)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-21 01:41:59 UTC
From: Kim Noyes
Topic: 14535 Message: 14535

This fire is burning in the hills on the southwest margin of the Yokayo Valley in which the City of Ukiah is located....Kim Patrick Noyes

BREAKING NEWS: Fire burning in southwestern Ukiah By MONICA KRAUTH and CAROLE BRODSKY
Updated: 07/20/2009 05:39:01 PM PDT

Still under investigation, Monday¹s fire in the southwestern hills of Ukiah was up to 30 acres and continued to grow as of 4:30 p.m. While Mendocino County Sheriff¹s deputies said that there were no forced evacuations, they prohibited cars from going up Shepherd Lane from the Boonville Road and California Highway Patrol officers prevented people from going up Oak Knoll Road from South State Street.

³We don¹t want anyone to go up there,² said Sheriff¹s Deputy Mike McBridge.

According to Sheriff¹s Lt. Rusty Noe there were no structures that had burned, although a couple were threatened.

Cal Fire helicopters and planes dropped water on the spreading flames as wind picked up and smoke was seen throughout Ukiah and reportedly throughout Boonville during most of the late afternoon.

Meanwhile spectators stopped along South State Street to watch the smoke darken the sky.

Ukiah Valley Fire Department, Ukiah Fire Department, Little Lake Fire District, Anderson Valley Fire Department, Redwood Valley-Calpella Fire Department, Potter Valley Fire Department, Hopland Fire Department, the Mendocino County Sheriff¹s Department and CHP all reported to the scene.

From: Kim Noyes
Topic: 14543 Message: 14543

Question gang,
Are there any good live scanner feeds and/or webcams covering the area of this incident.
The Sierra Fire webcams show some drift smoke but not this incident it would appear.
A radio station in Sonora used to have their own scanner feed as did Wildlandfire.com but I cannot find either this year.
Can anybody help me?
In the meantime, the Hotlist is giving the most information of any source at present.

I'm hearing a lot of talk (as are 46 other people) at
http://www.radioreference.com/apps/audio/?ctid=187
and 50+ listening to
http://www.radioreference.com/apps/audio/?ctid=237

You can monitor both at once by selecting different players in their respective "Player Selection" drop-downs.

Harry

From: David Coursey
Topic: 14547 Message: 14548

Every unit has a three-letter designation. Every unit also has a dispatch center (ECC), generally referred to by its physical location.

For example:

The Santa Clara Unit is designated as SCU. The dispatch center for SCU is located at a place called Morgan Hill, south of San Jose. It is referred to as "Morgan Hill" on the radio. It's unit designation is 1600, so all units in the 1600 series are from SCU. The Chief is 1600 and the engine nearest my house is 1660. Difference number series within the 100 available are designated for specific purposes statewide. The unit chief is always XX00 while XX60 should always be an engine, I believe of a particular type.

I will send you some additional information privately.

14549. Re: [NorCalFire] New Guy Question

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-07-27 06:30:06 UTC
From: David Coursey
Topic: 14547 Message: 14549

To revise and extend my comments:

Each type of CDF responder has a radio call that begins with what the unit is/does, followed by a number.

For example, all Chiefs are called "Chief" followed by the two-digit unit number and then a number 00-99. Thus, Chief 1600, Battalion (Chief) 1616, Dozier Tender 1641, etc. The word describes what the unit is/does and is followed by a number.

It used to be that different types of apparatus were assigned specific numbers between XX00 and XX99. I believe this is still the case in most places--that all the Battalion Chiefs are XX11-XX19, for example, but there are probably places where a Battalion XX20 exists--which in SCU is the Prevention Chief, with the other Prevention staff starting at 1620 and running to 1629.

Listen to the description as well as the number to avoid confusion. In written form, the format is E1660, B1616, C1600, etc.

Hope this helps!

Question gang,
Are there any good live scanner feeds and/or webcams covering the area of this incident.
The Sierra Fire webcams show some drift smoke but not this incident it would appear.
A radio station in Sonora used to have their own scanner feed as did Wildlandfire. com but I cannot find either this year.
Can anybody help me?
In the meantime, the Hotlist is giving the most information of any source at present.

I'm hearing a lot of talk (as are 46 other people) at http://www.radioref erence.com/ apps/audio/ ?ctid=187
and 50+ listening to
http://www.radioref erence.com/ apps/audio/ ?ctid=237

You can monitor both at once by selecting different players in their respective "Player Selection" drop-downs.

Harry

Stanislaus National Forest > Knight Fire
Knight Fire
Incident InformationAnnouncementsClosuresNewsPhotographsMaps
INCIDENT UPDATED 8 MIN. AGO
Approximate Location
38.18 latitude, -120.254 longitude Map data ©2009 Tele Atlas - Terms of UseHybridTerrain
Incident Overview
Residents continue to return to the Mt. Knight Subdivision. A special one-way traffic plan has been established as firefighters utilize the same route. The public is being asked to stay out of fire area as safety is a major concern.

Fire crews are engaged in burn-out operations in an effort to keep this fire at bay. Firefighters are working day and night around the clock to knock this Knight off its horse! Acreage will increase daily as suppression efforts continue moving the fire both east and west along the river. Smoke can be seen from many outlying areas. Over one thousand firefighting personnel have traveled from near and far to assist the Stanislaus National Forest in the fire fight.

A new fire retardant base is being located near Murphys as large helicopters will aid firefighters from the air. Six air tankers and 15 helicopters are assisting in operations.

Forecasted fire weather conditions remain hot and dry with a continued high pressure over the region. Today, thunderstorms are forecasted to stay well east and are not expected to have any significant impacts over the fire area.

Agencies represented on the fire include United States Forest Service, Bureau of Land Management, National Park Service, Kern County, CAL FIRE, Tuolumne County Emergency Personnel, Tuolumne County Fire, and Tuolumne County Sheriff's Department, Office of Emergency Services.

Basic Information
Incident Type Wildfire
Cause Under
Investigation
Date of Origin Sunday July 26th, 2009 aprox 03:35 PM
Location Middle Fork Stanislaus River Canyon near Mt. Knight
Incident Commander Allen Johnson

Current Situation
Total Personnel 1,190
Size 2,374 acres
Percent Contained 10%
Fuels Involved Burning in timber and brush. Fuel Model 10

Fire Behavior Extreme fire behavior has been observed with some torching and spotting during the warmer afternoon hours. Fire continued to actively back down the slope in response to burning operations. Roll-out material continues to be a prime source of fire

movement. Fire continues to burn actively throughout the evenings.

Significant Events Residents contine to move back into the Mount Knight sub-division following the end of a voluntary evacuation.

Outlook
Planned Actions Today firefighters will continue burning operations stretching east and west along the south flank of the fire. Mop-up and line rehabilitation will resume as the fire cools along the south flank of the fire.

Growth Potential Extreme.

Terrain Difficulty Extreme. Fire is burning in steep, rugged terrain with difficult access for firefighters.

Remarks Conditions are extremely dry and forest fire restrictions are in effect for high hazard areas. Fire size is expected to increase as a result of burn-out operations. Contingency line construction nears completion north of the fire on the ridge above the Middle Fork of the Stanislaus River. Estimated Cost:$2,500,000 Injuries: 1 minor Resources: 26 Type I hand crews, 6 Type II hand crews, 15 Helicopters, 46 Engines, 13 Dozers, 19 Water Tenders, 149 Overhead personnel, 6 air tankers.

Current Weather
Wind Conditions 4 mph E
Temperature 65 degrees
Humidity 45%

14577. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-01 08:51:40 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14577

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

Incident InformationAnnouncementsClosuresNewsPhotographsMaps
ANNOUNCEMENT
Crandall Peak Staging & Sand Bar Flat Campground Inaccessible to Public
ATTENTION: Special Advisory for Knight Wildland Fire burning on the Stanislaus National Forest. (Mi-Wok Ranger District): Due to the complex fire suppression operations on the Knight Wildland Fire,... more

INCIDENT UPDATED 6 MIN. AGO
Approximate Location
38.18 latitude, -120.254 longitude Map data ©2009 Tele Atlas - Terms of UseHybridTerrain
Incident Overview
Fire crews are heavily engaged in suppression efforts on the Knight Fire, which is currently the largest uncontained wildland fire in California. Firefighters are battling the fire around the clock, using burn-out operations along containment lines to throw up a shield between the fire and unburned fuels. Under the banners of several agencies, the men and women on the fire line are mounting a strong attack and gaining ground. Acreage will continue to increase daily as the burn-out operations continue moving the fire both east and west along the Middle Fork of the Stanislaus River.

Several roads and recreation areas, including Crandall Peak Staging Area, Sand Bar Flat Campground, Forest Road 4N14 west off of Beardsley Rd., 4N01 at Fraser Flats, and the southwest end of 4N16 (Italian Bar Rd.) will be inaccessible to the public due to the high number of fire personnel and the operations they are carrying out in those areas. Only authorized personnel will be allowed to pass through Spring Gap. These areas are clearly marked with cautionary signs.

Slightly lower temperatures and higher humidity levels will continue to provide favorable weather for continued burn-out operations today. Heavy smoke will continue to impact many outlying areas, including those as far away as the Sonora Pass.

Agencies represented on the fire include United States Forest Service, Bureau of Land Management, National Park Service, Kern County, CAL FIRE, Tuolumne County Emergency Personnel, Tuolumne County Fire, and Tuolumne County Sheriff's Department, Office of Emergency Services.

Basic Information
Incident Type Wildfire
Cause Under
Investigation
Date of Origin Sunday July 26th, 2009 aprox 03:35 PM
Location Middle Fork Stanislaus River Canyon near Mt. Knight
Incident Commander Allen Johnson

Current Situation
Total Personnel 1,295
Size 2,734 acres
Percent Contained 25%
Fuels Involved Burning in timber and brush. Fuel Model 10

Fire Behavior Fire continues to slowly back down the slope in response to burning operations. Roll-out material continues to be a prime source of fire movement.

Significant Events Firing operations continue to be quite effective as the fire slowly progresses east along the south flank.

Outlook
Planned Actions Tonight burning operations must be continued. Fire operations are expected to reach down the east flank of the fire near Shotgun to the Middle Fork by mid shift tonight. Excellent progress holds the Knight to a lower rate of spread beneath the canopy. Mop-up and line rehab continue as fire cools along the south flank.

Growth Potential Extreme.

Terrain Difficulty Extreme. Fire is burning in intensely steep, rugged terrain with difficult access for firefighters.

Remarks Firefighters concentrate on completing black line to the river on the east flank. Contingency line construction nears completion. The weather is expected to assist firefighters complete the firing operation on the east flank.

Current Weather
Wind Conditions 20 mph SW
Temperature 84-94 degrees
Humidity 18-30%

==========

Hello brad,

No new fire in Calaveras County,as of yet !!

The Web Cam is at Bald Mtn Heliport,off of Hwy 108 in Eastern Tuolumne County.

The camera is currently out of service,the FS Techs are to busy at the Knight Fire to fix it.\

Rgds,

Jerry T.

Jordan Hill incident is within a previous burn and one engine is going to handle it but it will take a couple of hours.

Stirling City incident still has not been located but they are hunting for it.

Having trouble with aircraft as AA210 that is usually stationed at Chico Air Attack Base is at Mather for maintenance. Several air resources on order. No ETA on fulfillment.

14596. Knight Fire-update

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-02 17:49:51 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14596 Message: 14596

South Central Sierra Interagency Incident Management Team - Incident Commander Allen Johnson

Wildland Fire Update - Sunday, August 2, 2009 @ 8 a.m.
Knight Wildland Fire – Stanislaus National Forest
30 % Containment

Started: Sunday, July 26, 2009 @ 3:35 pm Cause: Under Investigation
Location: 10 miles North of Twain Harte Acres: 4,050
Estimated Containment: 30% Estimated Control: unknown
Estimated Costs: $5,700,000 Injuries: 3 Fuels: Burning in heavy timber/brush
Committed Resources: 1,360 personnel Fire Potential: Extreme
Personnel: 30 Type I hand crews, 6 Type II hand crews, 10 Helicopters, 4 Air Tankers, 62 Engines, 13 Dozers, 25 Water Tenders, 167 Overhead

Major issues: Steep, rocky inaccessible terrain, extreme fire behavior, active burning throughout night.

Significant events: Fire crews continue to be heavily engaged in suppression efforts on the Knight Fire, located approximately 10 miles north of Twain Harte. Firefighters are conducting burn-out operations along containment lines to solidify them and hold the fire at bay. Cooler temperatures and higher humidity levels have allowed firefighters to make good progress with their efforts. Acreage will continue to increase as the burn-out operations continue moving the fire to the west along the Middle Fork of the Stanislaus River. Mop-up and rehabilitation of control lines continue at the east end of the fire. Contingency line construction is nearing completion for the entire fire.

Several roads and recreation areas, including Crandall Peak Staging Area, Sand Bar Flat Campground, Forest Road 4N14 west off of Beardsley Rd., 4N01 at Fraser Flats, and the southwest end of 4N16 (Italian Bar Rd.) will be closed to the public due to the high number of fire personnel and the operations they are carrying out in those areas. Only authorized personnel will be allowed to pass through Spring Gap. These areas are clearly marked with cautionary signs.

Heavy smoke will continue to impact many outlying areas, including those as far away as the Sonora Pass and Angels Camp.

Agencies represented on the fire include United States Forest Service, Bureau of Land Management, National Park Service, Kern County, CAL FIRE, Tuolumne County Emergency Personnel, Tuolumne County Fire, and Tuolumne County Sheriff's Department, Office of Emergency Services.

Pam,

As a security measure, somewhat less *effective* but dramatically less expensive than encryption, many agencies are beginning to add "mumblers" to their radios. They're located about 3" forward of the microphone.

And, easier to "talk the fire out" if folks can sneak up on it quietly.

Yep, there are a few mblrs out there. Worse, though, and seriously, was a rookie policeman at LAPD who apparently had no history whatsoever of it, but the first time he came on the radio to say "3A58 PM watch clear" he stuttered so badly that he just couldn't get the sentence out and his partner had to say it. It continued through the evening and was a definite critical problem.

Long story kinda short, among other efforts w/the dept psychologist and whoever else, they brought him into the dispatch center for a few days to see what/who was on the other end of the radio. Didn't help a lot. Back on the street one night he came on the radio, and the dispatcher keyed in right away to the tension in his voice as he said, "Thh-Thhh-rrr-rreee--Ayyy-Ayyyyy.........." She was very on the ball and asked "Is this 3A58? Tell me YES or NO.." ""Thhh... YES" then, "3A58 do you need HELP, yes or no?" "YES!" Luckily she knew their location and sent them help (same as 11-99). I don't know if his radio issue was resolved or what ever happened with the poor guy.

Thanks everyone... I'm in Red Bluff and don't watch TV. I did see a lot of lightening to the North and East but hadn't seen anything mentioned here so assumed that nothing was going. Guess I'd better dig out the old scanner after all and re-program to local agencies.

Thanks again,
Dana

All the SHU lightning fires...
151.160 SHU Local Net (priority 2 on live scanner)
151.355 Command 1 (slightly degraded signal - multipath)
151.175 Command 9 (priority 4 on live scanner)

unknown air tactics, but I've got all the standards in the scanner.
Sounds like this evening I had the tankers, was out of town all weekend.
Hopefully they don't pull an odd ball for Monday's comm plan.

Most of the traffic I've been hearing the past two days appears to be dealing with a fire up around Eagle Lake area, which I'm guessing is the Eagle Lake north of Susanville. What's odd is that I'm for the first time hearing anything on Command 1 from up here in eastern Plumas county. What's even more odd is that I'm only hearing it on one scanner hooked up to a RS funky looking antenna that I picked up on clearance for $10 last year. It's hooked up to an older Uniden MR8100 that I use mostly for local Plumas county stuff. Just happened to have some CDF and USFS freqs programmed in from back in the days when I lived down in the valley...

All the other radios and antennae combination don't pick it up.

I'm even having a hard time hearing Plumas working the fire up around the Milford area on 170.550 today.

BUT, six meters has been hot! (Sorry fer that OT bit there) ;-)

Go figure...

Later,
Todd

14609. Shasta freqs and air attack

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-03 23:51:50 UTC
From: Jake H
Topic: 14609 Message: 14609

It appears the relief air attack over Cassel fire is AA110. Sugarloaf AA is AA210 now and working with Lead 55. Sugarloaf AA working Air Tactics 1 166.675, with LNF Forest Net 172.225 as command. Air tactics covered on scancal.org live scanner.

Main fire of Sugarloaf is still 2 hours from Hwy 89, however strong winds are laying the column down and they are scared of spotting. Any more wind shift from the west and it will be ugly structure protection into Old Station.

3 additional type 1 tankers just requested by Sugarloaf for a total of 6 tankers. The 3 over the incident are on no-divert due to structure protection.

Hey Todd - I'm surprised I was hearing that Command 1 traffic from down here in Red Bluff. LMU kept saying Cmd1 Tone 1, which is Shaffer Mtn NE of Susanville! It was very multi-pathy and scratchy but readable if you're patient with the static. I'm hating this skip and ducting happening right now because it makes listening to calfire near impossible with a decent antenna. Distant local nets start walking over nearby tactical and command nets. Gah!

I"ve been off list for awhile. Hello to all,

What is going on up on the Modoc after the lightening last Saturday and Sunday?

I heard a lot of copters heading up to "Modoc": but never did get the details.
Maybe it was my imagination.

Sure a lot better air around here than last summer eh?? We were smoked in in Chico for 65 days or so. Man, sure is a nice change!

14617. Weather Underground fire maps?

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-04 21:46:18 UTC
From: nitrobear@comcast.net
Topic: 14617 Message: 14617

I have my personal weather station on line at the Weather Underground site. After all the fires last year in northern Cal i discovered a neat feature...key word is "after". I was really struggling trying to locate all the fires and had Iknown about this feature it would have sure made my life easier.

Weather Underground has a feature called Wundermaps. If you go to that site and say search for Chico in the search box on the upper right, it takes you to Chico and shows you a bunch of stuff. The features can be enabled/disabled below the main map display. One of the features is fire. Click on that and save your choices as default. so they will load every time you go there. Everytime you want to see where a fire is located, at least one that the satellite can detect just scroll around the map and look for the fire icon. it will also show you the smoke plumes from the fires.

If you all are aware of this, apologies for the bandwidth. Here is a link to the wundermaps page. http://www.wunderground.com/wundermap/ ? You will have to zoom into a location of interest probably as the link will take you to a default location i think.

If you go up to the area around Lassen Park you will see the fires up around Old Station. if you zoom in there are several and it looks like there is one south of Cinder Cone in Lassen Park.. I guess this is the complex of fires in Eastern Shasta County that the media is reporting..

If you have a question, drop me a note and I'll try to help you get it going.. It is a pretty neat way to get some idea of where the fires are located rather than a section and range.

From: Craig Carter
Topic: 14617 Message: 14618

As a follow to the information below, Lassen Volcanic National Park posted the following information on their web site:

Current Activity-August 4, 2009

Park fire crews with the assistance of fire crews from Pt. Reyes National Seashore and Rocky Mountain National Park are actively managing two wildland fires for the benefit of natural resources. These two fires were detected after a significant lightning storm came through the area on Sunday, August 2, 2009.

The Fairfield Fire located on the northeast side of Fairfield Peak is approximately five acres. This fire has moderate potential for growth. Fire managers have identified a planning area which includes a maximum size of approximately 1,000 acres. The Sunflower Fire located southeast of Sunflower Flat in a rocky ridge of large boulders has little potential for growth and is currently 2/10 of an acre.

The Kelly Fire has been declared out. Fire crews continue to monitor and patrol the Crescent Prescribed Fire

Craig

BTW, the Underground site is a great resource for lots of weather related information, almost information overload once you start looking.

LO shot, possibly in area of old Jordan fire.

Full wildland callout including air support. Continue air tac and chopper, cancel tankers. Have first two engines continue with one dozer, one water tender, cancel rest. Didn't hear the sizeup.

30x30 spot within the control lines from the last fire in the area. T93 made full drop and returned to Chico empty. Copter 205 is hooking up his bucket and will finish it off.

James Robertson wrote:
> where can we listen to a live feed?

When I lived in Burney the owners of the Maahcooatche Store in Hat Creek lived down the street from me, and they always has a scanner running at the store (and at home). I'll try to get in touch with them and see what they can/will do. Don't hold your breath for them.

One problem with the Hat Creek basin is that it really IS a "basin" - so much so that that's why they built the Hat Creek Radio Observatory there. http://www.hcro.org/history.html

Other than mountainop repeaters and relatively high flying aircraft, radio signals in and out of the basin are *really* hard to come by. As in dead. This is the area at Hat Creek and south. For the stuff up north of 299 toward Burney Falls it's not so bad. Remote, but not in such a bowl.

If I have any luck I'll post it. Is Jake's feed up? http://norcalscan.org/live.html I'm traveling and on dial-up so pretty much out of luck, and he's probably covering the Shasta-T fires more easily, but I'd give it a shot.

Harry

Was looking for some other info going on here today in Plumas
county and thought I'd check out the "breaking news" for today.
Didn't find what I was looking for but, there are a couple of nice
pics up from the past couple of days for the Hat Creek fires.
Nice shot of an air tanker 94 taking off from the air base up
at Chester.

Hadn't been keeping up on what's happening up here lately
(been working too much) so don't know if this was posted
already - if so - oh well!

Here's the link:
http://plumasnews.com/

Scroll down half way through and there's a photo of another fire
that was down in the Spanish Springs area which sadly took the
house with it...

Just below that is a story of a fatal accident up at Lassen NP which
I don't recall hearing about either...

Found another site with photos of some fire fighting going on up
in BC, Canada which looked pretty intense. If enough interest
will post later....

73, Todd KH2TJ/6

Hi all. Additional scanner on it's way. Any preference between these two feeds?

Tehama/Glenn Unit - CalFire and possibly Red Bluff and Corning Fire.

or

Shasta/Trinity Unit CalFire and possibly Redding fire.

Eventually I will add two more scanners, but One of these can be next in line and any suggestions as to which one would be more preferable would be great. Yeah, I know, not very scientific. Closest is Tehama / Glenn, so it is probably the logical choice.

Thanks,

jim P

I use Radio reference and love it.

Here is a direct link to butte county in their database

http://www.radioreference.com/apps/db/?ctid=186

And here is there main database in case you need to look up somewhere else.

http://www.radioreference.com/apps/db/

Good Luck

John

You have to keep in mind that some of the information on Radio Reference has not been updated for sometime. For example, Yuba county freq's including the fire freq for Beale is out dated.

I still think it's one of the best sites to find something without searching the internet hoping to find something. They also just merged with Scan America and they also list if there is a local online scanner in that area.

You can use the site for free and don't need a account to see lists. You only need to use a pay account if you want to use their database tools to help search for FCC info etc..

Yes it is going to be updated more with great new stuff well for butte county at least. I have a lot of stuff like I stated before but I need to dig more at the channels before I post them. My log right now has about 300 channels found with 5000 hits between them. So a lot of work tracing FCC tags etc.. I just added two more scanners to complete my uniden 780 785 796 collection. I also have two antenna's going into two trees with rotors to expand my searching. So if I find anything in Yuba I will post them :)

Well I'll be selfish and vote for Tehama/Glenn because I live in Red Bluff and my ancient desktop 100 channel scanner doesn't seem to pick up much out here where I live. (It worked great 20 yrs. ago when I lived in Riverside Co.!!)

Subject: [NorCalFire] Which NorCal county feed to add next?

Hi all. Additional scanner on it's way. Any preference between these two feeds?

Tehama/Glenn Unit - CalFire and possibly Red Bluff and Corning Fire.

or

Shasta/Trinity Unit CalFire and possibly Redding fire.

Eventually I will add two more scanners, but One of these can be next in line and any suggestions as to which one would be more preferable would be great. Yeah, I know, not very scientific. Closest is Tehama / Glenn, so it is probably the logical choice.

Thanks,

jim P

Well I'll be selfish and vote for Tehama/Glenn because I live in Red Bluff and my ancient desktop 100 channel scanner doesn't seem to pick up much out here where I live. (It worked great 20 yrs. ago when I lived in Riverside Co.!!)

My apologies to you all.
typo on that one.
If you need any frequencies for the surrounding area please let me know, I
have the majority of them with a subscription to radio reference.

Johnny

453.750 is Chico fire, not .780
458.750 would be the input

butte county freqs can be found at
http://www.thenet41 1.net/index. php/freqs
and http://www.scancal. org/co/butte/ index.html

It's my understanding you're near Bloomer Mtn? Have you considered Sutter/Yuba/Yolo/Colusa/Glenn counties? I ask since TGU and SHU is already covered by scancal.org and redding.com for the past 4+ years. I hate to see resources wasted and doubled for nothing, when we have huge gaps in live coverage of some parts of our valley still. All the demands for TGU surprise me since scancal.org (was norcalscan.org) has had TGU on priority 1 ever since it started.

14672. BUTTE: Granite Hill x Jordan Hill (Concow)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-12 16:26:02 UTC
From: Pamela Alley
Topic: 14672 Message: 14672

Fire type unknown, full wildland callout.
Sawmill has a sighting on heavy dark smoke/possible structure. Multiple reports.

(Side note: I was just up there this last week with a friend and we were cringing about the fuel situation as a whole--lots of snags on very steep hills with plenty of brush, very narrow roads...Be careful up there, folks..!)

Date: 2009-08-12 16:34:39 UTC
From: Pamela Alley
Topic: 14673 Message: 14673

Per AirTac:
Some sort of structure/vehicle fire, not a lot of wildland. Burning in understory on east side, moving along.

Refinement of location: Granite Ridge Road x Madre del Oro Place

14674. UPDATE 2 BUTTE: Granite Hill x Jordan Hill (Concow)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-12 16:47:18 UTC
From: Pamela Alley
Topic: 14674 Message: 14674

About five cars off of Los Amigos x Granite Ridge, fully involved, minor wildland extension. (Unit said that it was just BEFORE Madre del Oro, which would make it Lost Ridge per my map..??)

Anyway, nothing more unless things get too hot.

From: Jake H
Topic: 14682 Message: 14682

Lewiston is getting hit hard and fast.
Coffin fire started about 230pm. Last sizeup was 65 acres at 3:40pm. The column is already capping out and can be seen from Redding/Red Bluff. Amazing column in a crystal blue sky. No camera today!

scancal.org live scanner has it all
151.160 SHU Local (pri 2)
151.265 Coffin Command (pri 3)

400+ acres now, structure protection immediate need strike teams. Fire going right towards the old 1999 Lewiston Burn (the BLM control burn that got out of control). Setting up for structure protection based on that '99 game plan.

> burn that got out of control). Setting up for structure protection
> based on that '99 game plan.

Not really the "game plan" but more like a post mortem of the 1999
Lowden burn, as archived on the "Wayback Machine":
http://web.archive.org/web/20041208122659/shirtmagic.com/Lowdenfire.html

They have earlier and later versions of that page, but this one seems to
have almost every link still intact.

I was going to wonder how much was there to be burned, as it seems a lot
more recent than 10 years ago.

Harry

There are two different fires.....Durham Incident which is small and inaccessible in the Sky Londa area of San Mateo Co. up in the mountains and the Lockheed Incident which is very large and active and is threatening Bonny Doon and Davenport in Santa Cruz Co....I'm surprised Bayscan is quiet about this.

Dispatch is on CZU Local aka Command 5/ Tac 8 151.37 MHz.

The incident is on the other side of the Bonny Doon ridgeline from me so
I have almost no tactical traffic here. Some traffic on Tac 10 151.40 MHz.

Some fire-related sheriff office traffic on county-wide red 154.95 MHz

Local ARES has a resource net on the W6WLS repeater 147.180 MHz.
Equine evac has been activated and is staging at the cement plant in
Davenport. Animals to be transported to Santa Cruz County Fairgrounds if
necessary.

You can listen in to all the action live bu going here:
http://www.radioreference.com/apps/audio/?ctid=226

You will find three feeds here.
Two in Santa Cruz and mine from San Mateo.

You may need to listen to all three to get all the action.
You can set up Winamp to listen to multiple instances buy going here:
http://forums.radioreference.com/streaming-broadcasting-audio-recording/150916-winamp-suggested-settings.html
Or you can open each stream via a different player.

The SCZCo Hams are active now

Thank You

Remember, guys, the online info *always* lags behind the real-time conditions, so it shouldn't be relied on as a current snapshot of conditions or resources. Just as what you hear on the scannner is but a myopic view of the big picture.

Ben Kellogg wrote:
> There's only 15 rigs on a 2300 acre fire?? Is everyone up at the fire
> in SHU?

Don't overlook the last line, "Conditions: Significant resources have been ordered for this incident."

As of 0700 the Coffin Fire in SHU has 52 Engines, 25 handcrews, 3 Tankers, 2 Helos, 17 Dosers and 6 WTs. Likewise the La Brea fire, at last rport, had 89 engines, 57 handcrews, 28 Dozers, and 10 helos, but still with both growth potential and terrain difficulty listed as "extreme."

It may be a tad early for such resource demands around the state, but certainly not unprecedented.

Harry

Hi Rick - you got it. That's also the fire you saw yesterday burning midslope up in the Snow Mtn Wilderness area near Summit Springs. If you squinted, you could have probably seen the Coffin column around 4pm when it was at its mightiest, capping out. But that would have been far more north than west from your viewpoint. The west winds quickly sheared the cap off by 5 though.

14714. Re: MNF - Summit Fire (was Re: [NorCalFire] question... New Fire?)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-13 17:14:48 UTC
From: kb6bhb@comcast.net
Topic: 14711 Message: 14714

kinda noticed it when I came over from Lake Berriessa late afternoon, but wasn't sure where it was coming from due to the haze. This morning was a bit clearer especially without the sun in yer eyes :)
Didnt hear much traffic from the fire and the webcam from Williams airport doesnt seem much different than last nite.

Subject: MNF - Summit Fire (was Re: [NorCalFire] question... New Fire?)

Hi Rick - you got it. That's also the fire you saw yesterday burning midslope up in the Snow Mtn Wilderness area near Summit Springs. If you squinted, you could have probably seen the Coffin column around 4pm when it was at its mightiest, capping out. But that would have been far more north than west from your viewpoint. The west winds quickly sheared the cap off by 5 though.

That is the Summit Incident on the Mendocino National Forest west of Stoneyford and is at 120 acres with no containment.

14717. BUTTE: Natural gas leak prompts hundreds to evacuate

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-13 17:28:27 UTC
From: Butte County Public Safety Scanner
Topic: 14717 Message: 14717

I know this is not a fire and I hope it does not become one but here is the latest:

Residents in a broad swath of land around East Eighth Street, adjacent to Bidwell Park, are being evacuated because of a major natural gas leak that was reported just before 8 a.m. today.

Evacuations are taking place east along East Eighth Street from El Monte Avenue to Ashford Way, and from about halfway between El Monte and Highway 32, and east into areas including parts of the Nob Hill subdivision.

The gas leak, which according to fire officials comes from a high-pressure cast iron pipe that's four inches in diameter, happened when construction workers on East Eighth east of El Monte reportedly ruptured the line.

As a result of the leak, East Eighth is closed from Forest Avenue east, and South Park Drive has been closed for its entire length. Adjacent side streets in the vicinity are also closed.

Authorities say it will take two to four hours to shut off the gas leak, and up to 12 hours to re-establish gas service in the area.

Story appears on the Chico Enterprise-Record website:
http://www.chicoer.com/news/ci_13052777

14719. SUBJECT LINES

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-13 17:38:12 UTC
From: Harry Marnell
Topic: 14719 Message: 14719

This tends to happen every year, so a reminder to watch the subject lines on your fire posts. "New" fire, I suppose, is OK initially, as long as you also include a location, but once an incident is named, please update the subject line with the fire's name.

Go back through both the SoCal and NorCal fire archives and I'll bet you can find a thousand posts about a "new" fire.

It helps keep things easier to track during the "heat" of the moment, and *much* easier to find an old message in the archives later on.

Just my 2?

Harry

BTU 2170 is hunting for a fire off of La Porte Road. PNF is sending a full response as well. I don't think they have determined if it's PNF or BTU yet but earlier traffic suggests that it was in the PNF. We'll find out soon enough.

I just talked to the PIO about this. There were two smoke checks last night and one was a false alarm (I think it was a BBQ in Chico) and the smoke check must have been in the PNF because there are no incidents in BTU right now.

Subject: RE: [NorCalFire] BTU/Plumas PNF Fire?

I just talked to the PIO about this. There were two smoke checks last night
and one was a false alarm (I think it was a BBQ in Chico) and the smoke
check must have been in the PNF because there are no incidents in BTU right
now.

Subject: RE: [NorCalFire] BTU/Plumas PNF Fire?

BTU 2170 is hunting for a fire off of La Porte Road. PNF is sending a full response as well. I don't think they have determined if it's PNF or BTU yet but earlier traffic suggests that it was in the PNF. We'll find out soon enough.

Two fires. One at 100 acres, the other is 30 - 40 acres.

BTU 2170 is hunting for a fire off of La Porte Road. PNF is sending a full response as well. I don't think they have determined if it's PNF or BTU yet but earlier traffic suggests that it was in the PNF. We'll find out soon enough.

From: Harry Marnell
Topic: 14755 Message: 14755

Apparently they *did* get it "knocked down quick" as Blue IC cancelled
the strike team about 30 seconds after Fortuna Command Center finished
with their response checkbacks. The two crews still enroute, along with
Arcata (on scene)

I just talked to the PIO about this. There were two smoke checks last night and one was a false alarm (I think it was a BBQ in Chico) and the smoke check must have been in the PNF because there are no incidents in BTU right now.

BTU 2170 is hunting for a fire off of La Porte Road. PNF is sending a full response as well. I don't think they have determined if it's PNF or BTU yet but earlier traffic suggests that it was in the PNF. We'll find out soon enough.

Took this pic of the Yuba Fir abou 30 minutes ago. I pointed an 11 element Yagi at the fire, so the aircraft communications are coming in well.

Picture is at http://www.bunkerhillmine.com/Yuba_fire_1.jpg

Technically for Cal Fire the ECC Duty Captain is the IC until a unit is on scene.

Subject: [NorCalFire] Re: [RadioHum] Re: Humboldt Veg Fire "Blue IC" - update 1655

Question: If nobody is still there, is it still an IC?

Everyone abandoned the laying-down Blue IC fire about 1535 hrs to respond to
a major TC (Chezem IC) on 299 about 19 miles up from 101, near Lord Ellis
summit. http://cad.chp.ca.gov/iiqr.asp?Center=RDCC&LogNumber=0263D0814 One
camp crew was requested to continue in and finish the line on the back side
of the fire, and the other was diverted to the TC.

They've now released a BLU engine and another unit to return to the fire to
get the lat/long and acreage.

There was a report that (i believe it was) KCRA 3 News had some video of
that to be aired on last nights news. Might check their site.

14771. Re: [NorCalFire] NEU fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-15 22:43:34 UTC
From: keestrokes@cox.net
Topic: 9226 Message: 14771

The DC-10's belong to 10 Carrier and the 747 belongs to Evergreen. None belong to CALFIRE or federal wildland agency. They "rent" them during high fire conditions...

Google their web sites for additional information......

From: Rick
Topic: 9226 Message: 14773

Seems it's spotted over the lines and Branch is asking for additional resources("full brush response") for the south side of Colgate power house. Putting up the same size smoke colume with pyrocum cloud as yesterday. Structures threatened again per Air tac

14785. HWY 70, 2 fires near Tobin

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-16 22:39:38 UTC
From: nitrobear@comcast.net
Topic: 14785 Message: 14785

There are two fires up in the Feather River Canyon apparently. The largest is the "Elephant" fire and is the furthest east of the two. The more westerly is in the Tobin area. Elephant Air Tac has put two drops on the head of the Elephant fire trying to tie into a large rock face in very steep terrain apparently near Elephant Butte.

Air tac 210 is talking to Tobin IC on 170.000 MHz and she is in and out. There are structures on the northern flank which are priority one.. Additional tankers on order along with additional engines. Original dispatch was 3 engines but i think more are on scene or on the way.

From: nitrobear@comcast.net
Topic: 14785 Message: 14787

I forgot to mention they were closing HWY 70. Sounds like tanker chatter on 122.925 MHz, air to air. Lassen NF moving some assets over to cover Greenville . Mendocino jumpers being considered because of no access. Mendo cino Copter 512 on way to Tobin

Airtac 170.000

Tobin air to air 122.925

Elephant air to air 169.150

14790. Yuba fire - air freqs

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-16 23:18:11 UTC
From: Jake H
Topic: 14790 Message: 14790

Wow - either these planes are high, or conditions are great. I'm getting the air attack transition traffic over the Yuba on 122.925 talking about all the divisions etc. Giving out freqs too. So 126.075 is Helco. VTac13 seems to be air to air VHF 158.7375. Get those in those live scanners down there!

Nitro, that traffic you were hearing on 122.925 was Yuba traffic, not Tobin/PNF traffic.

;)

14798. Re: [NorCalFire] Yuba fire - air freqs

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-17 00:54:06 UTC
From: nitrobear@comcast.net
Topic: 14790 Message: 14798

I think i have a ttheory on the frequency discrepencn...ATac 210 has just landed CIC, timed out.

I heard her talking to tankers and tankers talking to tankers. I heard tankers confused about the two Tobin fires and she was talking to them.

I suspect, since she has timed out, that she has been on the Yuba fire today and was dirverted to the Elephant/Tobin incidents. They probably were debating diversions up to Tobin about the time i tuned in and I suspect they could see two smoke colums from the Yuba, in fact I'm sure they could at any altitude above the inversion.

Betore AT 210 landed at CIC, she was talking with tankers on 122.925 so we probably had a bit of a mixed bag of freqs. Best guess from NW Chico. My wife accuses me of having a fire scanner in my head sometimes but i don't so i have to guess on this.

I still haven't received an update and not sure who AT 210 handed the operations to. I'm hearing traffic on 170.000 again, off and on.

14800. Re: [NorCalFire] Tobin Fire Updates...

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-17 01:31:19 UTC
From: nitrobear@comcast.net
Topic: 14788 Message: 14800

That is good news as the AT first thought Elephant was "25 acres" with rapid spread. In that steep country it's really hard to estimate. It's darn near vertical in that area. AT is saying that they are "pounding it with retardant where we can get to it". To me, that says STEEP and probably turbulent !

His comments make me think it is east of the second tunnel heading east up the canyon and on the south side of the canyon..

14801. Listening to the PNF

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-17 01:50:05 UTC
From: Jake H
Topic: 14801 Message: 14801

For those in the valley that can't quite hear 170.550 Plumas Forest Net for the Tobin and Elephant fires, you have a gift from a mis-guided repeater on the MNF. Something on what appears to be St. John Mountain (MNF Service Net?) is picking up 170.550 and rebroadcasting it on 172.400 loud and clear. It's been happening at least for the past year. It isn't official, it isn't supposed to happen, it goes against every radio plan I have that 172.400 is outputting something (and listening to anything near 170.550), but it's happening and making scanning these fires easy. :)

If you're an MNF radio tech, you owe us all a 6-pack if you fix this and take it away. ;)

Subject: Re: [NorCalFire] Tobin Fire Updates...

That is good news as the AT first thought Elephant was "25 acres" with rapid spread. In that steep country it's really hard to estimate. It's darn near vertical in that area. AT is saying that they are "pounding it with retardant where we can get to it". To me, that says STEEP and probably turbulent !

His comments make me think it is east of the second tunnel heading east up the canyon and on the south side of the canyon..

14806. Elaphant update

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-17 16:06:44 UTC
From: nitrobear@comcast.net
Topic: 14806 Message: 14806

From InciWe, posted Monday 0804.. Nice Google map on the InciWeb page showing the Elephant and Tobin fire locations.

The Elephant fire is burning in the Feather River Canyon, near the Elephant Butte Tunnel east of CA Highway 70. Burning in a very steep, rocky inaccessible area, the blaze is approximately 150 acres. Firefighters are being supported by helicopters and airtankers during daylight hours. As of 7:00 am, Monday August 17, Highway 70 is closed from the Highway 70/89 "Wye" in Plumas County to Jarbo Gap in Butte County. Motorists should check highway conditions for current information at 1-800-427-7623 or www.ca.dot.gov . There are no structures threatened. The cause of the fire is under investigation.

Basic Information

Incident Type Wildfire
Cause Under Investigation
Date of Origin Sunday August 16th, 2009 approx 02:35 PM
Location Feather River Canyon-Elephant Butte Tunnel
Incident Commander Rich Simon Current Situation

Total Personnel 200
Size 150 acres
Fuels Involved

Oak woodland, brush and timber
Fire Behavior

Fire is burning with low to mod rate of spread with occasional flare-ups, especially during afternoon burn periods.
Significant Events

A Type 2 Firefighting Team has been ordered to manage the fire. Having a self contained fire team allows Forest resources to be available for potential events in other areas on the Forest. Outlook

Planned Actions

Helicopters and airtankers are assisting firefighters on the ground during daylight hours.
Terrain Difficulty

Fire is burning in extremely rocky and inaccessible terrain east of Highway 70 near Grizzly Creek.
Remarks

There are no structures near the fire. As of 7:00 am, Monday August 17, CA Highway 70 is closed from Jarbo Gap in Butte County to the 70/89 Wye in Plumas County. Motorists should check highway information at 1-800-427-7623 or www.ca.dot.gov for current conditions.
Current Weather

Wind Conditions 4 mph SW

14807. HUU or SRF fire - "Dowd" or "Dow" IC?

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-18 15:39:40 UTC
From: Harry Marnell
Topic: 14807 Message: 14807

Anybody been listening to CalFire in Humboldt this morning? I just got up to hear them discussing a fire that's "holding at about two acres" and a copter and hand crew are now onscene. Sounds like "Dowd" IC, but I have nothing else on it yet, though it's not sounding like a major event. Nothing online about it, of course.

I'm near the Dow's Prairie area of McKinleyville, and the radio traffic is too distant for it to be around here.

Harry

14808. Re: [NorCalFire] Yuba fire - air freqs

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-18 17:14:31 UTC
From: James Robertson
Topic: 14790 Message: 14808

Anyone know where to find a live feed for the Yuba Fire?

From: "nitrobear@..." <nitrobear@...>
To: norcalfire@yahoogroups.com
Sent: Sunday, August 16, 2009 5:54:06 PM
Subject: Re: [NorCalFire] Yuba fire - air freqs

I think i have a ttheory on the frequency discrepencn. ..ATac 210 has just landed CIC, timed out.

I heard her talking to tankers and tankers talking to tankers. I heard tankers confused about the two Tobin fires and she was talking to them.

I suspect, since she has timed out, that she has been on the Yuba fire today and was dirverted to the Elephant/Tobin incidents. They probably were debating diversions up to Tobin about the time i tuned in and I suspect they could see two smoke colums from the Yuba, in fact I'm sure they could at any altitude above the inversion.

Betore AT 210 landed at CIC, she was talking with tankers on 122.925 so we probably had a bit of a mixed bag of freqs. Best guess from NW Chico. My wife accuses me of having a fire scanner in my head sometimes but i don't so i have to guess on this.

I still haven't received an update and not sure who AT 210 handed the operations to. I'm hearing traffic on 170.000 again, off and on.

Subject: [NorCalFire] Yuba fire - air freqs

Wow - either these planes are high, or conditions are great. I'm getting
the air attack transition traffic over the Yuba on 122.925 talking about
all the divisions etc. Giving out freqs too. So 126.075 is Helco. VTac13
seems to be air to air VHF 158.7375. Get those in those live scanners
down there!

Nitro, that traffic you were hearing on 122.925 was Yuba traffic, not
Tobin/PNF traffic.

;)

14809. PET vegetation fire - Chambers IC (or now "Petrolia" IC?)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-18 18:42:03 UTC
From: Harry Marnell
Topic: 14809 Message: 14809

Vegetation fire 2 acres, size-up is moderate ROS in heavy brush, slightly difficult access - requires 4WD + parking extremely limited, with moderate west wind coming up.

PET and BGF E5436, HUU E1260 and Air attack onscene, full brush assignment + 2 tankers , Bundy dozer, requested; IC now requesting HDV engines (11:33 am)

Behind 631 Chambers Rd x Hwy 211 http://tinyurl.com/pu6nkr

Command 151.25
CDF Tac 3 - 151.175
Scanner feed:
http://www.radioreference.com/apps/audio/?ctid=194 - somewhat distant, so my simplex reception is non existent

I have added Yolo and Glenn Fire / EMS to the Butte Feed.

Frequencies scanned now include:
BUTTE COUNTY:
151.4000 Butte ECC
151.4150 Butte Support
154.1900 Fire Tactical
154.3100 Gridley/Biggs
153.8150 Oroville City Command
153.8900 Oroville TAC - 1
156.1200 Oroville TAC - 2
153.9500 Paradise Fire
154.4300 Paradise TAC

GLENN COUNTY:
0154.4000 Glenn County Fire
0154.3400 Orland Fire
0156.1800 Willows Fire
0159.0150 Willows Fire TAC
0151.3700 Tehama CDF (dispatches for North Glenn County)

YOLO COUNTY:
154.4450 Yolo Dispatch
151.0850 Yolo Command
153.8300 Yolo Black TAC
158.8350 Yolo Brown TAC

From: Jerry Kraemer
Topic: 14822 Message: 14822

Rv user, that pl of 131.8 will only allow you to hear Corning City Fire.
Glenn County, on 151.400 is no PL.

Corning City is actually on the same frequency (154.400), but only
transmits on local, not on repeater.

[Non-text portions of this message have been removed]

14823. Glenn County and what PL for what Freq.

Yahoo group: norcalfire (2005 — 2016)

From: rv_user
Topic: 14822 Message: 14823

OK. I think you mean 154.400, not 151.400 (that's Butte). I plugged in 154.400 with no pl as well. RadioReference shows Glenn County fire with a pl of 100 on 154.400. I've got them all in, so it will hear them all. I'll keep an eye on whar pl shows up with what.

Thanks,

Jim P

And for your notes, TGU dispatches for Elk Creek, so SRA land is everything in glenn county west of the transmission lines. Roughly half a mile into the valley from the foothills, the foothills, and the Road 306 area until it hits USFS land further west. So "far west" Glenn county would be more accurate than "north".

Thanks for adding those - that is a very nice hole that we haven't had before, with quite a few nasty incidents in the past.

Eight firefighters injured in collision
Staff Reports
Posted: 08/22/2009 11:00:00 PM PDT

LOS MOLINOS - A crew of eight U.S. Forest Service firefighters suffered moderate to major injuries Saturday morning, after a semi truck collided with a wildland fire engine on Highway 99 near Lassen View Elementary School.
According to California Highway Patrol reports, Gary Russell Hall, 58, of Sacramento, was southbound on Highway 99 in a 2006 Freightliner at approximately 9:08 a.m. when he allowed the big rig to cross into the northbound lane of the highway for unknown reasons.

The mirror on Hall's vehicle reportedly struck the windshield and front pillar of the northbound 2001 International firefighting vehicle, with the driver, 30-year-old Brian Janes of Klamath River losing control of the vehicle as a result of the collision. The fire engine reportedly spun counter-clockwise across traffic lanes before rolling into an orchard on the west side of the roadway.

Janes, along with Michael Viola, 27, Daniel Beall, 22, Geoffrey Phlean, 25, Scott Burghardt, 35, Trevor Johnson, 20 and Joel Berg, 22, all of Klamath River, were transported to St. Elizabeth's Hospital in Red Bluff with moderate injuries.

Aaron Schuh, 27, of Klamath River suffered major injuries as a result of the collision and was transported to Enloe Medical Center in Chico.

Hall was uninjured in the collision.

14828. Philbrook Reservoir burn?

Here is OFFICIAL PRESS RELEASE BY KNF Personnel , a little different than the media information.

> The Klamath Hotshots were de-mobed off the Elephant Fire and headed home this morning. A semi-truck apparently came into their lane on Highway 99, and one of the buggies had to take evasive action. The buggy rolled. One crew member was med-evac'd by helicopter with non-life threatening injuries. Seven other members were transported by ground ambulance with minor to moderate injuries. The rumors are flying, so please use this info to help with rumor control. We will provide more information as we get it and all family members are notified. The Wildland Firefighter Foundation has been notified.

A HUGE thanks to the Mendocino Hotshots, Darren Dalrymple of the MNF, other folks from the MNF who are helping with paperwork at the hospitals, and everyone else who has jumped in to provide assistance to the crew and forest. -Riva

I'm in Southwest Amador. Plume is originating well to the Southeast of Amador. Maybe on the other side of the crest.
No traffic on the radio from my location except tankers returning to Columbia for the night.

From wildlandfire.com Hotlist:

What started as officially a prescribed burn in the foresta meadow area in yosemite is now out of controll. 300 plus acres in size and the fire has jumped hwy 120. Resources include 65 fire fighters,the yosemite helipcopter, two sky crane helicopters, two water bucket copters, and all aircraft out of columbia. There are lots of dead trees and brush so this might be a bad one, god speed fire fighters.

My son is at TGU in Paynes Creek and he just text me that they are heading to Monterey at 3am. Is that a typo or is there another fire near Monterey? I Just asked him if he meant Yosemite but got no answer.

Pranay

Yes there are 2 separate fires in BEU.

Regards,

Craig T.

Big active fire in the hills east of Gonzales in BEU...Copter 404 struck power lines and had to make an emergency landing in the fire area and then had to be defended with firing operations.

If they are just pulling Strike Teams from Santa Cruz then CoCo will be farther down the list. Generally speaking Strike Teams are sent from the closest resource unless a specific Operational Area (County except for Los Angeles which has 6 OA's and the Tahoe Basin which is El Dorado, Placer and the three Nevada Counties bordering Lake Tahoe) is at draw down already, has it's own incident(s) running or they cannot field a Strike Team.

The Bryson Fire is in Lockwood Valley partly in FHL but mostly in the SRA between Interlake Road and Lake San Antonio.

The LaGloria Fire is burning in the hills east of Gonzales and they just had Copter 404 out of Columbia earlier this evening strike power lines and be forced to make an emergency landing in the fire area and a be defended with firing operations.
No injuries reported.

That would be up to SFFD at the time of dispatch...some Departments have predetermined Companies for in and out of County Strike Teams...which usually rotates on some form of a time frame.

Subject: RE: [NorCalFire] BTU/Plumas PNF Fire?

I just talked to the PIO about this. There were two smoke checks last night
and one was a false alarm (I think it was a BBQ in Chico) and the smoke
check must have been in the PNF because there are no incidents in BTU right
now.

Subject: RE: [NorCalFire] BTU/Plumas PNF Fire?

BTU 2170 is hunting for a fire off of La Porte Road. PNF is sending a full
response as well. I don't think they have determined if it's PNF or BTU yet
but earlier traffic suggests that it was in the PNF. We'll find out soon
enough.

The Bryson Fire is in Lockwood Valley partly in FHL but mostly in the SRA between Interlake Road and Lake San Antonio.

The LaGloria Fire is burning in the hills east of Gonzales and they just had Copter 404 out of Columbia earlier this evening strike power lines and be forced to make an emergency landing in the fire area and a be defended with firing operations.
No injuries reported.

14880. UPDATE: BUTTE: Vegetation, Oroville area

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-29 19:50:07 UTC
From: Pamela Alley
Topic: 14880 Message: 14880

Ten engines, 2 dozers, 2 handcrews additional to first response.

No update on acreage as yet; copter 205 on scene.

Fire has crested the hill; 15 acres with at least spot out ahead. Moving with some rapidity.

Tankers 88 and 89 are enroute from Grass Valley.
1249

14881. New Start CZU/SCU @ 1304 Hours

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-29 20:05:21 UTC
From: Craig Allyn Rose
Topic: 14881 Message: 14881

Two confirmed vegetation fires working along Summit Road with one fire reported directly across from 491 Summit Road. Both fires working in SCU near CZU.

CAL FIRE Engine 4521 reports one fire at one acre, rapid rate of spread, moving into heavy timber, and making a run at this time. Second fire further up Summit Road.

MOUNT MADONNA IC for fire at 491 Summit Road

SUMMIT IC for second fire along Summit Road

UPDATE ----

Fires have been designated as follows:

BRANCH 1 - the western most of the two fires is close to containment. Looking to hold it at 2 acres in heavy fuels.

BRANCH 2 - being handled by SCU Battalion 1613 is now at 2-3 acres in the tree canopy with numerous structures threatened.

Strike Team out of Santa Clara County (TYPE 1) has been ordered for immediate need structure protection.

Hello,

This email message is a notification to let you know that
a file has been uploaded to the Files area of the norcalfire
group.

File : /3-letter-abbreviations.pdf
Uploaded by : n6uru <groupsmail@...>
Description : 3-letter Fire Agency Abbreviations (2004, but still looks pretty accurate)

You can access this file at the URL:
http://groups.yahoo.com/group/norcalfire/files/3-letter-abbreviations.pdf

To learn more about file sharing for your group, please visit:
http://help.yahoo.com/l/us/yahoo/groups/original/general.htmlfiles

Regards,

n6uru <groupsmail@...>

14895. SCU Hecker Pass IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-29 20:54:01 UTC
From: Craig Allyn Rose
Topic: 14881 Message: 14895

As a reminder, there are two working vegetation fires, both along
Summit Road in SCU. There was a third roadside spot in Mount Madonna
County Park that was extinguished by park rangers.

Again, the general location of these two fires is here - http://tinyurl.com/nrj3ap

Latest Report on Conditions:

One fire contained at 2-3 acres in brush and timber.

Second fire, closest to Hecker Pass, on Summit Road (refer to link) is
the priority, but Air Attack advises they may be able to get a handle
on this one as well.

Final update (from me) unless conditions warrant additional posts, or
I get called out.

Cheers all!

Craig Allyn Rose - Photo Unit
City of San José Fire Department

14897. SCU Pacheco Incident (Hollister, CA)

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-29 22:46:19 UTC
From: Craig Allyn Rose
Topic: 14897 Message: 14897

Another confirmed vegetation fire, this one working adjacent to the Pacheco CAL FIRE Station located at 12280 Pacheco Pass Highway, Hollister, CA 95023-9512. For a map of this location please go to:

http://tinyurl.com/kkjj5o

This fire is well-established and was over 50 acres about 30-minutes ago. Cause of fire was a traffic accident/vehicle fire that spread to the vegetation.

Fuels in this area are mainly grass, some brush, and oak. For those familiar with the area, this fire is roughly three miles to the NE of Casa de Fruta.

Traffic can be heard on the following:

CAL FIRE SCU LOCAL - 151.445
CAL FIRE AIR TACTICS 4 - 151.280

14898. Re: SCU Pacheco Incident (Hollister, CA)

UPDATE - Air Attack advises fire is in oak woodland, grass, and some brush. Currently 250 acres.

COMMAND 2 - 151.265
TAC 9 - 151.385
AIR TACTICS 4 - 151.280
SCU LOCAL - 151.445

Can't tell the numbers are burnt off!!!

Reason #2 the firefighters familys should receive any news through official channels not through a news agency or Yahoo Group. Check this groups rules and reg's published every month.

Thanks Jon
For burnovers, FF injuries, etc. absolutely NO posting of any engine numbers or identifying marks on the engines or names unless you're linking to an official press release. You will be immediately removed from the list if you do so, including any future resemblance of you.

Consider this your first and second warning.

Thanks
Jake
norcalfire-owner

Sent: Sunday, August 30, 2009 11:04:37 AM
Subject: Re: [NorCalFire] Burnovers, FF Injuries etc.

I'll leave NorcalFire's *official* answer to the listowner Jake, but after 40 years associated with public-safety comms, I can assure you that a huge amount of the information that goes out over the radio (and into our scanners) is unverified, incomplete, and often turns out to eventually be completely *wrong* Stuff said "on the flu" is often found to be inaccurate after it's investigated more closely.

But more important, when a FF or LEO is injured or killed in the line of duty the ONLY appropriate and sensitive way of delivering such (often VERY tragic) the information to their loved ones is by direct communication from their employing agency.

Rumors, or vagaries like "it looked or sounded like Engine 73" make it even worse, as (a) the unit # may be wrong, (2) there may be more than one "73" on an incident, (3) the persons involved my be at E73 but not part of its crew, and (4) a million other possibilities for us to get the information completely wrong.

It's just as bad - or even worse - for unofficial sources to leak out wrong info about the wrong persons and put their families into a state of shock when it's not even their loved ones who've been involved.

Second answer, and it may sound crude, is because this is Jake's group, he's the owner, and *he says so* A number of other scanner groups owners here in California have, as a group, adopted the same policy.

Sorry, Jake, if I've spoken out of turn here, but I was once involved when my family received incorrect info about my brother's being shot when he was a LA policeman, when he involved in an incident but wasn't shot at all. So I have a short fuse when this topic comes up.

Harry

14907. Re: [NorCalFire] Burnovers, FF Injuries etc.

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-30 18:21:59 UTC
From: Frank Ealand
Topic: 14903 Message: 14907

I am copying a post from another site here that says it all. This is a great post from a fire fighters wife as why not to post and says it all.

"First off I want to say I really appreciate this website. The information I get as a Fire Captain's wife is something I cannot get anywhere else.

Lately I notice that new posters are putting INJURY and ACCIDENT information on here. Now I think most people can read and I see that the Mods and AB both have requested this information not be posted until confirmed. Why is this so hard to darn hard to understand????

My husband was on the Esperanza fire. I had just dropped our kids off at school and had the scanner on. What I heard over the radio made me drop to my knees that day. I never felt so sick in all my life. Everyone conducted themselves properly but I knew what had happened. For the next 30 plus minutes I got to wonder whether or not my husband or any of our friends were injured or killed. May I say that it is not something I can describe to anyone. To hear my husband's voice was the greatest relief I had ever felt but the grief I felt for the other families was enormous.

Before you bother to post about an aircraft going down, a vehicle accident involving a fire vehicle or a firefighter being burned or injured put yourself in their families position. PLEASE THINK! It is a heart wrenching thing for a family member or friend to go through.

Sorry to post this but this week it seems more people post without thinking than I have seen in quite some time.

Be safe all. Know our family's prayers are with you all."

14908. Re: [NorCalFire] Burnovers, FF Injuries etc.

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-30 19:11:04 UTC
From: LindaAnimalart@aol.com
Topic: 14903 Message: 14908

Hello,

I live in Colorado but my son is on a helitack crew in California. Most of the time I have no idea which fire he is on and through the norcalfire group, wildlandfire.com, Yubanet and other sources I try to keep track of what is going on out there. Personally, when I read about an incident without knowing the details it is an agonizing web search for more information. Wildlandfire.com is very careful on 'Theysaid' not to post anything until all the facts are verified and the families are contacted.

I really appreciate the service that the moderators and list-serve owners provide to help us keep informed and that they also realize the responsibilities involved.

Thank you!!

A mom

I applaud the spirit of this thread and I certainly will watch what I put on ANY list. I can't say if I've ever been guilty or not of posting "sensitive material" but when I think of how I'd feel if I heard of a friend's crew or rig involved in an incident, I think I'd panic a little.

Still, we hear what we hear, and all I can do is give my best wishes to the guys who put their necks out on the line to keep us safe and may ALL of you come back to be AIQ (Available in Quarters)!!

Craig T.

The guy asking the original question is a firefighter (Pranay) so it was perfectly natural that he wanted to know which engine it was as he knows a lot of these people and is familiar with the equipment.
However, if anybody (like him) needs or wants to know specifics they can simply say on this list or any list "hey, if anybody knows more specific information about such and such please contact me OFF-LIST" and that person can get their answer and yet nothing misleading or upsetting gets spread over the internet and finds its way to those for whom such information, true or false, would be unsettling or worse.

5 additional ordered 5 minutes ago for immediate need strike team
structure protection.

60kv lines arcing over the fire, in between homes and I5.

14916. Re: [NorCalFire] Burnovers, FF Injuries etc.

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-08-30 21:14:37 UTC
From: Jake H
Topic: 14903 Message: 14916

I think Harry and the wife's post from Wildlandfire.com says it all. We are 600 members strong here with even more non-members reading the posts from the web. I can assume from ratios in private posts to me, 400 of those members are family members to a FF etc. Only 200 or so are actual scanner enthusiasts interested in fire radio. I'm in between, with a brother currently on an OES strike team to the ANF-Station fire and myself a radio nut. I certainly would not want to read something about strike team 3801A being in a pinch in some canyon down there. Family doesn't want to read about something heard on the scanner. As was stated, all too many times we get things wrong, or have no understanding of the big picture when just listening to the radio. I certainly don't want to have 30-90 minutes of pure adrenalin/shock/pain running through my system because some scanner listener (like me) thought they heard an engine number or name and posted it here.

Thanks for everyones patience. We usually have this discussion once a year and I realized we haven't had it this year yet. ;) I think we all understand now and can move on.

Neither the IC nor Redding Command center specified an engine type, but as I recall from when I lived in Redding, a lot of these local companies had type 2's and 3's since their jurisdictions were mostly rural and often somewhat rugged.

Can someone place this on a map, please?

if you google map dry creek road in auburn, look below that to the airport
and south. from what i can see on kcra, it is just east of 49 sort of
between dry creek road and rock creek road.

My son is a FF, and we worry about him everyday. When he first joined SFD we laid a brick a to FF memorial in Stockton. He is now a Captain at DOW Chemical Fire Department. Makes you worry more since it's a DHS controlled plant. God bless the 2 Fire Fighters and there families, we will keep them in our thoughts and prayers.

14953. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-01 09:17:56 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14953

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

From: norcalscan
Topic: 12013 Message: 14955

I grimaced when I saw the automated list rules file get posted right after your post. Bad timing. The file is automatically posted at the beginning of each month and certainly was not directed at you or anybody in general. The rules listed are what a number of us came up with that allows this list of 600+ members to run efficiently and smoothly. Think of them as the rules that keep us from yelling fire in a theater. The posting guidelines are the same as socalfire yahoogroup and not as strict as wildlandfire.com hotlist.

We, the list readers, value your input, questions etc. The moderators on this list are very lenient and fluid, and the posters are great so there is little actual moderating to do here thankfully. We just sit back and let the list run.

Thanks and if you have any further questions, you can email the moderation team at norcalfire-owner@yahoogroups.com

Jake
list owner (the guy that wrote that rules file)

They're leaving people *on the ground* on Mt Wilson to do that? There
are really no "safe" areas anywhere along the entire ridge, and only one
narrow, winding, wooded escape route, the Red Box - Mt Wilson Road. And
that only takes you north to SR 2 and more fire.

But then I'm not there and they haven't asked me for my recommendations
:)

I've seen various media site security photos taken today showing fire personnel on the mountain. The KTLA helicopter video of an hour ago was showing the smoke as coming from under the canopy of trees, indicating it was ground cover and duff burning.

Continuing (stupid IE browser!), the video did not show any open flame / active fire around the site - just the smoke in and around the Observatory.

And the reports I've seen indicate that all fuel along Angeles Crest Highway and Red Box has been burned out by the fire.

Remember, once it's black, it's relatively safe...

Guess that was a hookline and sinker! During the noon aerial shot, the pilot said the fire had made it to the top. Shouldda notice the smoke between the observatory bldgs and the fact the tree's were not torching. thought it was strange to see a lonely type 1 just sitting there and should have caught it.

Big Meadow Fire Suppression Efforts Continue
Road Closures in Effect Through the Holiday Weekend

The Big Meadow Fire in Yosemite National Park and Stanislaus National Forest has grown to 5,938 acres, from 5,257 acres yesterday. Containment remains at 55%. The fire continues to be active on the northern flank approaching the Tioga Road near Tamarack Flat and in the upper Crane Creek drainage.

Crane Flat Campground, Tamarack Flat Campground, and Foresta remain closed. Hodgdon Meadow Campground remains open and accessible to visitors. All other campgrounds in the park remain open.

The Big Oak Flat Road is closed to through traffic at the Big Oak Flat Entrance Station to the junction of the El Portal Road. In addition, the Tioga Road remains closed to through traffic from White Wolf to the Crane Flat Gas Station. These closures will remain in effect through the Labor Day weekend and until further notice.

Access to Tuolumne Meadows from the east side (via Hwy. 395 at Lee Vining) remains open utilizing the Tioga Pass Entrance.

For additional fire information please visit www.inciweb.org. In addition, visitors may call 209-372-0669 or 209-372-0327 for updated fire information during business hours.

Looks like there are two Butte County feeds on Radio Reference's site.
One from RV_User and one from somebody else. According to the other
feed, it's Butte County only including Fire and LE.

Pulled up the feed notes...

Butte County Public Safety:
(Co. Sheriff, Chico Police and Fire, Butte County Fire and Cal Fire)

Includes Chico Police and Butte County Sheriff main nets, routine LE
tacnets such as BCSO channel 2 and CLEMARS, Chico Fire and
Cal-Fire/Butte County Fire main nets as well as numerous Butte County
used fire tactical channels.

Major Fire or LE events may prompt temporary programming changes until
the events are over.

Channels designated with a "**" are not always enabled but may be
enabled should a special incident occur.

BCSO Main Net
BCSO Ch. 2 (Tac Net)
Chico PD Main Net
Chico PD Tac
** Chico PD Law Net
** Chico PD Weekend/Evenings (DPW Daytime)
CSUC PD
CLEMARS VHF
** CLEMARS 2 VHF
NALEMARS
** CLEMARS UHF

** Search & Rescue Dispatch / Local Government
** Search & Rescue Tactical

Cal-Fire Main Net
Cal-Fire Support Net
Chico Fire Dispatch (Blue)
Chico Fire Tac (Yellow)

Calcord
Tac 5
Tac 9
Tac 11
Tac 12
White 2
White 3

** White 1
** CDF Command 1
** CDF Command 2
** CDF Command 7

Mike

Mark,

I believe that RV_User's feed and the other one I mentioned are on Radio Reference's site.

The home page or Radio Reference is:

http://www.radioreference.com/

Both of the live feeds that show up for Butte County can be found at:

http://www.radioreference.com/apps/audio/?ctid=186

154.265, 0300 hrs

hearing plenty of static with mention of an 'Alamo Road' and just requested 5 more engines (type 1 or mix of type 3's).

Previously mentioned was fire 'all along the road I came up' and 'lots of resources on the way'.

I do not think this is anywhere local to Butte--Butte fires almost always show up on 151.400.

Wondering just what I'm hearing and where it's coming from.... :)

Good Morning NorCal folks. What community is this fire near or in and does anyone have a size, ROS, potential for growth and/or current or potential structure threat?

Thank you,

Chris
(SoCalFire)

14991. FF injuries NOT to be posted

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-04 20:32:32 UTC
From: norcalscan
Topic: 14991 Message: 14991

Once again, any injuries involving firefighters, down to the complaints of blisters on their feet, are NOT to be posted, EVER, until a PUBLIC STATEMENT has been made by the agency involved. After that, info shared must be kept within the confines of that public announcement and no further speculation or "I heard different". No exceptions.

This is a prime example of an innocent statement being made that immediately caused concern of a mother.

It is not a matter of FF privacy we are concerned about. It is a matter of causing unnecessary grieving, worry, shock, anger, skipped heart beats etc. by family and friends of those who "may" be involved.

The member will not be moderated or banned due to her history, and her immediate email afterward to me once she realized her mistake. Others will not be so lucky.

Well, as usual, when I posted, they promptly cancelled the call for 10 additional engines, so this is a good thing, right? :)

Why is everyone up all night on this list... ? Hmmmm..... :)

15006. BUTTE: E. Chico, Structure/Vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-06 12:26:14 UTC
From: Pamela Alley
Topic: 15006 Message: 15006

Fire showing very large per responder en route; full wildland callout in progress. Fully involved structure with probable extension to vegetation; multiple reports .

Engine 2166 responding requesting water tender all call.

Staging dozer at 32 and Wilder. Per 2166, appears to be structure only at this point....0520

Unknown if structure occupants are home or not....

Zinfandel IC on Tac 9
Butte Fire 151.400
0519

15007. UPDATE: BUTTE: E. Chico, Structure/Vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-06 12:35:51 UTC
From: Pamela Alley
Topic: 15007 Message: 15007

Per SO unit on scene, structure on the ground and fire extending to wildland
at this time.

There was some doubt as to whether the dozer could cross the bridge; Sheriff
unit advised that many dozers did just fine across it last year... :)

Waiting for sizeup....

quarter to half acre vegetation, fully involved structure on the ground.

PA

Looks like Pam conked out on us after her first couple posts, but between "E Chico" in the subject line and her mentioning "staging dozer at 32 and Wilder" and "Zinfandel IC" I would cautiously guess that it was (is?) near Wilder & Zinfandel, s/of Hwy 32 east of Chico, possibly http://tinyurl.com/Near-Here

OK, per the feed on RadioReference.com, dispatch at 05:12 was a full wildland response to "Structure spread to vegetation, across from 4724 Zinfandel Dr, between Wilder Rd & *Pam* Ct...multiple reports, well-involved structure, unknown if occupants are home" and updated at 0520 as Pam reported.

So my guess wasn't TOO bad: http://tinyurl.com/iMissed-byPoint2mile

15017. LNU: OASIS IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-08 19:30:32 UTC
From: Pamela Alley
Topic: 15017 Message: 15017

Sounds like it's spotting and making some pretty good runs out there...pulling in a lot of resources now, including a strike team from Butte (BTU, O Abbreviation Fanatics..). Apparently BLM is asking that dozers be used only if they use existing roads as much as possible for lines, etc. I guess it is making things a bit more difficult.

Air support is light tankers (ST2s?) and a couple of heavies with a lead plane...??

I think...I am hearing quite a bit but only from AirTac so not going gungho posting info....

Pam,

St. Helena, in Napa County, is the Headquarters and Emergency Command Center (ECC) for LNU, Lake, Napa, Sonoma Cal Fire Unit. Sonoma use to be their own Unit, but they were folded into LNU but there are still offices in Santa Rosa, where their Headquarters was.

It's like "Oroville" for BTU.

Tim

15060. SRF Fire AT the USFS Salyer Service Center 16:22 hrs

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-19 23:26:50 UTC
From: Harry Marnell
Topic: 15060 Message: 15060

Salyer & Willow Creek fire being dispatched to a vegetation fire "at the request of USFS" to a vegetation fire described as "at the Salyer Fire Service Center" If I can pick them up, will be streaming at http://www.radioreference.com/apps/audio/?ctid=194

1/10 acre in grass and berry vines, with strong wind on it. 2 SRF engines on scene requested the additional companies

Otherwise 168.725, 154.07, maybe 154.31

Harry

15061. U/D: SRF Fire AT the USFS Salyer Service Center 16:32 hrs

Yahoo group: norcalfire (2005 — 2016)

From: Harry Marnell
Topic: 15061 Message: 15061

IC named "Compound Incident" (Incident #SRF-1927) type = Wildland
Fire, now contained, winds are upcanyon 5-7 mph, slope is flat,
hazard=below power lines, cancel the incoming (SLV & WCR) volunteers.
SRF E32 & E33 at scene, Bat-31 responding.

http://harrymarnnell.net/SalyerServiceCenter.jpg

168.725

My final post on it. Unless it isn't.

Harry

Subject: Re: [NorCalFire] PNF fire

Any info of size? up to date?
any way of hearing this?
Which way is the fire going?
nothing on KCRA or Inciweb

Tom - can you hear PNF? If so can you take primary on live scanner? PNF
is rough for me and my magic 172.400 also has SHF Forest net (it's like
the USFS party channel up here LOL) causing a mess. :)

my last sizeup was 75 acres long range spotting

15066. Fire in SHF north of Weaverville?

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-09-26 20:25:04 UTC
From: Harry Marnell
Topic: 15066 Message: 15066

Broadcast on Humboldt HUU/SRF freqs that Tanker 96 is enroute to a fire on the Shasta-T north of Weaverville. Any info? Name sounded like "Swift" Incident. I can't receive that area from here on the coast.

Harry

CA-SHF-Swift

Sec 21 36N 8W MDM

This fire is on the Weaverville RD west of Trinity Center in the Swift Creek drainage.

SHF, SHU, and LG responding
Copter 506 and AA at scene

5 acres with 40% slope. Spotting in brush and timber. Moderate rate of spread.

Date: 2009-09-30 18:27:28 UTC
From: elsiebea1
Topic: 15079 Message: 15079

My scanner's croaked, and Grass Valley AAB just launched a spotter and two tankers, faster than usual, and one tanker came back about 20 mins. later, also at a good clip. Anyone know where they're going? I normally wouldn't bother anybody for this, but as fast as the turnaround is, I'm concerned this might be pretty close by.

TIA!

There's a vegetation fire in the Lincoln area, near Hungry Hollow Rd & Hardscrabble Rd, near Lincoln, first dispatched about 11:00. It sounds like they've got it contained.

15085. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-10-01 09:19:35 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15085

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

15086. Road 6 Incident

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-10-01 20:02:56 UTC
From: James Robertson
Topic: 15086 Message: 15086

LNU - Road 6 Fire
County Rd. 6 and County Road 86 which is near I-5 in Dunnigan
Per AA 250 + acres, fire bumped a structure and is being held by a couple of roads. AA states that if the fire spots over that road acreage could double.

15087. Humboldt: Iaqua Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-10-04 00:32:43 UTC
From: Harry Marnell
Topic: 15087 Message: 15087

100-200 acres, between Kneeland & Bridgeville, started about 14:30; as of 16:45 there were 8 engines onscene, 7 more enroute; plus dozers, camp crews, and water tenders from several local FDs. Had 4 air tankers, all have been released back to Redding and Ukiah.

For relief tomorrow they have three 5-engine Strike Teams coming, who will be in Humboldt tonight and to the fire in the morning.

Command is Cmd 2 151.265
CDF Local 151.250
Tacs 3 and 7 - 151.175, 151.34

I believe both the Mill (HIA) and Wilson (HUU) fires are demobing in the face of the impending (any hour now in Humboldt County rains, which may be a "season ender" per SRFs morning weather broadcast. We've had a number of engine and crew STs up here over the weekend and they're probably going home.

Could be prepositioning crews for sand bagging and debris removal from expected mudslides. what a change from CNR and CSR staffing patterns for fires to the next one for sandbagging and debris removal.. Just speculation.

CALFIRE can only respond to flooding if CAL EMA creates a mission number. There is no funding for other than fire missions for the crews.. So if no mission number, the local unit would have to eat the cost. And as bad a CALFIRE's budget is, that aint going to happen. So it probably was units being demobed from the fires up there.

ARPC Files Petition to Amend 97.113: WB6NOA, N5GAR & N5FDL Seek Changes Allowing Volunteers and Professionals to Train Together

October 24, 2009 -- The Amateur Radio Policy Committee today released a copy of its Petition for Rule Making recently filed with the Federal Communications Commission.

The petition seeks changes necessary to allow amateur radio operators who are also paid emergency responders to participate in on-the-air emergency training exercises. The FCC recently stated that such activities--which had been taking place for many years--violate Part 97.113(a) of its rules and must be stopped.

Part 97.113 states that amateur radio operators may not communicate on behalf of their employer, even if it is a fire department, hospital, law enforcement, or a disaster relief charity, except during actual emergencies.

That means on a day-to-day basis that these professionals are prohibited from participating in on-air training exercises or even casual on-air conversations about their agency's emergency programs. Thus, hams working for an emergency management agency cannot participate in the agency's on-air training events with agency volunteer ham operators.

The Amateur Radio Policy Committee was formed to seek changes to FCC rules and put an end to this nonsense. Emergency responders should be able to train with their volunteers without needless interference from the FCC.

The committee consists of well-known amateur radio author Gordon West, WB6NOA; former North Texas ARRL Section Manager Tom Blackwell, N5GAR; and San Joaquin County (CA) ARES Coordinator David Coursey, N5FDL.

The petition proposes a change to Part 97.111 which describes communications permitted in the Amateur Radio Service. The proposed new language would make legal the following:

(6) Transmissions necessary for disaster relief or emergency response, including training exercises, planning, drills or tests, without regard to whether the amateur operator has related

employment, where the transmissions are for the exclusive use of amateur radio operators for noncommercial purposes.

The petition also proposes minor wording changes to 97.113 to make it consistent with the suggested new language.

A copy of the petition may be downloaded from N5FDL.com, which also includes much additional information about this controversy.

Actually, what I read from the FCC was quite nicely stated, that "While the value of the amateur service to the public as a voluntary noncommercial communications service, particularly with respect to providing emergency
communications, is one of the underlying principles of the amateur service, the amateur service is not an
emergency radio service."

I'll have to side with the FCC on this one. The FCC is allowing waivers for drills etc so it's working with the amateurs. However, hospital employees using ham radio for communications that benefit the hospital are definitely beyond the gray area.

Jake KF6KDD
EC for 6 years, SEC for 5 years, and personally installed a 2m/70cm ham station in my local hospital for ARES use.

15102. Re: [NorCalFire] Attn: Ham Operators who are emergency responders...

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-10-24 20:41:57 UTC
From: David Coursey
Topic: 15098 Message: 15102

Hi Jake:

There will be very few waivers granted. They are, essentially, for one-off events. I've tried getting a waiver for a regular net. No-go. The FCC is not trying to help us, just placate some critics in government agencies. The Red Cross, for example, cannot on its own request a waiver. Neither can a mere ham.

Under the current rules, a ham who is the staff sponsor for RACES can't check into this agency's RACES nets. What sense does that make? That same ham, driving home and asked on-the-air when the next RACES meeting is would be violating the law if he answers. This is madness.

At my hospitals, the first person to touch a ham radio in an emergency will be a hospital employee who is also a licensed amateur. This is at the request of the County EMS agency. That person may be the sole operator for a prolonged time because of a limited number of available volunteer operators in my county. This would be perfectly legal, BUT on-the-air training for this person is illegal. What sense does that make? This IS NOT using ham radio to benefit the hospital--it benefits the public and is done at the request of government.

Siding with the FCC may not mean problems for you in your county, but it means big problems in mine. I do not see the downside to making it legal to train for what is legal during an emergency. It's like our trainers say, "Train like you'll play." I hope you will reconsider your view on this issue.

73,

David

I think everyone is getting it wrong. The way I interpret it is this: Unless it is bona fide emergency, Part 97 licensees cannot transmit traffic on the behalf of their employer on Part 97 frequencies. They can use Part 90 frequencies all they want, either for regular traffic or drills, but must get a waiver for drills if it somehow benefits the employer on Part 97 frequencies.

Mind you this fire has been going on since 345am.

This is pretty much where the Summit fire of May 2008 was.

As seen in Pranay's update, aircraft usage is not safe so they're fighting this entirely on the ground, despite an early up for the copters and planes.

CZU had slipped into off fire season staff mode and now got caught, but neighboring SCU had all their stations staffed.

CAL Fire has also put the majority of the helicopters in a scaled down staffing mode and the helitack crews are very hard to come by. Most Cal Fire copters are "bucket" only.

Access is hindered because of mudslides from the heavy rains earlier this month.

Just because Cal Fire was doing a burning operation in the area does not automatically make that the cause. Until an official cause had been determined and released via an official source this is the end of this conversation. If there are any questions contact list admin at norcalfire-owner@yahoogroups.com

15117. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-11-01 09:17:54 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15117

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

15118. MNF - Doe Peak fire

Yahoo group: norcalfire (2005 — 2016)

Was everyone sleeping today while we had high 60's temps with 10% RH and 40mph sustained winds?

Mendocino working a 70-100 acre fire in the Grindstone drainage area off of Doe Peak. Driving home tonight I could see from Orland both sides of the canyon lit up with quite a few hotspots - at 9:25pm! Quite the fire for this location and time. And no rain until next weekend? They flew Copter 205 Saturday and rolled dozers out of TGU. Will see if there's any aircraft planned for Sunday.

From: tcaves
Topic: 15118 Message: 15123

Actually It's a RX burn that got a little out of hand. As I understand it they have not called in an escape burn yet. They have 24 hrs to get it contained & back in prescription before it's required.

15124. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2009-12-01 10:14:05 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15124

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

From: Jake H
Topic: 15131 Message: 15132

listening to the live feed. CHP cad in Redding showed a small slide in
299w jwo red hill. SHU did a facilities check. CHP Redding did a broadcast.

live feed has numerous gas leaks both under street and to residents.
Hydrants are out of commission. Water lines broken all over. Power seems
to be out all over Eureka except for an island of power near Plaza and
central town. Unknown building name, just reported partial collapse and
a foot displacement.

Unfortunately skip isn't happening tonight so I'm not hearing the ham
repeaters or HCSO live. Sure felt the shake though in Red Bluff.

Dozens (at least) reports of minor/moderate injuries, and many reports of minor/moderate damage mostly to older homes and businesses in Eureka. Roadways/bridges being inspected. Majority of damage reports seem to be of gas leaks and power lines down, some homes knocked off their foundations. Have NOT heard any reports of fatalities or total building collapses.

listening to the live feed. CHP cad in Redding showed a small slide in
299w jwo red hill. SHU did a facilities check. CHP Redding did a broadcast.

live feed has numerous gas leaks both under street and to residents.
Hydrants are out of commission. Water lines broken all over. Power seems
to be out all over Eureka except for an island of power near Plaza and
central town. Unknown building name, just reported partial collapse and
a foot displacement.

Unfortunately skip isn't happening tonight so I'm not hearing the ham
repeaters or HCSO live. Sure felt the shake though in Red Bluff.

15140. Re: Hey...Is the feed repeating?

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-01-10 19:32:43 UTC
From: Harry Marnell
Topic: 15140 Message: 15140

At least if you're listening via the "Web Player" option (at http://www.radioreference.com/apps/audio/?action=wp&feedId=1161) yes, these can be an issue of the feed repeating itself after a while. Just hit the page-refresh thing on your browser, or else "F5" and it should bring you current. It's a glitch in their system that they haven't resolved yet.

Topic: 15141 Message: 15141

Hi All,
I feel I owe the group a I'm sorry.

As this group Pam Alley, Jake and All, keeps us "over the hill" on the coast so well informed throughout the year. I feel I dropped the ball by not forwarding information on the Quake.

I was in touch through our Radio Hum Group With Harry Marnell and others, we traded and posted information from different areas and with Harrys Radio Referance site for Humboldt County we were aware of conditions and power outages. I got so caught up I forgot to post any information to the norcalfire Group until much later.

It's not often we are the center of news. I'm sorry for not remembering this group.

15146. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-02-01 10:15:12 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15146

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

Happened to notice driving past our local Cal-Fire station, black plastic covering the monument sign and the fire danger sign. Now I find of the 5 year round stations in the HUU Humboldt-Del Norte ranger district, 3 are closed.
This is the first year this has happened, I wonder how many will open for fire season. We also have 5 seasonal stations and other resorces we expect to be closed. I don't recall any announcement of this closeure. I see pickup truck activity at the station so staff is around.
Is this situation happening in other areas of northern Calif?

The local fire districts are well equiped and trained to cover any Cal Fire type incidents to a point.
If a incident expanded and needed additional resources eg aircraft, forest service, out of district water tenders, food service. the local district requesting resources has to pay for them! Wharas usual drill of the fire district is to turn over IC command to the first Cal-Fire chief or captain on scene and they pay for resources they order.
Also since Cal Fire has taken over fire and bomb investigations from the State Fire Marshal, Cal Fire investigation is not responding.
Recently we had a rash of fire starts in remote roadless area, this also has happen last fall. firefighters could see acre sized fires but it was a bit of a hike with equipment. This was near airport, a private helicopter took off on his own and spotted the arsonist complete with gas cans. hearded him out to where sheriff deptuties could grab him. Calls to Cal Fire for a investigator, none on! Wouldn't be surprised if this guy walks for lack of a case.

Again my question, are year round stations closed in your area?

15153. Station Closing

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-03-07 18:18:41 UTC
From: David
Topic: 15153 Message: 15153

I believe most all of the HUU stations are seasonal. However, CDF has a program (the Amador Plan) where local government funds minimal staffing at some of these stations to provide some fire protection during the winter months to those communities.

I would bet, due to all of the reduced funding that local government has gone thru, that they were unable to continue their Amador Plan contracts with CDF.

Dave

Topic: 15153 Message: 15154

David,
There are five seasonal stations and five year round stations In the HUU Humblodt- Del Norte ranger unit. It has been like this since the beginning of fire.

Now I notice this reduced staffing of only 2 year round stations open. This comes from a resource status report prepared 03/03/2010.

We have no Amador or Kern plans. The local fire districts pay for and provide their own protection, equipment and firefighters. Cal Fire provides their own funding, equipment, and firefighters for the areas they protect. There is no problem with any of our fire districts.

My question then and now is: is this situation of closed stations occuring in other ranger units?

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Nothern California Fire Radio, and not selling us a magic pill.

15156. Live scanner feed for CalFire NEU -E ?

From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15157

How and what to post on NorCalFire. Following these rules help keep the sanity on a busy list of 500+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

15161. Resource Offer

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-05-12 00:06:35 UTC
From: Butte County Public Safety Scanner
Topic: 15161 Message: 15161

Hello fellow online scanning enthusiasts,

For the last two years, the Butte County Public Safety Scanner has offered to share its enormous bandwidth with anyone in California who may be near a major wildfire event but does not run a full-time feed or has limited resources available to them free of charge. We have relayed feeds for several major wildfire incidents in the past and it has worked out very well. Last year the Butte County Public Safety Scanner website was acquired by the Butte County Fire Safe Council and the governing board has decided that this year will be no different and we would just like to remind the online scanning community that our offer still stands and we're ready to share our resources when needed.

Benefits:

Support for Windows Media and ShoutCast MP3 streams (Possibly more if needed)

Bandwdith for 10,000+ simultaneous listeners (we've reached over 4,000 simultaneous listeners in the past with no sign of trouble)

Technical support to get your feed up and running

Blog space with comment support for you to post play-by-play information or daily summaries of activity should you choose to do so and allow your community to interact with you

Your own chat room dedicated to the incident for real-time information (Moderated by volunteers of your choosing or our veteran moderators can help)

While it is our hope that California will not have any major incidents this year, we stand ready to help in any way that we can. To get in touch with us, just visit <http://www.thenet411.net/> http://www.thenet411.net and use our contact form to let us know if our free resources can benefit your community.

Sincerely,

Butte County Fire Safe Council

767 Birch Street

Paradise, CA 95969

15164. Fire at Berkeley East Bay Humane Society destroys animal shelter

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-05-24 21:21:32 UTC
From: ccdogpark@yahoo.com
Topic: 15164 Message: 15164

From Berkeley, California

http://www.mercurynews.com/news/ci_15125303?nclick_check=1
Every news story I have read about this fire
seems to have some different additional pieces
of information.

http://groups.yahoo.com/group/ShelterFundraising/message/5399
The story I commented on above said the dryer
was left running but mentioned nothing about
the recent fire inspection. But this fire
seems to be the result of "human error" and
I doubt fire inspections can account for that
possibility.

I suspect someone in management at the shelter
will be fired over this.

The person upstairs was apparently living over
top the shelter to be alert to fires but she
was "too sick" on this night to hear the alarm (?)

They probably never did any fire drills or
ran any surprise tests to see how this person
living upstairs would respond and together
with someone turning on the dryer and then
leaving it unattended, that ended up costing
a lot of money in fire damage.

I never leave my own house with the dryer
running because of the potential for fire
but I am not sure if this is common knowledge
or what percentage of people know not to do
this(?)

(If you live in a townhouse, this is probably
a good thing to mention to your neighbors.)

But at an animal shelter it seems like there
should be signs on the dryer warning employees
not to leave it on unattended.

http://groups.yahoo.com/group/ShelterFundraising/message/5399
I am also curious if other people here agree that
rats are a significant cause of fires at animal
shelters and similar types of facilities that
commonly leave food out ?

Thanks for the heads up. I had an abnormal downtime with DSL this weekend (my uptime is typically 5-7 weeks before I have to reboot the DSL router and get a new IP address). I think the server didn't like that prolonged outage.

I am reprogramming scanner for fire season, as I do every Memorial Day weekend. Removing all law enforcement and unlocking the normally quiet fire freqs. I'll announce shortly.

15167. Welcome to Fire Season 2010

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-06-01 05:41:25 UTC
From: Jake H
Topic: 15167 Message: 15167

Short and sweet

Memorial Day weekend traditionally sets off the start of fire season for all of Northern California. May gave us inmate crew fireline competitions in TGU, air attack trainings over eastern SHU, refresher courses for all seasonal firefighters, and plenty of rain to grow the grasses even taller for June to dry up.

As much as I hate to admit enjoying the local law traffic, the "house live scanner" covering TGU, SHU, SHF, MNF, LNF is back to fire-only at www.scancal.org. It's about dang time! :)

Enjoy this list and enjoy the fire radio hobby. Lets start (and end) this season with everyone coming home safe and sound.

Jake

15168. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-06-01 09:49:32 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15168

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15186. Yesterday's Chico burn

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-06-16 12:47:58 UTC
From: Pamela Alley
Topic: 15186 Message: 15186

From the Enterprise Record:
CHICO - Fireworks were used to set weedy fields around Chico Municipal Airport ablaze Tuesday morning in a training drill that allowed crews to observe fire behavior, reduce vegetation, and prove just how incendiary even so-called "safe and sane" fireworks can be.
Fires were set in three areas of the airport, sending plumes of smoke into the air that could be seen throughout Chico.

Thick grass between airport runways burned aggressively Tuesday, but Chico Fire Department Inspector Mort Myers said vegetative fuel in the valley is nowhere close to being at its driest.

"Moisture content is still fairly high," he said, as he threw a new type of safe and sane sparkler into the weeds and watched them burst into flame.

Locally, fireworks are only legal within the city limits of Gridley and Oroville, and even the safe and sane variety are banned in the remainder of the county.

With fire department staffing likely to be down this year from past Independence Day celebrations, and the possibility that Engine 1 on Salem Street will be out of service, officials are hoping residents will follow the rules. Fire Inspector Rick Doane said crews will respond to reports of illegal or dangerous fireworks being used, and violators may be cited.

Fireworks used to start fires Tuesday were confiscated from Chico residents last year.

PNF is the oddball forest up here not covered by much. I can pick up PNF via an errant USFS transmitter on St. John Mtn that has been hot the past few seasons (172.400). Haven't tried it yet this year. St. John covers the valley from Sac to Redding so many can probably hear the 172.400 transmitter, unless USFS fixed it finally (no, 172.400 is "not supposed" to be retransmitting 170.550 PNF).

There were some cells building up in that area but nothing too active that I heard about.

I'm having some odd ghosts in the computer hosting the live scanner. Building up a backup. In the meantime, expect outages more often in the next few weeks until I put a new machine in place or find the ghost. You don't need to notify the list of outages, you can notify me directly but I'll try to check daily now to ensure it's up. Thanks. It's up as of Thursday 1830. We'll see how long it lasts. It might even be related to a 16month old hitting the keyboard...

No, the feed is at www.scancal.org/live.html (direct link is
http://216.68.233.15:8000/listen.pls)

I believe crackberry users can listen to streaming mp3 sources. This is
streaming MP3 audio via a shoutcast server. A quick google search should
show a solution for your phone. It does work on iPhone within the
browser and any Android OS phone, and possibly Windows Phone 7 when it
comes out in 4 years.

We had a nice t-storm roll thru here the other night. About 4am, we
had the kids camping up at Walker mine, up above Lake Davis.
Scared the boat load out of us ;-)

For you guys down in the valley, I remember hearing PNF on their
UHF links down in the Sac area loud and clear. Been about 2 years
since I've given a listen to these though.

Try 415.475 and 415.225. Don't know if these are still good or not????

Later,
Todd
Portola

From: Brian
Topic: 15170 Message: 15196

I don't think Jake did anything wrong.

If you look at most emails.
Anything with that type of audio streaming links or maybe it's the URL is using the IP address
numbers. You will get that warning on your email program....

I agree. Like I mentioned earlier this week, please email me directly if you wish, but not to the list. I am aware of hardware problems and it'll be up/down for the next couple weeks while I replace some hardware.

Jake

There's a "Stony" or "Stonyford" fire this afternoon along 101 near Petaluma, I believe. I don't know its status but they had some tankers ordered and MNF had some resources headed that way.

Scanner feed at http://www.radioreference.com/apps/audio/?feedId=228 but it's pretty quiet at the moment.

15213. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-07-01 10:00:38 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15213

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Craig,

Great pics. We saw the smoke from Los Gatos, thought it was a lot closer
than it was. Your pics put the size of the fire in perspective.

Thanks,
Tom

Happy 4th. Craig,

Nice photos Craig. What was the circular pattern on some of the slideshow photos, didn't look like a polarizer? Looked like you didn't have a lot of access to the building, to change the lighting and angles, but you worked well with the acceleration of the fire, crap blowing on your lenses, and getting the feel.

We'll see what I can get after the verdict here in Oakland. I've got a friend working EOC, and I might be down at the ICP. Have a great 4th., stay safe.

Regards, Brad

15221. SHU - Multiple Lightning Starts

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-07-09 03:42:31 UTC
From: Butte County Public Safety Scanner
Topic: 15221 Message: 15221

Chalk fire is 1/2 acre of timber with heavy down fuels. Second incident is the Neebs incident off of Big Bend Rd., 1/4 acre in a clearcut. Third fire now on the South side of LaTour Butte, visible from Shingletown.

Multiple Air Attacks and resources in the area. Jake's feed has the best reception: http://www.scancal.org/live.html

[Non-text portions of this message have been removed]

15222. BTU - Multiple Starts

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-07-09 07:35:48 UTC
From: Butte County Public Safety Scanner
Topic: 15222 Message: 15222

Multiple lightning starts in BTU. Reports of fires between Neal Road and Clark Road in Lower Paradise and another branch in the vicinity of Butte College on Clark and Durham-Pentz Road. Another fire along Highway 99 and Oro Dam Blvd. in Oroville. Still significant lightning activity in the unit so more are likely to pop up.

Might not be needed. E2478 reporting subject fled on foot, H16 landed
and apprehended the subject. I guess you don't run from the copter.
E2478 waiting for the scene to clear to go in and look for the second fire.

Several alarm response to a commercial structure fire about 300 yds behind me along hwy 32. I sure hope training had a recorder on the tactical channel as it was mass chaos. I think that everyone was yelling into their mics with their masks on and all you could hear was muffled, excited yelling. I think they have gotten it now as the tac channel is quiet. This is the second major fire they have had over there in the last year or so.. All metal buildings so they were cutting their way in it sounded like. Long hose lays that were creating some cross over issues and all the yelling didn't help coordinate that of course. Hwy 32 is a mess...hope everyone is ok. I believe tactical was on white 1 if i heard that corrrectly, 154.265. About 1/4 mile from Chico Station 6 towards Hamilton City.

Lots of assets rolling to a fire at Honey Run Road, from what they are saying, west of the lookout on the skyway. it is running up slope towards the skyway but still <1 acre. it is bumping into the steep ground. Air Tactical is 151.290, Tanker 93 has diverted to this fire. I don't hear any other tankers so far but copter 205 is on scene, or close. Now BT 2113 is on scene, light grass, slow rate.

That is always a very scary area!!

Whew!!

Ernie,

Glad the post was useful. That area, as anyone in Butte County knows, that would be BCU , Butte County, CA, can explode with just any bit of fire! They are releasing assets right and left now at 20:45. I think there is a hand crew on scene for mop up. Acreage was small and yes, CAL Fire just does a super job with hard hitting initial attack.

Way back when, we didn't even dream of this sort of initial attack capability but that is another discussion. Glad they got it. Our relatively high humidity so far has helped. There is a lot of flash fuels from the high rain fall which could turn ugly in a hurry. My Wx station says 46% relative humidity now which is not common for July 24 around here.

This was in the canyon below Paradise, in the Butte Creek drainage. There is a very, very steep, vertical, slope that runs up to Paradise out of this canyon. If a fire gets running up that slope, it usually gets pretty ugly in a hurry for folks in Paradise. I think 2008 was the last nasty event and a lot of property was torched in lower Paradise.

Evacuation routes were clogged and the situation was pretty ugly for awhile until the CDF troops and air tankers saved the day! Great effort by all, made you proud to pay your taxes. (I can't believe i said that!)

Lassen Forest Hat Creek District is getting hit pretty good with dry lightning. Multiple state/fed engine and crew strike teams from all over NorCal immediate need to Susanville and/or Bieber area. Fire H-3 sounds like their largest, about 15miles east of Hat Creek near Beaver Creek. 5 acres with short range spotting, but out in the middle of nowhere. Tanker 10 and 93? along with Copter 205 assigned to H-3.

172.225 LNF Forest is priority 2 on scancal.org live scanner now.

15250. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-08-01 10:28:06 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15250

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15251. BTU - Veg near Butte College

15255. Bar fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-08-05 03:57:12 UTC
From: nitrobear@comcast.net
Topic: 15255 Message: 15255

I drove up to Reno and back today and was surprised to see a 900 acre fire in the steep, up and downs in the Feather River canyon. It is the Bar fire and man, I don't see how they are dealing with it except from sky hooks. To say it's steep there is an understatement. Lots of USFS assets, didn't see an air assets but a short report on a station from Reno said that there were lots of troops on the incident.

Not much fire seen, lots of smoke seen and I guess that is why the valley around Chico has been so crummy/smokey. From Inciweb ; Looked to me like it was started along hwy 70 but may have been lightening i guess.

INCIDENT UPDATED 6 HRS. AGO Incident Overview

The Bar Fire is now 60% contained while more accurate mapping pegs the acreage at 992 acres. All control lines are holding. Highway 70 will be single lane, controlled traffic for several hours later this morning into the early afternoon as firefighters secure line on parts of the eastern flank of the fire. Smoke will be considerably less than the previous 2 days. Fire behavior will be characterized by backing, surface fire although isolated pockets of vegetation may occasionally flare-up.

  Basic Information

Incident Type Wildfire
Cause Under Investigation
Date of Origin Saturday July 31st, 2010 approx. 02:07 PM
Location N of hwy 70, S of Red Hill Lookout
Incident Commander Randy Jennings Current Situation

Total Personnel 300
Size 992 acres
Percent Contained 60%
Estimated Containment Date Friday August 06th, 2010 approx. 09:00 PM
Fuels Involved

Dormant brush, hardwood slash, brush, and timber with some dead and down woody material.
Fire Behavior

Backing and surface fire. Isolated islands of unburned brush and some timber continue to ignite.
Significant Events

Hwy 70 is open but will have single lane controlled traffic for several hours later this morning into the early afternoon. Smoke will be significantly less. Seasonal south/southwest winds will continue to carry smoke from the fire to surrounding communities to the north and east. Outlook

Planned Actions

Hold and mop-up 50' from control lines. Continue to monitor fire spread on the east side towards the old Rich Fire.

That is a very, very tough area to do anything but use aircraft and fire. damn near too steep for humans. I assume they took the troops up to the ridge top in copters.

15259. Graeagle PD activity

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-08-12 17:06:24 UTC
From: Brian Verhalen
Topic: 15259 Message: 15259

Not fire related but thought I would send it along
As of now (10:00)

There are numerous Sheriff, CHP (& I would presume Reno & Washoe County PD) in the Graeagle area with K-9 units either on scene or en-route. Not sure but I thought I heard something about SWAT also. Several choppers overhead.
Just heard CHP asking for a search around the Nervino airport area for a weapon.
Now Washoe County is asking CHP to wait, & they will do the search in that area with their K-9 unit.

The area at the end of Yonkalla Trail is blocked off, mostly a area of trees & dirt roads. Heli's are having problems seeing into the area, saying it will probably be a ground search mainly.

copy of 2 email notices:

August 12, 2010

WARNING -GRAEAGLE AREA- ARMED AND DANGEROUS

The Sheriff''s department is in pursuant of three armed and dangerous home invasion suspects in the Greater Graeagle area. The individuals while in the process of a home invasion in Reno and stole a vehicle when Reno police arrived. A high speed chase continued to Wishram Trail where the suspect left their vehicle on foot. At this point everyone in the area should be on the look for these suspects. The one man and two woman are considered armed and dangerous. Sheriff Greg Hagwood is on the scence coordinating the search. Call 911 should you have any information. The County's emergency reverse 9-11 system was activated this morning. Calls were made to home in Graeagle. In the event you live and Graeagle and did not receive a call, please notify the CAO's office at 283-6315. This was update as of 7:15 am

August 12, 2010

Man Still at Large in Graeagle

Two women are in custody following a high speed chase that ended in Graeagle this morning.

A man, described as 5 foot 8 inches, 170 lbs, brown hair and in his 20s, is still at large.

Residents in Graeagle area should still remain in homes.

Close but not quite. Norcalfire has always worked closely with thenet411.net in providing timely info in butte county, and diverting locals to its chatroom to take care of the smaller, localized numerous requests such as requested earlier that would flood this list, leaving this list to handle the broader updates and radio info.

I share your concern with other sites that certainly aren't team players, but please leave that "cage rattling" to the list moderators.

Thanks for your updates on this palermo fire!

Jake

15274. Clayton / Mt Diablo 2nd Alarm Vegetation Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-08-24 23:43:16 UTC
From: John
Topic: 15274 Message: 15274

Morgan Territory and Curry Canyon Rd, resources from Confire, Calfire, and EBRPD are on scene. Airtac is also on scene ready to do some tanker drops.

Fire has split into two heads, approx 50 acres total with moderate rate of spread.

Power lines are also down.

It is a pretty crazy phenomenon! If you click on the link below, it will lead to one of my photos that was taken while working at a church fire near downtown San Jose. I remembered this moment precisely while watching the fire tornado video. If you look to the left of the burning steeple you can see a long pillar of fire that stretches skyward. This was the exact same behavior, but it didn't move like the one in the video.

http://emergencyphoto.zenfolio.com/p889141266/e1563402b#h1563402b

Cheers!

For those interested, just passing along a link to a selection of shots from the first of three fires I worked over night. This one was a two-alarm structure fire in Cupertino. A few hours later, and back in San Jose, we had three major fires in rapid succession. Incredibly busy for all - thank goodness it cooled off overnight!

This incident is fire in a one-story, single-family dwelling in Cupertino.

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-09-01 12:01:56 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15281

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15282. Standoff/fire in Magalia

Yahoo group: norcalfire (2005 — 2016)

15286. Fire north-east of Forest Ranch, Butte County

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-09-07 00:37:32 UTC
From: Mike
Topic: 15286 Message: 15286

There is a wildland fire with a pretty good plume showing up what looks to be north of Hwy 32 somewhere between Forest Ranch and I'm guessing would be Lomo (turnoff to Butte Meadows). A number of fire resources and hand crews went east and a heli-tender went up to the helicopter LZ at Platt Mountain on Hwy 32.

Anybody know anything about this and a more specific location? Command or tac nets?

Windy IC is a BTU fire working Command on Butte Support 154.415.
Mostly an air show right now due to terrain. Air Attack on 166.675 with
AG on 151.220. One of the ground tacs is NIFC T2 168.200. Just west of
Windy Cut I think backing down into Deer Creek canyon. Was almost caught
early this afternoon but winds picked up with spotting and some torching
and they scrambled the tankers back out.

thenet411.net and scancal.org have had live scanners tuned to it.
Scancal has AA on priority 4

Mike, even if the BBQ is fired up, you gotta leave your scanner on with
this weather!
Jake

The lowest address on Glenview showing on the City of San Bruno list
of destroyed and damaged homes
(http://sanbruno.ca.gov/PDFs/Status%20of%20Homes.pdf) shows the home
at 960 Glenview damaged; based on that, there is a good probability
that the church is fine.

Were all sitting on the edge of our pews as to weather the Lutheran Church survived.

I do know the southern incident command post was located across street from church, later in evening.

15320. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-10-01 11:03:39 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15320

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Interesting. We're going through a statewide narrowband change and I think TGU changed over last week. That'll open up lots of new channels for licensing maybe 1513700 doesn't fit the new narrowband channel spacing.

However Jan 1st is a suspicious date. Our primary tone on turner mtn will have plenty of snow on top at that time. That would be a very costly and untimely date. The state is reprogramming statewide once more in the spring and that would be the more likely timing if here was a changeout. I'll keep an eye out on pending licenses.

Good points, Jake. I see no recent addititions or pending applications at
any of the TGU 151.37 TX sites.

I'm similarly watching the low-band licenses/sites for the CHP's new
Northern Division frequency plan. Most of the applications have been
received by the FCC and are pending - none of them have been approved as of
Friday.

CHP will only have to narrowband their non VHF-Lo frequencies. The new VHF-Lo band plan is being rolled out by Division. Valley Division was completed earlier this year. Southern Division was next and I have not heard that it is complete. Harry Marnell has posted that the Northern Division frequencies are at the FCC for licensing. Down the road CHP will be transitioning to the new PS 700 band for their mobile extenders. I am not aware of what the plan is for the existing VHF frequency.

As far as a scanner goes if you have the funds a digital scanner will last you a while. Eventually most PS frequencies will be digital, but that is a ways off. What you will need is a scanner that will do narrowband and if you live in an area with a TRS you will need one that will handle the rebanding.

Here in Sacramento we have one Agency, Los Rios Community College District PD, that is digital. We are not even rebanded yet. From what I am hearing in my professional circles is digital ain't happening any time soon due to the County budget. The TRS is capable, but the users have no money for the mobiles and handhelds, with the previous exception. This may change if Federal Grant monies become available. For now the priority is maintenance and rebanding.

What are the new CHP frequencies? Will they be narrowband too, like
the US Forest Service already is, and CAL-FIRE is changing to?
Narrow band volume is usually a lot lower in my old scanner than the
wide band, would a digital scanner cure that?

15328. Re: [NorCalFire] CDF Local TGU Freq - & CHP

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-10-17 04:20:50 UTC
From: Harry Marnell
Topic: 15328 Message: 15328

In reverse order, Mark. What I've heard elsewhere is that yes, a scanner that's digtal-capable is by definition narrowband capable, and you should notice less of a difference in audio levels if you're scanning both wide and narrowband signals. And not just scanners. Older two-way radios that aren't narrowband-capable aren't even allowed to operate at "Federal" fires anymore, so if a local department without narrowband capabilities responds to a USFS fire, they either have to stay off the air or - and this is a guess - borrow radios from the cache at the incident. Someone please correct me if I'm wrong about that.

CHP will be staying on low-band, so no, they're not included in the FCC's 2013 narrowbanding mandate, which covers only 150-512 mHz.

According to the FCC applications, and the long-rumored radio plan, here is where CHP Northern Division will be moving, *if* the licenses are approved and testing doesn't come up with any interference problems, as they have in a few areas.

Humboldt Dispatch Center (Humboldt, Crescent City & Garberville areas)
"(Northern) Green" will switch to 45.22 BR / 42.68m

Ukiah Dispatch Center (Ukiah & Clearlake offices)
"(Northern) White" will be 44.92 BR / 42.52m

Redding Dispatch Center (Redding, Red Bluff, Trinity River offices)
"(Northern) Red" on 45.14 BR / 42.64m

Yreka Dispatch Center (Mt Shasta & Yreka offices)
"(Northern) Purple" on 45.42.BR / 42.78m

Secondary "(Northern) Blue": 44.98/BRm / 42.56m

I haven't seen any change applications come through for Susanville Dispatch Center (Susanville, Alturas, Quincy offices) so they may stay on 42.08, or they *might* switch to 45.10 BR / 42.62m.

These changes were supposed to occur this Fall, but as Jake mentioned below, the winter weather is likely to delayed all of them well into next year.

Nope, you're 100% correct on that. In fact, if the local department or contractor doesn't have narrowband radios, they're generally sent home and removed from the qualified list.

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15336. CAL-FIRE HUU going to narrowband

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-11-13 03:05:58 UTC
From: Harry Marnell
Topic: 15336 Message: 15336

Across the state, CAL-FIRE is switching their frequencies to narrowband (*analog* - NOT digital) now that fire season is winding down across the state. Some areas have already made the move, and the Humboldt Del Norte Unit is scheduled to begin the transition next week on 151.25.

The only really noticeable change will be the audio level, especially if you're using a scanner not designed for narrowband. The audio of narrowband signals may be lower than that of "wideband" frequencies and you may want to find a compromise volume setting if you're scanning both narrow- and "wide" band channels (e.g. PDs and CHP). You may have already experienced that difference with USFS frequencies which have transitioned to narrowband over the past couple years.

Eventually CAL-FIRE will be adding new frequencies to their line-up, but that shouldn't be any time soon.

Harry

Butte (151.400) changed over a day or two ago.

Thanks. Is the audio issue very noticeable - especially if you're using an older scanner? Over here on the coast the Forest Service (SRF) levels dropped *way* down when they switched, and I find myself having to adjust the volume when they're busy - or using a separate scanner for their freqs. Guess I'll be able to put CAL-FIRE in there with 'em.

Tehama Glenn will be switching over the week of 11/15 to 11/18 to narrowband. For scanner listeners expect audio levels to be lower, much like USFS has been the past year or so.

Y'know, while these techs are going to all these mountain tops, they ought to add the new CHP frequencies too while they're up there, where applicable.

None of the new Northern Div "Red" license mods (45.14) had been granted yet, though three of the Green (45.22) and one purple (45.42) got the green light this past week. They could install 'em but just not use 'em until they're legal.

But probably completely different sites and different bureau-technocrats anyway.

In a lot of cases, the CHP and CalFire vaults AREN'T co-located. For example: CHP Fresno has a site at Meadow Lakes. The CalFire sites on the northeast side are on mountains in front and in back (southwest and lower; and east and higher).

Besides, the guys working on the CHPERS BS are separate from the regular district PSCD guys.

Imagine the purchase order and work order horror of the OPSCS techs in doing that. Oh the thoughts of saving tax payer money and efficiency!?!

At least they planned this in November to avoid the winter snow. Wonder how that's working out for them.

Well said, Eddie.

The original letter, along with one response and the form for "Reader Reaction" are at
http://tinyurl.com/FireRespondingToEMScalls

There's also, of course the manpower needed for simultaneous CPR & IVs, getting patient info from them or family/witnesses, lifting the patient, etc etc.

I suppose an outsider can't be expected to think of these things, but I see similar uninformed complaints coming up in newspapers' "Opinion" sections fairly often. Set 'em straight, guys.

No change in frequencies; for now they're "just" switching to narrowband on the existing frequencies. Eventually they're expected to add new interstitial frequencies, but I don't know how far along those plans are.

So all the freqs remain the same with a zero on the end correct?
And tones are the same I would think.

The frequencies are the same, (with a zero on the end if you go out enough places beyond the decimal). Information I received about the HUU change is that the repeater sites will have a separate narrow- & wide-band transmitters with different uplink tones *during* the changeover. I would assume they'll revert to the pre-existing tones after the radios are all reconfigured, but I can't confirm that.

KB6UJW Wayne BARRINGER wrote:
> Have the Command and TAC frequencies also switched to narrow banding?

Again, at least for HUU they're also changing the two Command freqs to narrowband at the same time. I haven't heard anything about the tac frequencies'.changeover schedule

Harry

Topic: 15346 Message: 15356

Reasonably good explanations of narrowbanding at
http://www.twoway.net/Narrowband.htm
http://wiki.radioreference.com/index.php/Narrowbanding

Bottom line is they'll be able to squeeze two usable frequencies into the space currently used by one, thus doubling the number of available freqs within a given bandwidth.

E.g., in CDF's 151 Mhz range between say, 151.22-151.28 where we now have,

151.22
151.235
151.25
151.265
151.28

after narrowbanding there will be available

151.22
151.2275
151.235
151.2425
151.25
151.2575
151.265
151.2725
151.28

Harry

I have nothing of note on my scanners. If it's anything it may be a control burn, but maybe it's just someone who has a fireplace in the wind near you.

If you subscribe (free) to FireDispatch.com, they do a great job of monitoring fire etc in Yolo County. Good source, easy to use..check it out.

I monitor CalFire in AEU, TCU, MMU, NEU, LNU & others...no noticeable change has taken place for me. I can't see it as something anyone need be sweating over.

I doubt you will be affected in scanning. If anyone has any new info on changes that will be affecting us, please get that out to us in the group.

Thanks

I drove yesterday down to Auburn from Truckee via Hwy20 and could see lots of smoke
off towards I80. I'm guessing some control burns. On the way home we took I80 eastbound
and didn't see any signs of smoke. Just now on the Plumas NF, I'm hearing what sounds like some control burns getting ready to take place. Heard references to "bring whatever torches" etc...

Later,
Todd

15368. Accept the cold hard truth

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-11-17 22:13:17 UTC
From: Jake H
Topic: 15368 Message: 15368

Fire season is over for NorCalFire.

I know what you must be going through. See a smoke column and the cellphone is half dialed to your local ECC before you see it's just a burn pile. Your excitement of drift smoke leads you to check your scanner volume to make sure you didn't miss the call, only to realize it's just chimney smoke. You smell something and think that's gotta be a campaign fire one or two Units away, frantically checking norcalfire and wildlandfire.com for news, in vain. You are in denial that the 3 inches of rain the previous week was a season ending event. Your spouse jumps up and down at that alleged season ending event, knowing they will now get your full attention without the three-beep pre-alert interruption, for the next 5 months.

I see this pain and confusion in all the emails the past few days wondering if something is burning. It's okay. I've been there. Many of us have.

Accept it. Go ahead and plug in those LE frequencies for the winter. We won't disown you. It isn't a sin unless it's fire season.

Thanks for a great yet quiet season on the list. Good job to the firefighters too for the short and fast attacks. Enjoy the rest this winter and we'll come back and do it again on NorCalFire for fire season 2011, cussing at our older scanners that aren't narrowband friendly. ;)

Mark,

Actually, no you didn't cross the line, as you did not provide any specific information. You only announced the incident is ongoing in Southern California.

Harry posted the same message to a couple of lists that had the item (in different flavors of detail).

15377. Deaths and injuries on the list

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-11-24 04:58:46 UTC
From: Jake H
Topic: 15371 Message: 15377

Thank you Harry and Don. In taking it one step further, to the list:

I don't want ANY info, hint, clue, nothing that an injury or death occurred to any on or off-duty public service employee on or off the job. Nothing. I want butterflies and blue skies. I want every family member and friend of a public service employee to be able to enjoy their life, their day, their time without their heart skipping ONE beat or a single thought of "what if" going through their mind, while reading NorCalFire. Put yourself in their shoes. Their phone beeps (like mine did for this list traffic, yet ignored) and they read that subject line "Fire Truck in Major Accident". Every one of them skips a heart beat and thinks "what if" and most of them probably stopped their day, dove into the interwebs to find more info, or called their spouse or friend at the station to check in. It is not fair to rob them of those heart beats and thoughts.

Mark, you're an original member from WAY back so you won't mind being an example to the list. ;) Your message was fine. Your Subject line was not.

Please send your prayers to all firefighters and their families and friends tonight. Those that will be there for Thanksgiving, and those that won't.

This is one of the major reasons why. Technology like twitter, facebook, blogs with rss feeds, mail groups like this one, etc can distribute info (right or wrong) to millions of people in seconds, with only a few seconds of typing. In one online news story, the email below, and a post on another list, I have already read three different numbers of fatalities. That is disgustingly absurd. The ONLY official word is from the public information officer, or designated person from the agency involved, in a press release, interview etc.. Not "breakibg news" CNN, abc, or fox, not twitter, not chp cad.

Funny how just about every person against this rule happens to make a nickel by posting breaking news.

What is absurd is CHP CAD is official! and none of these groups are officially anything so why pretend like you have to follow some old fashioned idea made up by some uninformed person?
Groups like this are being left behind quickly because of old farts with antiquated ideas, the same ones that will not follow the new rules such as clear text...
P.S. It is also making the PIO a buck when he gets to break the news, It makes them more relevant when justifying outrageous six figure salaries...

I agree with a moment of silence and condolences to the firefighter brotherhood and family.
He may of been a prisoner but he was a trained firefighter that died in the line of duty...

15385. Re: [NorCalFire] Re: Fire Truck in Major Accident

Yahoo group: norcalfire (2005 — 2016)
Date: 2010-11-24 06:46:55 UTC
From: Pamela Alley
Topic: 15371 Message: 15385

Folks...

Consider, just for a moment, the anguish caused to even a single family or family member when injuries and fatalities are inadvertently misreported.

I know that those who report this sort of thing as news mean well--they want to get the information out as soon as possible, and I would sincerely hope that they also want to get it right.

RIGHT is the key word, as in CORRECT.

To say, "Members of Unit XZ42 were injured or killed when their crew bus impacted a wall." seems innocuous, but if you had a son/daughter/husband/wife/loved one in Unit XZ42, you're going to go through a period of time that closely resembles Hell, waiting and not knowing for sure if your loved one is safe, injured or dead.

This is the kind of premature announcement which results in problems at the scene. Under-informed family members and friends ARE going to show up, they ARE going to be very concerned, and they WILL be in the way.

And when it turns out that it was ENGINE XZ42, and that the first reports of ID'd dead were wrong? That the deaths were civilian? You just put fire family through Hell for NOTHING.

All that is desired by rules of responsible disclosure (ie waiting for a PIO to issue a release) is to make SURE that reported information is correct--the first time out. You can hound the PIO all you want if a release isn't made within a reasonable time, but for crying out loud, don't cause the relatives and friends the avoidable anguish of irresponsible reporting.

A quick example...a few weeks ago, there was a nasty accident on Hwy 99, where two cars head-on'd and caught fire. There were reports, for a few minutes, that a CHP vehicle was involved. This was not correct; the CHP unit in question was attempting to push the non-ignited vehicle away from the one which was in flames--unsuccessfully, as it turned out.

Now, mind you, this was also an excellent example of delayed release of news. It was almost two days before any news agency picked it up and reported much of anything on it. The flip side of rushing news posting, this was severely delayed.

Just thoughts from over here in Lurkdom....

PA

My point is the "Fire Family" does not want or need special rights? If you report a United airlines aircraft down at SFO you are going to scare a lot of "Non Fire Family" folks do they have less need for accuracy?. Was the non fire family deaths less important? should you wait to report a aircraft down until some airport/airline PIO massages the message?

Topic: 12013 Message: 15389

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15391. Anyone know?

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-01-25 01:18:22 UTC
From: Mike
Topic: 15391 Message: 15391

There was a fairly significant plume of smoke that looked like it originated in the Lake Almanor or Chester area that was pushed south-west along the Cascades/Sierras to the bottom edge of Butte County where it changed direction and went due west.

It was very visible for miles on end and was kept low by the inversion.

Any idea what it was from or where it started?

Can't imagine much burning up in that area as it's loaded with snow...

Mike

It was a control burn NE of Forest Ranch near Forks of Butte Creek. Cal Fire sent an engine out around 1130 this morning to check it out as they hadn't been made aware of it.

15402. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-02-01 10:31:47 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15402

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

MODERATOR's NOTE: Nobody has to change their password. The member from whom the "bogus" email came - most likely the result of a trojan or other "infection" - has been placed on moderated status and advised to check his computer for adware, viruses, etc.

That's why the group has moderators, and we've already addressed it.

Based on what I've seen at work (I'm in the IT department) and what I can tell from the headers, it isn't a trojan or a virus - he entered his password into a phishing site - essentially a site that LOOKS like Yahoo but wasn't. The site he entered his password into then has his yahoo account information, logs in, and sends out the spam. I'm pretty confident a virus scan won't find anything since it isn't technically a virus.

Topic: 15413 Message: 15418

Thank you Evan. I suggested to him that he change his password in addition to the other scans, all of which are a good idea for everyone to do from time-to-time.

Harry

15420. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-04-01 09:27:29 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15420

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15422. Fire season

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-05-17 09:27:44 UTC
From: Two
Topic: 3782 Message: 15422

Over here on the coast, heard my first fire weather forcest of the season today on the Cal Fire channel.

I guess fire season is here. Who's going to be the first to say this will be the worst fire season ever. I think we got 1/2 inch rain today.

Joe Lacey

Seems every year is going be the worst year ever, like last year. However due to budget cuts, fire season will be reduced and arsonist's can expect massive lay-off's.

15427. Radio Swap Meet this Sunday

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-05-18 19:09:43 UTC
From: Paul Young
Topic: 15427 Message: 15427

It's a little short notice but thought I would mention it.

This Sunday from 0700-1200 is the North Hills Radio Club's yearly HAM swap meet. It is one of the largest and oldest in the Sacramento Valley. This year because of Livermore's Swap meet closing down it will be even bigger!

The meet is located at Natomas High School at Truxel and I-80 going Eastbound I-80 just past the I-5 interchange. There will be lots of radio's and electronic gear. No Kitchen Sinks are allowed :)

There is going to be Snacks and raffle's with high ticket items being raffled off.

Prices: Buyers are FREE! Sellers there is a $20 per parking place fee.

Talk in is on the K6IS repeater on 145.190 Mhz - PL. 162.2 and 224.400 Mhz - PL 162.2

For more info go to www.K6IS.org and or www.Facebook.com/NorthHills.RadioClub if nothing else....become a friend!

73's and hope you can make it out!

Paul Young

From: Jake H
Topic: 15428 Message: 15432

I've been seeing more Units trying the dual frequency idea of dispatch happening on local net and response occurs on a county or local command net of some sort. It's a boon for very busy Units that have dispatch after dispatch, keeps the channel clear. However it does require a mirrored infrastructure of repeaters etc to accomplish. With some homeland security grants I'm sure that was cheap or free. But Del Norte I can't imagine being busy on local net. So find some countywide repeater freq that is licensed to del norte and see if you hear responses on that.

Jake

From: twobells2@charter.net
Topic: 15428 Message: 15433

The two Departments in and around Crescent City respond to about 4 calls a day mostly ambulance. the other departments respond to about one call every 3 days , each. the dispach is still 154.250. There just isn't that much action here.

On Fri, May 20, 2011 at 10:29 AM, Jake H wrote:

I've been seeing more Units trying the dual frequency idea of dispatch happening on local net and response occurs on a county or local command net of some sort. It's a boon for very busy Units that have dispatch after dispatch, keeps the channel clear. However it does require a mirrored infrastructure of repeaters etc to accomplish. With some homeland security grants I'm sure that was cheap or free. But Del Norte I can't imagine being busy on local net. So find some countywide repeater freq that is licensed to del norte and see if you hear responses on that.

15434. Re: Del Norte County Fire frequencies question

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-05-20 21:26:44 UTC
From: Harry Marnell
Topic: 15428 Message: 15434

Here in Humboldt it's done pretty similarly to what you're saying, Jake. Any combined CalFire + Locals incident will be dispatched on both the HUU 151.25R and the 154.07R "County Net," with both the tactical (simplex) frequency and the command freq generally assigned at the time of dispatch. Unless things are really hopping, "Command" will be one of the two dispatch freqs (depending on who the incident belongs to), but it tends to be only traffic between the IC and Fortuna Dispatch

Most responding units will acknowledge on whichever (repeated) freq they're dispatched, but from then on MOST of the comms is on the simplex tactical freq.

In Humboldt County the 154.07 is the only repeated county fire freq, with multi sites, but even still it has a lot of dead spots. Perhaps Del Norte has a similar problem and they have to rely on simplex when repeaters would be "better."

OTOH of course, once you're on-scene, fireground ops is almost always better using simplex. You needn't worry about getting into a repeater 5 or 10 or 20 miles away when you're only talking to people within a few hundred feet from you.

15438. Virus emails on the list

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-05-26 02:59:44 UTC
From: norcalfire-owner@yahoogroups.com
Topic: 15438 Message: 15438

Please refrain from responding to obvious spam/virus emails on NorCalFire. There will be more and more of this as time goes on. It just adds to the noise level of the email list. Nearly all of the time, a moderator is 5 minutes away from a message on this list and will stomp on the offending account quickly and take care of the issue while alerting the end-user.

Thank you
Jake

Just saw this article about American Canyon switching it's fire dispatch
from CalFire to Napa Central.

http://www.timesheraldonline.com/ci_18170055

Anyone have info on frequency changes?

Have a safe & pleasant Memorial Day!

Thanks,

15440. Glenn: Technical Rescue, St John Mountain

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-05-31 16:09:40 UTC
From: Dan Newman
Topic: 15440 Message: 15440

Several county Search & Rescue teams are responding as mutual aid to Glenn County for a stranded climber on the back side of St John Mountain, which is a popular radio site on the west side of the valley. Elevation is 6700 ft. Per GCSO radio traffic, the conditions are non-flyable due to weather at this time. Should be able to hear Tac traffic on this rescue from Sac to Redding.

Glenn County SO: 155.550
Search & Rescue: 155.160

The rescue is turning into more of a search, as the victim has not yet
been located. GCSO has arrived at the Bear Wallow trailhead and located
a vehicle. The trail circles around the west side of St John into the
Snow Mtn Wilderness.

Location of trailhead: http://maps.google.com/maps?q=39.406973,-122.678146

15444. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-06-01 09:19:03 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15444

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Butte Fire on scene; two victims being recovered/treated (?), one female outstanding as yet.

Saw Rescue 7? headed N on 70 code 2 w/zodiac a while ago, just got in to listen. H24 and FlightCare in air, talking air to air apparently.

Very sad; thoughts and prayers indeed. Lousy weather, very wet but not as cold as it could be.

Let's hope nobody else gets hurt in all this. :(

From: Dan Newman
Topic: 15461 Message: 15463

They're using the new narrowband interop channels now. For scanner purposes, Vfire 21, 22 and 23 follow the same frequencies as White 1, White 2 and White 3, but are in narrow mode. Should be able to still hear them well with a wideband scanner, although I might have started a debate.

VFire26 has also been added to the available tac nets for BTU. Freq is 154.3025.

Hope this helps,
Dan

15468. Re: [NorCalFire] BUTTE: Power House Hill Road

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-06-14 19:21:46 UTC
From: Harry Marnell
Topic: 15461 Message: 15468

White 1, 154.28 will not be narrowbanded until 2013, at which time there
will also become available
VFIRE 24 - 154.2725
VFIRE 25 - 154.2875

Those two aren't to be programmed into fire radios until that time, due
to potential interference to/from wideband 154.28.

15473. Butte Fire Page Tones

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-06-15 20:12:52 UTC
From: Mike
Topic: 15473 Message: 15473

I have put together a system for monitoring a channel listening for specific tone-outs (2-tone sequence) and then upon hearing those tones, recording a pre-determined amount of traffic (45 seconds for instance) and then E-mailing that page and recorded traffic out to any E-mail address, cell phone or distribution list.

I am hoping to provide a Yahoo Group based notification service to any North County fire volunteer or scanner/fire/radio enthusiasts for free.

As I live in the mountains of Butte County, I worry about wildland fires during the summer. This concept started with a desire to be notified when my local Cal-Fire/Butte County Fire volunteer company was toned out during the summer and fall so I could pay attention to possible fire emergencies in my area.

What I need to do this though are the actual 2-tone paging frequencies (example: 640 Hz, 920 Hz).

Anybody have these tones for Butte County and what resources or volunteer companies they're for?

I'm hoping to identify them for the following:

Company 42
Company 21/22
Company 24
Company 45
Company 33
Company 37
Maybe Copter 205, Air Attack or Water-tender all call...

Because of where my home and radio sit, I don't get good quality reception for south county repeaters so this would primarily be for north county.

This information would ONLY be used for this purpose.

15474. BUTTE: Vegetation, Honey Run Road (Butte Creek Canyon)

Yahoo group: norcalfire (2005 — 2016)

Topic: 15477 Message: 15478

It's the Canyon Incident, near Junction City on 299 west of Weaverville,
2 or 3 separate fires per scanner traffic & CHP CAD.

Copter 102 sent from HUU around 1600 or so, though in Wildcad they now
show at Kneeland.

It's the Canyon Incident, near Junction City on 299 west of Weaverville,
2 or 3 separate fires per scanner traffic & CHP CAD.

Copter 102 sent from HUU around 1600 or so, though in Wildcad they now
show at Kneeland.

Yosemite Fire Update #2
Mid-Day - June 26, 2011

A new fire, the Bald, was reported on June 24, 2011, by the Yosemite Helitack, and Stanislaus National Forest's Pilot and Smith Peak fire look-outs. It is suspected this is a lightning caused fire holdover, from the June 5, 2011 thunderstorms. Fire crews will investigate the site of the origin for cause determination.

Bald: (37 50.823x119 47.434, approximate el. 6,200', Tuolumne Co.). The fire is approximately 150 plus acres in size. Fire activity increased in the afternoon on June 25, 20111, moving toward the east. The suspected cause is lightning of June 5, 2011. The fire is in wilderness, but is within a zone where fires are put out due to threats to property, structures and other infrastructures. The fire is approximately 1.5 miles northwest of the community of Aspen Valley. Today, Yosemite Firefighters will be joined by "Hot Shot" crews from the Sequoia and Stanislaus National Forests and Sequoia National Park. In addition, the Stanislaus National Forest Helicopter will assist with air operations with water bucket drops and equipment hauling. Many fires have occurred in this area over the years due to lightning, the largest being the 1996 Ackerson Fire, which burned over 60 thousand acres in the Park. The fire is burning in a remote area and the terrain is steep and rugged. Firefighters indicated there was a moderate rate of fire spread and spotting through the brush. Minimum Impact Suppression Tactics (MIST) are being utilized by firefighters to minimize impacts to wilderness. For example, utilizing natural fires breaks of rock areas rather than cut hand line.

Additional resources have been ordered including two more 20 person Hot Shot crews. A total of 130 firefighters will be on scene for tomorrow's operational period.

The Cottonwood/Ackerson Trailheads, access to Aspen Valley, are now blocked, signed and closed to hikers and pack stock.

Cottonwood: (37.9043x119.8024, 5,000' el., Tuolumne Co.) This fire was found on June 6, 2011, after a thunderstorm of June 5. A decision was made to put the fire out on June 23, 2011. The fire is in patrol status, and will monitored on a regular basis

Smoke from the Bald Fire is visible from the Tioga Rd., west of White Wolf, and along the Evergreen Rd., near Ackerson Meadow, and in some locations along Highway 120 into the park from Buck Meadows. It is dispersing toward the northeast from the Bald Fire. This fire is remote will pose no health or driving hazards from smoke.

Date: 2011-07-01 09:07:52 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15484

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15485. BUTTE: Lake Oroville, fireworks

Campfire/BBQ under high tension lines at Humboldt Road. Responsibles under arrest by Chico PD.
Multiple reports from all sorts of places of aerial fireworks.
Dumpster fire at the AM/PM gas station (Olive Hwy, Oroville)
Small vegetation fires from fireworks here there and everywhere, most out by locals.
Gold Country Casino fire not located, fwks still being done there.
Veg fire 40x40 corner that's known for its high weeds (Washington and Mitchell, Oroville)
Confiscation large amount aerial and illegal fireworks with a warning.
Nothing ever found on the lake call far as I can tell, hope everyone is ok.

Family quarrels, assault, etc. that we get every holiday...every drinking day...

Hope everyone's 4th (and early 5th!) is safe and sane...

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Vegetation, multiple reports incl. from the Feather Falls Casino area.

Full callout incl. air support.

Area is high in dry grasses and oak woodland with some residental bordering areas. Nearby is a 90-acre undeveloped lot (most likely location, come to that) where many people come to dirtbike :(.

Just a bit down the road from my place.

Lincoln IC on VFIRE 23

Multiple vegetation fires along Railroad from Messina to Kusel. Just called four more engines. Contacting the rail company to let them know they've got something throwing sparks.

Apparently this is along the railway itself. At least four separate fires, all thus far fairly small.

Nothing further unless something drastic happens. :)

Yosemite Fires - Update #12 – August 15, 2011

Avalanche Fire: (37 39.794 x 119 42.238; 6,400'el. Mariposa Co.) This lightning caused fire has been burning in Yosemite National Park since it was discovered on the afternoon of July 31, 2011. The fire was observed during a reconnaissance flight near Avalanche Creek and Glacier Point Road within Yosemite's congressionally designated wilderness area. The fire is at 940 acres. At present the fire continues to be managed for multiple objectives including resource values, community protection and firefighter safety.

Smoke is visible from the Valley, Glacier Point Road and in the direction of transport winds. Park fire managers and firefighters are sensitive to smoke, visitation, and human health concerns and are therefore diligently timing burning operations to coincide with optimal smoke dispersion. The park is collaborating with the Mariposa County Air Pollution Control District (MCAPCD) by communicating daily concerning potential air quality impacts, mitigations, and to support each agency's responsibility to public health.

Air monitoring equipment is installed within Yosemite West, El Portal and Yosemite Valley to obtain daily air quality levels. As the fire continues to grow, landscape features have been identified as management action points within the planned perimeter. Much of the proposed fire line is along roads, trails, and previous fire footprints. These geographic points could limit fire spread when air dispersion is poor, and then can be accelerated when the atmospheric conditions improve. Actions may be used by firefighters to minimize and reduce smoke impacts, such as helicopter water drops to cool portions of the fire.

Firefighters remain on scene through nighttime hours to insure holding the fire to the east of Glacier Point Road. As the fire moves closer to the roadways, the presence of firefighters, fire equipment and smoke will increase. Drivers are urged to adhere to posted 25mph speed limits, possible single lane closures and traffic officer instructions.

Firefighters have begun to back the fire down to the Chinquapin facility and complete the Glacier Point Road portion of the fire perimeter. One hundred and six firefighters are committed to the fire, including units from the USFS and BLM.

Combined with previous fires, roadside mechanical thinning, vegetation debris pile burning, and prescribed fires, this fire will provide a defensible fire buffer to the communities of Yosemite West, Badger Pass Ski Resort, Glacier Point and other park infrastructures. Although numerous fires have occurred adjacent, the most recent being the 2009, 3,500 ac. Grouse Fire, this area has no recorded fire history. Extensive logging did occur in the early 1900's. Given the time of the year and seasonal severity below normal for time of year, this fire will meet the objectives with minimal risk to other values, including firefighter and public safety, federal and public property, air quality, and wilderness values and character.

Managing naturally occurring lightning fires is consistent with the current Yosemite Fire management Plan and Environmental Impact Statement.

I know this is off topic and late info but since it deals with weather I thought you might be interested in it.

The National Weather Service (NWS) will be conducting Weather Spotter Training (WST) in Red Bluff,CA. on Saturday August 20,2011. The training will take place between Noon and 2 PM at the Red Bluff Community Center, 1500 South Jackson Street. This training is co-sponsored by KRCR-TV and the Tehama Office of Emergency Services (OES).

For those of you who know people in that general area who would like to become weather spotters,please let them know about this class and have them RSVP Eric.Kurth@... . If you haven't had training in awhile and would like to have a refresher, you are more than welcome. We are especially interested in finding spotters for more remote portions of Tehama/Shasta/Colusa Counties.

Yosemite Valley, CA-- Fire crews from the Stanislaus National Forest are assisting with the now 600-acre Motor Fire on Highway 140 near Yosemite.

"The Motor fire started in the Sierra National Forest in the Merced River Canyon, but did jump the river and is moving towards Trumbull Peak on the Stanislaus National Forest," said Forest Spokesperson Jerry Snyder. "The fire command still belongs to the Sierra National Forest but the Stanislaus Forest has a number of units assisting. We have five engines that are involved and three hand crews."

According to CAL Fire, air resources from Columbia are also helping out. Today air attack was diverted to the Motor Fire, after there were no signs of an earlier reported fire in the Pinecrest/Punchbowl area of the Stanislaus National Forest.

The Motor Fire reportedly started after a motor home caught fire. Highway 140 into and out of Yosemite National Park remains closed due to the fire. There is no estimated time on when it will reopen.

15536. BUTTE: Vegetation, Sawmill LO access road

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-08-27 06:26:55 UTC
From: Pamela Alley
Topic: 15536 Message: 15536

Report from Paradise resident and Sawmill LO; vegetation in area of Sawmill Peak Rd and Jordan Hill Road.
Jordan IC on Tac 11
2254
Butte Fire 151.400

As of 2322:
Confirmed vegetation, small amount torching and spotting, going to be interesting to access from the sound of it.

PA

15537. BUTTE: Vegetation, Cohasset

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-08-28 13:18:46 UTC
From: Pamela Alley
Topic: 15537 Message: 15537

Cohasset Rd x Sigler? Rd, vegetation, multiple reports

Requesting Copter 205 to help pinpoint the fire; column clearly visible but difficult to pin down. found it; 4-5 acres woodland, walk -in access until dozers get in there.

Cohasset IC on Tac 9
0617
Butte Fire 151.400

15538. Re: [NorCalFire] BUTTE: Vegetation, Cohasset

Yahoo group: norcalfire (2005 — 2016)

From: Pamela Alley
Topic: 15537 Message: 15538

Apparently this incident is inclusive of a marijuana grow; Level I Hazmat called.

They're up to five water tenders, with plenty of fuel in the area as well. 2 dozers, 2 crews, lots of people working hard out there! :)

15539. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-09-01 09:20:14 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15539

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

NORTHERN SIERRA FOOTHILLS FROM 1000 TO 3000 FT. INCLUDES PORTIONS
OF SHASTA-TRINITY AND BUTTE UNITS-EASTERN MENDOCINO NF-
341 PM PDT THU SEP 8 2011

...RED FLAG WARNING IN EFFECT FROM 5 AM FRIDAY TO 11 PM PDT
SATURDAY FOR GUSTY WINDS AND LOW HUMIDITY FOR FIRE ZONES 213...
215...216...263...266 AND 279...

THE NATIONAL WEATHER SERVICE IN SACRAMENTO HAS ISSUED A RED FLAG
WARNING...WHICH IS IN EFFECT FROM 5 AM FRIDAY TO 11 PM PDT
SATURDAY.

* AFFECTED AREA: FIRE ZONES 213...215...216... 263...266...AND
279. THESE INCLUDE THE NORTHERN AND CENTRAL SACRAMENTO
VALLEY...THE NORTHEAST SACRAMENTO VALLEY FOOTHILLS... NORTHERN
SHASTA COUNTY...AND THE MENDOCINO MOUNTAINS FROM SOUTHWEST
SHASTA COUNTY TO NORTHERN LAKE COUNTY.

* WIND: NORTH WIND 10 TO 20 MPH WITH LOCAL GUSTS TO 30 MPH WILL
DEVELOP ALONG THE NORTHERN AND WESTERN SACRAMENTO VALLEY AND
ALONG THE MENDOCINO MOUNTAINS EARLY FRIDAY AND CONTINUE THROUGH
SATURDAY. ALONG THE NORTHEAST FOOTHILLS...NORTHEAST WINDS 10 TO
20 MPH WITH HIGHER GUSTS THROUGH CANYONS WILL BE POSSIBLE.

* HUMIDITY: AFTERNOON RELATIVE HUMIDITY WILL BE IN THE SINGLE
DIGITS TO LOWER TEENS. OVERNIGHT HUMIDITY WILL ONLY RECOVER INTO
THE 10S TO AROUND 30 PERCENT.

* IMPACTS: VERY DRY FUELS...GUSTY NORTH WINDS AND VERY DRY
CONDITIONS WITH POOR OVERNIGHT HUMIDITY WILL CREATE POTENTIALLY
DANGEROUS FIRE WEATHER CONDITIONS EARLY FRIDAY THROUGH LATE
SATURDAY.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A RED FLAG WARNING MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE EITHER OCCURRING NOW...OR WILL SHORTLY. A COMBINATION OF
STRONG WINDS...LOW RELATIVE HUMIDITY...AND WARM TEMPERATURES WILL
CREATE EXPLOSIVE FIRE GROWTH POTENTIAL.

15549. Weather Spotter Traing by the National Weather Service in Marysville Sept 22nd.

Yahoo group: norcalfire (2005 — 2016)
Date: 2011-09-10 05:45:15 UTC
From: Paul
Topic: 15549 Message: 15549

The National Weather Service (NWS) in Sacramento will be conducting Weather Spotter Training in Marysville on Thursday, September 22, 2011. The training will take place between 6:00 PM and 8:00 PM at the Yuba County Government Center, at 915 8th St., Marysville. This training is co-sponsored by the Sutter and Yuba county offices of emergency services.

Weather Spotter training will enable interested citizens to be become volunteers for Project SKYWARN, which helps keep local communities safe by providing timely and accurate reports of severe weather to the National Weather Service. No equipment is required, and the training is free. For those of you who know people in that general area who would like to become weather spotters, please let them know about this. If you haven't received training in a while and would like to have a refresher, you are also welcome. We are especially interested in finding spotters for the more remote, rural portions of Sutter and Yuba counties. If you need more information on the training, send an e-mail to Eric.Kurth@....

There will also be an opportunity to discuss and join CoCoRaHS (Community Collaborative Rain, Hail and Snow Network) at the Marysville training. CoCoRaHS is a unique, non-profit, community-based network of volunteers of all ages and backgrounds working together to measure and map precipitation (rain, hail and snow) across the U.S.

Online spotter training will be held on Tuesday, September 27th. More information on how to sign up and participate will be provided on this page shortly.You can also request a sign-up by sending an e-mail to Eric.Kurth@....

You can also take a On-Line Spotter coarse by going to NorCalSkywarn.com

This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

15563. Eureka FD radio changes

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-01-06 06:30:53 UTC
From: Harry Marnell
Topic: 15563 Message: 15563

Eureka FD / Humboldt FPD #1 are planning to switch their radios to narrowband by the end of the month. Tthe frequencies won't be changing, however look for newly-licensed 155.835 to be added to their line-up, as Tac 5, simplex. Listen for some radio testing over the next couple weeks.

The only noticeable change will probably be lower audio volume on scanners and other radios not designed for narrowband reception. Compared to Eureka PD's strong signal, the difference *may* be significant until the PD changes over too, but they don't even have an application in with the FCC yet.

For those not familiar with the area, EFD (which covers the city) and Humboldt FPD (surrounding unincorporated area) are in the process of formally consolidating into a single agency. They've had joint dispatch by the City of Eureka and automatic and / boundary drop for almost 20 years, and last September in what began as the familiar budgetary mess everybody's going through, the City and the Fire District board agreed to hire a single chief who is now head of both departments:

From: Mark
Topic: 15563 Message: 15568

Thursday afternoon Utility 8108 was out doing narrowband testing on the Command 4 repeater 153.95, with good signals between him and headquarters in some areas, and "not loud and background noise present" reported when he was down in the low-lying Elk River areas, not really unexpected. If they were testing any of the simplex frequencies I was to far away to hear them either way.

It looks like they are starting to use a joint aka of "Humboldt Bay Fire," similar to the "CAL-FIRE" aka.

Reno is close enough to Nor Cal.

Remember that we still have some months left before the heat and, at least here in the Bay Area, it rained off and on into early June last season.

However I agree, low rain equals dryer fuel.

Lets limit discussion of any deaths to official press releases only please. Just throwing the word around without the meat to back it up (official press release) simply causes undue speculation and worrying. Thank you for the link. It is quite a half-assed "release" of info though that doesn't answer much. Wondering if it's an actual statement or media jumping the gun on radio traffic...

Thank you

15577. RE: [NorCalFire] off subject but....

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-01-20 08:42:31 UTC
From: John
Topic: 15569 Message: 15577

The other news channel also stated the chief confirmed after the 9:00 press conference there was one death they found in the fire area but they cannot confirm it was fire related or… I stopped flipping tv channels since most are running old stuff. I been listing to my scanner.

Rgj.com is slow to update and that’s why most watch 4..

Things so much faster here so I wouldn’t doubt tomorrow early am there will be a update from the press lady here with all the info. I cannot believe how much they do here in little time. I guess extra resources help out… I only hope Cali will get back on its feet and help out Cal Fire.

John

Best updates from local places ..

http://www.rgj.com/

http://www.mynews4.com/default.aspx

The wind is crazy here right now.. I would say 60+ gusts north of reno..
They were hoping the snow would start last night but looks like the west
side will get most of it as normal..

I am just east of the tops of the Sierras and the dark clouds are now just rolling over. Looks like a lot of areas will have a mix coming soon and it should all turn to snow tonight . The snow pack has been very limited to mostly the western side of the Sierra so we are very dry up here.

15582. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-02-01 09:58:48 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15582

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Question: How does one get hired on a crew for the season. Always heard you had to get hired on in January but have been to a few of the local rural departments, Forestry local, and have not been able to find any information. I have know a couple guys who were hired on and were out of Dewdrop in Amador county. Any help or advice welcomed

Hopefully I am not breaking any rules with this post..

Thanks..

A lot of what you want can be found here:
http://wildlandfire.com/jobs.htm

http://www.fire.ca.gov/about/about_careers_fireprotection_seasonal.php
Although Calfire hiring usually ends Jan 31st each year

From: Pamela Alley
Topic: 15588 Message: 15588

My email is changing from RNRQ@... to RNRQ@... . Please make the change in your address books ASAP so I don't miss any mail from you!

I know some of you are going to be seeing more than one of this email, and I apologize...but I want to make sure you know how to reach me! :)

Thanks, all, and have a great year!

PA
(crazy rabbit lady) :)

Topic: 12013 Message: 15589

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15590. BUTTE: Oroville, Lemon Hill IC

Yahoo group: norcalfire (2005 — 2016)

From: Pamela Alley
Topic: 15590 Message: 15590

Residential, smoke and fire showing at 12 Lemon Hill Drive, Oroville.

I believe they said it was a 'high rise' residential but not certain.

County says it's city, city says it's county, so they both dispatched.
Sounds like a good plan. Medical on standby for firefighters.

Lemon Hill IC
Butte Fire 151.400
Oroville Fire (I don't have it sorry)

15595. BUTTE: Jordan Hill Road and Oroville City

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-05-06 16:36:50 UTC
From: Pamela Alley
Topic: 15595 Message: 15595

Sounds like we have two incidents going; just came in and heard it, so trying to make some sense out of the calls. One of the two just called for second and third alarm.

There's a fire on or near Jordan Hill Road (also mention of the U line and lack of access w/o dozer); they just turned two engines around from responding there to head to the Oroville incident, which I have NO clue on...wait. CHP CAD has a report that the sawmill on Georgia Pacific Way is possibly on fire....

Oroville incident is on Tac 1...Ah. South IC there, 3050 5th Avenue. Working commercial structure, 3rd alarm now going out for CALFIRE engines, with the usual move up and cover reassignments.

Anybody else have more?

Vegetation fire, report of dark smoke and flames in the field. Access off of Ithaca. Appx one acre spot.

Coming as it does on top of an 11-acre vegetation out on Grubbs Road earlier today, I'd have to say fire season is *here*. :(

Brisk wind earlier today, not sure about now.

Welcome to summer, I guess....May all your fires stay small!

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-06-11 02:02:06 UTC
From: Mike
Topic: 15606 Message: 15606

This is about wrapped up but a 20 acre fire in Upper Bidwell Park in Chico. Chico Fire and CalFire responded. Tacnet is/was VFire 22.

15607. Tehema County: Windy IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-06-11 02:04:43 UTC
From: Mike
Topic: 15607 Message: 15607

Wildland near "Windy Cut" on Highway 32 about 30 miles north-east of Chico. Tacnet is NIFC 2 I believe but could be wrong. I know it was a NIFC tacnet. This one may go for a bit. They're planning on aircraft for tomorrow (3 tankers, 3 type 2 copters and one air attack).

15608. Re: Tehema County: Windy IC

Windy IC giving a report on Butte Support.

Fire is currently 140 acres

FBI at scene (read into it what you will)

Two divisions (Alpha & Zulu)

Resource Order for tomorrow:

10 engines
4 water tenders
2 dozers
10 handcrews
3 tankers
3 type II helicopters
1 Air Attack
1 Fuel Tender
1 Finance Officer
Misc other stuff

Topic: 12013 Message: 15613

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15614. Butte: Vegetation, Cherokee Rd. & Oregon Gulch Rd.

Lots of mention of Maxwell....would that click? It's a part of Cal I don't really know very well at all....

LOADS of smoke in the sky over west of here and north of here....not exactly a surprise.

Fair bit of activity overall; definitely picking up out-of-area stuff.

Forbestown fire is contained at 1-2 acres. (Yay!! Fires up that way have quite a bit of fuel to play with.)

CA-MNF-Mill is roughly 2500 acres on the Mendocino Forest. West end of fire is Letts Lake and east end made it to the wouthwest edge of Stonyford community. Very large orders for structure protection in Stonyford proper. Timber crowning and torching, good runs in afternoon. Started Saturday right about when TGU-Butte started.
169.175 Command
167.950 Air Tactics

CA-LNU-Sites Complex is roughly 5000 acres, a complex of 4-5 fires with most near or at containment except for the Grapevine Fire, which is closest to the reservoir (farthest west fire of the complex). The VLAT Tanker 911 was just deployed today and made their first drop about 1740. Load and return out of McClellan.
151.355 Command

Both fires' edges are within a few miles of each other. Lots of resources pouring into both incidents. Both command and air tactics have been on http://www.scancal.org live scanner.

based on the drift smoke which is laying more easternly, not sure if they had a wind shift or not.

http://www.williamssoaring.com/web-cam-pages/webcams.html

also heard Incident Management Team 4 took over the complex a few hours ago.

Yesterday I got a gander at these fires as I drove past them. For those of you who have not had the opportunity to see them and would like a frame of reference for specifically where they are relative to your individual knowledge of the area you are invited to take a look yourselves: http://eclecticarcania.blogspot.com/2012/07/grapevine-fire-mill-fire.html

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-07-12 00:57:31 UTC
From: Loyd Reedy
Topic: 15640 Message: 15641

Several homes in the Foresthill area are being evacuated due to a wildfire that so far has burned 70 acres.

Daniel Berlant, spokesman or the California Department of Forestry and Fire Protection, estimated that 20 to 30 Calfire engines had responded to the fire and assistance has been requested from a number of area fire agencies including the Sacramento Metropolitan Fire District.

The fire, dubbed the Robber Fire, is in the area of Shirttail Canyon and Yankee Jim roads on the Foresthill side of the American River Canyon. Berlant said is burning from the river up the side of the canyon.

The cause of the fire is not known at this time, but with the high temperatures, low humidity and dry conditions, it doesn't take long for a small fire to get out of hand, Berlant said.

He said 25 acres had burned by the time firefighters arrived.

finally google found the tanker. Ended up being P-2 Neptune N9855F. First time seeing this aircraft taking off headed for Robbers fire and is interesting watching the different aircraft in and out of McClellan. My camera phone photo was not worth posting... oh well! worth the try

Another stealth tanker conspiracist? Don, get the probes ready.

Tanker 40 has been flying around lately up here. A BAe146 jet. It's much quieter than an S2T, you can barely hear the jet. You hear him on radio so you know he's there, with a hint of jet noise, but with the smoke haze on the valley floor you just don't see him. Went back inside to readjust my foil hat and foil extenders on the scanner antenna...

Owned 5 acres at/near this intersection, W/NW of the OWID canal a few years ago. A couple of mobile homes in one cluster at the very end of Grubbs, lots of open grass across Grubbs and beyond Dunstone to the East, SE and SW

Interested in specifics.

15659. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-08-01 10:00:08 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15659

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

I believe this is physically within Shasta County; in the Shasta-Trinity National Forest surrounding I-5 just north of Shasta Lake.

No matter what, there may be scanner traffic and media attention in both counties because of evacuations and the I-5 closure.

The Redding R/S is reporting 225 acres, 1 structure destroyed, evacuations, gasoline shortages in Lakeshore (a very small town near Antlers Rd exit on I-5), traffic delays, etc.

15676. Re: [NorCalFire] BUTTE: Lassen IC (Vegetation)

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-08-14 03:30:13 UTC
From: Mike Larish
Topic: 15673 Message: 15676

Yes but it is well out of Butte in Tehama County. I checked the coordinates given by AA 210.

Sent by my carrier pigeon...

15677. UPDATE: Butte: Lassen IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-08-15 05:21:48 UTC
From: Pamela Alley
Topic: 15677 Message: 15677

http://www.krcrtv.com/news/local/UPDATE-Lassen-Vegetation-Fire-Grows-to-700-Acres/-/14322302/16107940/-/lkxgbf/-/index.html

Went to some 700 acres and is at 10% containment. Poor access and terrain issues (Type 3 only per last night) are interfering.

PA

From: Pamela Alley
Topic: 15677 Message: 15679

Thanks for the clarification--that name changewill make keeping track of this one much easier (people keep asking about the fire IN Lassen Park when I talk about the one off of Lassen Trail...*sigh* Mill it is!)

Another good frequency to listen to if you like to listen to aircraft
en route to fires is 168.650 which is the National Flight Following frequency. I live in Rancho Cordova which is across town from the Tanker Reload Base at McClellan (KMCC). Yesterday on 168.650 I heard Tanker 911 en route from McClellan to the Ponderosa Fire, and this morning I heard MAFFS 6 en route from McClellan to the Rush Fire.

I've been listening to both Tanker 910 and 911 coming in and leaving McClellan. They have had a about a 35 minute turnaround getting fuel and retardant. It's amazing how fast the turnaround is. I live close enough to the base that I can hear them powering up the engines for takeoff.

I'm only hearing them on the tower freq 122.975. If there are any other freqs I'd like to know.

I was posting a bit of their movements on twitter.
So follow along if you like. Twitter.com/Sacmobile11

15694. Area fires freqs

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-08-21 06:58:22 UTC
From: Jake H
Topic: 15694 Message: 15694

TGU-Ponderosa
Command: calfire cmd 7
Air to air: 167.150
Air ground: calfire tac 22
Copters: 123.825

BTU-Mill
Command: Butte Support and possible nfc cmd 2 and/or 9 linked. They've been having crazy commo problems on this fire, rightfully so with the terrain and remoteness. This is a very RF quiet area. Every COML should have to pass a final designing a command net that provides 100% coverage of Mill Creek Canyon from Hwy162 to the valley, with three freq pairs only. ;)

PNF-Chips
Command: nifc cmd 11 on Butt Mtn (excellent valley coverage), nifc cmd 6 on Mt Hough, and nifc cmd4 on Red Hill
Air victor has been 120.525 if I recall

LNF-Reading
Command: nifc cmd 1 but antenna pattern is not conducive to hearing this in the valley. I didn't really start hearing this until shingletown/hwy44 when I went up last weekend. Plus in the beginning stages lots of command mixed between lnf forest and lassen park net (which was ugly to listen to because park net operates in mixed-P25/analog, what a disaster for mutual aid. Conversations in half analog half digital make interoperability a joke, but with the politics coming off this fire and the Park Supervisor, I'm not surprised those idiots were still in P25 mode 3 weeks into this fire. Park Service, they get millions of $$ to buy new radios, and zero $$ how to use them. Whiskeytown the same way.

MEU-Pass
Command: nifc cmd 8
Becoming unified with MNF so expect mendocino forest freqs to light up too. 171.550 MNF fire net I think was hot monday.

From: Bill Truscott
Topic: 15682 Message: 15696

Paul and the group,
If you are close enough to McClellan to hear the aircraft as they take off, and can hear the pilots
on McClellan UNICOM 122.975 then I would suggest you give 123.975 a try! 123.975 is the Nationwide Tanker Base frequency that is used by CalFire as their base operations frequency.
at McClellan. On the UNICOM frequency you hear all the inbound and outbound aircraft, but if
you just wantto hear the tankers coming and going, and why they are coming and going, then 123.975 is the frequency you need.

:-)
Bill

I've been listening to both Tanker 910 and 911 coming in and leaving McClellan. They have had a about a 35 minute turnaround getting fuel and retardant. It's amazing how fast the turnaround is. I live close enough to the base that I can hear them powering up the engines for takeoff.

I'm only hearing them on the tower freq 122.975. If there are any other freqs I'd like to know.

I was posting a bit of their movements on twitter.
So follow along if you like. Twitter.com/Sacmobile11

From: Mark
Topic: 15695 Message: 15697

As of the 7:15 a.m. report this morning there is no report of specific damage in that area, but

"Evacuations for the following areas in Manton, Shingletown & Viola:
•Forward Rd at Graham to the C Line
•Forward Mill Rd from Rock Creek Rd to Forward Camp Rd
•Rock Creek Rd from Manton Rd to Long Hay Flat Rd
•All of Long Hay Flat Rd and Woodcutter Way

and others

Road Closures:
•Hard road closure on Hwy 44 from Brush Creek Rd to Viola and Forward Rd at Manton Corners.
•Rock Creek at Wilson Hill Rd off of Manton Rd.
•Manton Rd and all roads leading out of Manton have been closed at Hwy 44 at Brush Oak.
•Hwy 44 in Shingletown and Viola areas and all roads south are in controlled traffic mode.

Here is CAL-FIRE's regularly updated page for this fire,
http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=722

Thank you - I have been monitoring everything I can find. There was a facebook post on the open group Ponderosa Fire 2012 that a man had heard a radio transmission that Mountain Meadows Church Camp did not have structural damage - hard to believe from the Enplan site - but have property very very close to them that I am curious about. Thanks again

Jake and the group,
I found the flight following frequency of 168.650 that I posted yesterday in the Air Attack Section of Scancal.org!
What I like about listening to flight following is that the pilots name the fire they are heading to.

THANKS!
Bill

15701. New start??? Column seen

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-08-24 03:09:13 UTC
From: Pamela Alley
Topic: 15701 Message: 15701

What appeared to be a new, stubby column showed up on my drive back to Oroville from Chico, about an hour or so ago. It had build on it, no plume, which makes me think it may be a new start??? From the middle of hwy 149, if you stood in the Openshaw intersection with your back square to the STOP sign, it was close to straight ahead. Distance...considerable, way out there, definitely up in the hills a fair bit. Dark smoke.

Main smoke mass from Ponderosa etc was distinctly north of this one.

Does anyone have any info on what this might be?

Pamela,

The Hotlist showed a one-acre fire in the Jones Valley area around 5:30-6PM but that would have been north of the Ponderosa... could it have been a firing operation at the south end of the Ponderosa or even one on the Mill Fire?

Rush Fire 320,793 acres - The fire has burned 275,650 acres in California
and 45,143 acres in Nevada. It now has burned an area measuring 42 miles
long and 16 miles wide and is completely east of U.S. Highway 395.

From: Kim Noyes
Topic: 15705 Message: 15708

NIOSH and one USDA reference are the only sources I see using that
statistic and they don't show from whence they derived that number.
Near as I can tell everybody else is using 273,246 acres not the least of
which is CALFIRE:

http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=57

http://www.fire.ca.gov/communications/downloads/fact_sheets/20LACRES.pdf

Do you have any idea where the larger number comes from and why it is more
accurate?

Kimmer

Interesting.... so that number was from back at the time while since then (9 years later) the other number has been the number settled upon as the official acreage given how that just about everybody else is using it including the agency who compiles the top twenty list.

Today on 168.650 National Flight Following, Tanker 911 reported off McClellan with a 18 minute ETA to the
North Pass Fire. Pilot also advised North Ops in Mendocino that they had 3 souls and 2 1/2 hours of fuel
on board. On Tanker 911's next load out of McClellan, the pilot informed Susanville Dispatch that that they
were released from the North Pass Fire and were en route to the Chips Fire.

From: Kim Noyes
Topic: 15705 Message: 15715

Rush Fire size has been updated. Now instead of the Rush Fire having burnt 2,000 acres in California more than the Cedar Fire burned en total, due to more precise mapping the size differential has been trimmed down to TWO ACRES difference with the Rush still holding the lead.... barely.

"The new acreage figure is the result of more precise mapping. The fire has burned 273,248 acres in California and 42,844 acres in Nevada." Source: http://inciweb.org/incident/3151/

The Cedar Fire burned 273, 246 acres.

15716. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2012-09-01 10:31:34 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15716

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Okay guys, just walked in to hear tanker release on this incident. CHP CAD says Honey Run x Skyway, apparently 80-90% contained?

Anybody got more info? I have a resident friend up the canyon who's very worried and wants data, so more would be nice... :)

Thanks, all!

From: Bill Truscott
Topic: 15721 Message: 15721

168.650 Nationwide Flight Following
MAFFS #6 and MAFFS #8 were dispatched out of McClellan this afternoon for a new start in Shasta County.
MAFFS #6 departed McClellan at 15:30 local and MAFFS #8 departed McClellan at 15:45 local. ETA given
to the Power Fire which is located west of the town of Burney was 30 minutes.

Bill Truscott
Rancho Cordova, CA.

Manuel you are correct...

I'll add the letter designator at the end designated type of team (type 3's, dozers, hand crew, etc....).

After a brief "googling" of this topic I found that LNU has used the 13 before (found a posting dating back to 2009). I would imagine that the 13 is used for LNU West and the 14 for LNU East...

MAFFS 8 along with Tanker 910/11 are at McClellan. Just saw them yesterday. Along with MAFF 8 there is another USAF C-130 I'm guessing it's supplies. It's unmarked.

Maybe it was an error on the callsign? I am listening to
my tape from Thursday and I am hearing MAFFS 2 giving Chico's
frequency of 123.975 to MAFFS 8. Then on my tape is MAFFS 2
advising Mendocino Ops that they are 3 minutes ahead of MAFFS 8
en route to Chico for a load and return to the Likely Fire.

Tape on request! :-)

Topic: 12013 Message: 15742

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15743. Where'd the smoke come from?

Topic: 15743 Message: 15743

Wow, we just got flooded here in Oroville with a HUGE wall of smoke a bit ago; not hearing much on anything like what you'd expect, bar a 2.5 acre fire somewhere near a levy road.

Wind has definitely come up....I saw it come in, seemed to come from southwest.

Ideas?

Thanks!

From: Harry Marnell
Topic: 15748 Message: 15748

Effective January 1, 2013, EUREKA FIRE DEPARTMENT and HUMBOLDT FIRE DISTRICT #1 are consolidated as a Joint Powers Authority now known as "HUMBOLDT BAY FIRE AUTHORITY"

Unit numbering, frequency usage and "Boundary Drop / Automatic Aid" have long been established with this consolidation in mind, so will not be changed for the foreseeable future, and dispatching continues to be handled by the Eureka PD/FD PSAP at Eureka FD Headquarters.

15751. BUTTE: CHP and fire heading up 162, what's happening?

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-02-04 02:42:37 UTC
From: Pamela Alley
Topic: 15751 Message: 15751

Anyone else notice that CHP's site posts NOTHING of use lately? Was down the hill about half an hour ago or so and saw CHP head up Olive Hwy like a bat out of hell, code 3, with fire coming a couple minutes behind. Know it's more east than the intersection of Foothill and Olive, but don't know where or what.

Anybody know?

Thanks!

Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Probably the sender’s email account has been hacked and they didn’t send it intentionally. Never open strange links in emails particularly with no subject line. The sender didn’t send it themselves.

The message wasn't "allowed" on the group any more than houses and forests are "allowed" to catch fire... sometimes things happen. Shawn's (wldfire96) email account was apparently hacked by spamware or some other bug. He's posted dozens of useful posts in the ten years since he joined the NorCalFire group and his problem is being addressed.

Thanks,

Harry

This group has been lucky so far--my others have been getting quite a pounding from the latest round of hacking/spamming. :(Folks, if you have a yahoomail account, change your passwords regularly, keep it closed when browsing (I know, I know!), and run your antimalware religiously.

Luck and low fuel wishes for this fire season,

PA

15758. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-04-01 09:21:32 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15758

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15768. BUTTE: Palermo vegetation fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-06-03 21:06:08 UTC
From: Pamela Alley
Topic: 15768 Message: 15768

In the area of 626 Lone Tree Road, multiple reports.

At least three large fires; structure threat; requesting at least 15 additional engines, two dozers.

Windy day; this isn't going to be fun.

No requests for evacuation as yet; BCSO inquiring.
 many reports from concerned citizens

In addition, medical in vicinity of Hwy 70 and Cox Lane

Lone Tree x Ophir and Lone Tree x Palermo closures
Powerlines down

Butte Fire 151.400

From: Pamela Alley
Topic: 15772 Message: 15772

Sufficient personnel at this point per IC; SAR was paged out to assist evacuations and BCSO is rearranging officers to cover south county.

Lone Tree closed at Power House Hill Road now. (1510h)
Some people are accessing the area via Kusel, subverting the roadblocks... :(

Sorry folks, need to go AFK for a bit...

They're working on that; UP is aware of the issue and fire.

Wyman area also evacuated and/or advised for evac...

Progress report 1543h; now starting at Ophir and working south on Lincoln w/evacs.

UP requesting if they need to send out evaluator for track damage possibilities; also inquiring about vehicles near the tracks on the right of way.

IC states forward progress of fire slowing notably; pausng evacs for now.

1548h

Spot fires appearing between fire and 162; have CHP close 162, State Parks to help sort out residents, recreationers, not letting anyone else in but emergency services. Residents on Foreman Creek Road to shelter in place. BCSO limited on resources but sending a unit to help.

1805h

Command post at 162 x Foreman Creek Road
CHP unable to respond

3 spot fires beyond the head of the fire at this time.
State Parks sheltering some ppl in place in the recreation area.

All units at staging proceeding into incident.

1806h

Main fire appx 3 to 5 acres, 3 spots ahead of that, requesting additional copter and 2 addtl crews. Requesting BCSO code 3. Fire still west of 162.

1809h

15791. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-07-01 09:45:20 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15791

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15792. BUTTE: 70 x Palermo Rd Vegetation

15795. Fire Tone Out List

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-07-22 02:39:56 UTC
From: Kevin
Topic: 15795 Message: 15795

I am in the process of compiling a huge list of "Fire Tone-Outs". So far I havecompiled info for 17 Northern Calif counties (Over 1000 sets of tones). I willbe posting them gradually on this web site. If interested in the complete PDF file let me know. I will send them via email.

15796. Re: Fire Tone Out List

Yahoo group: norcalfire (2005 — 2016)

From: Keith
Topic: 15795 Message: 15796

Thanks Kevin;

I would be interested in Santa Cruz and Monterey counties.

If the complete file is a reasonable size, just post one file, we can cut out the areas we need.

Thanks!

Keith WE6R

From: Michael Edwards
Topic: 15795 Message: 15797

Kevin ... I would greatly appreciate the complete list when available. Also I'm wondering if you or some member on the list could help me. Yesterday, a friend drove up to Red Bluff for me to help program up a BCD696xl scanner. That was not difficult, but he wanted the frequency used by El Dorado Hill F.D. (Wilson Station) I believe. Looking on Radio Reference is this Department dispatched by Cal-Fire on 151.190? He believes they have their own dispatch center and freq.

Thank you and look forward to the list and thank you for your work ..

Mike
Red Bluff, Ca.

15805. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-08-01 08:57:10 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15805

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15807. SRF Veg Fire in Humboldt County

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-08-03 07:07:43 UTC
From: Harry Marnell
Topic: 15807 Message: 15807

"RANCH" Incident Friday Ridge Rd, off SR 299 near Willow Creek
http://goo.gl/maps/c0nPO

~2 acres slow rate of spread, HCSO/CHP had evacuated 4-5 homes that were threatened.

SRF Batt 31 is IC, with SRF E31, HIA, SLV & WCR VFDs, HRK2 all on scene or enroute.

Command is 168.725R, Tac is 168.2 (simplex)

Harry

15808. Re: SRF Veg Fire in Humboldt County

From: Harry Marnell
Topic: 15807 Message: 15808

IC reported having a wet-line around the fire at around 01:30, and was releasing a couple of the volunteer engines.

It appears now (Saturday noon) that High Rock Crew 2 is the only resource still at the scene.

I know of six tankers so far, anybody got more on this, please? Very local.

Two reports per CHP: Loma Rica x Hill and Swedes Flat x Oro Bangor; smoke check per scanner on Orange Ave x Avocado.

Fire on south side of swedes 5-10 acres, north side expansion problem, more resources requested for structures at hazard.

Requesting additional dozers for 4, strike team on top of 21, 65, 2170, 36, 2176, 2 crews addtl.

Sounds like this one isn't messing around. Thank God neither is CALFIRE!

Subject: [NorCalFire] BUTTE: Swedes IC (large)

I know of six tankers so far, anybody got more on this, please? Very local.

Two reports per CHP: Loma Rica x Hill and Swedes Flat x Oro Bangor; smoke check per scanner on Orange Ave x Avocado.

Fire on south side of swedes 5-10 acres, north side expansion problem, more resources requested for structures at hazard.

Requesting additional dozers for 4, strike team on top of 21, 65, 2170, 36, 2176, 2 crews addtl.

Sounds like this one isn't messing around. Thank God neither is CALFIRE!

Thank you O God of Fire Details :) :) **hug** If there was significant wind on it, we'd have a heckuva mess. Not too far up the road from a friend and only somewhat further from me, so....

Possible occupants trapped on 459 Chinese Wall Road, more up into the hills. 20+ people back there, structure burned down, CALFIRE says shelter in place as possible and they're working their way in ASAP.

Hard closure on Swedes Flat Road; quads and locals all over the place.

(UPDATE) 6:56 p.m.-We have confirmed with Cal Fire officials four structures have burned in the Swedes Fire near Bangor. There were earlier reports of a small number of citizens trapped on Chinese Wall Road. We have new information from Cal Fire confirming those individuals have been evacuated safely. Cal Fire News has just reported the fire has grown to 140 acres.

From: Pamela Alley
Topic: 15824 Message: 15824

Just went out to Mission Olive to take a look--man, it looks a LOT closer than it really is*! Torching evident on the north(?) end, to my left as I looked at the fire from the highest spot on Mission Olive anyway. Still moving right along but the smoke says a slight breeze but nothing more (thank God!) Plenty of looky-lous out tonight, and no few of 'em have been drinking--broke up a 'drink beer and watch the fire' party when I showed up. Saw folks going out with empty horse trailers and coming back with noisy and full ones.

*- That's probably because, when I came back and looked at the map, it really IS that close....

Scary stuff.

Thanks, Jake--I am well to the west of the fire so far.

Nope, afraid I don't...caught some being given for the breakout on the Panther incident, at Butte Meadows...Anybody know what's up there?

Listening on Broadcastify http://www.broadcastify.com/listen/ctid/186 might get you the chatter, but no guarantees.

Spent the afternoon helping a friend prep to evac--and it turned out they got a reverse 911 in error! AUGH! Oh well, better safe than sorry, by all means! So did a lot of plane watching as they made the loop. Fire largely headed for Bald Rock/Black Bart area, some reports of ash fall in Forbestown. Second friend not so fortunate, evacuated from Hurlton-Swedes Flat Road, don't know what happened to their place.

15843. BUTTE: Centerville IC Vegetation

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-09-01 01:05:01 UTC
From: Pamela Alley
Topic: 15843 Message: 15843

5-10 acres, full wildland response plus augmented response. Releasing type 1's, difficult access, staging where pavement and dirt meet on Centerville Road (area 14151 Centerville). Moderate ROS, tankers and Air Tac already on it. Jumped on this with everything they've got (YAY guys!) and we'll see how it goes.

Possible structure involved, unknown type.

Powerlines down in the Centerville fire area. Requesting PG/E.

(Hint for those listening...if you run both feeds and your home scanner, you're going to be hearing in triplicate...very confuzzling! :))

Mike, why is there such a heavy carrier(?) sound on some of those frequencies?

Topic: 12013 Message: 15848

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

20-30 acres off Summit Road x District Center, nearing Grubbs, access off 4 Junes Way. North wind on it, 6 tankers on this now, 3 copters, and they requested ten additional engines, any type, when I first started listening.

The CHP site says Grubbs x Tealbrook.

Winds are brisk to breezy from the NNE; 11-17 at the airport.

Tac is VFIRE 23.

Local wind report on Foothill Blvd says winds heavy. Smoke column quite dark, observer says looks like structure smoke to her (but there's a load of olive trees out there too, so who knows).

Addt'l resources coming in pretty regularly.

Anybody got anything more?

Further evacs along Reservoir, Grubbs, don't have precise limits on the area. If someone does, please let me know! This is cutting across the south end of Palermo and heading roughly SW. The area is relatively flat from Reservoir on south, and the wind is causing long-range spotting with rapid ROS at this time.

Air Tac requested early-up AT, 2 tankers and 3 copters for tomorrow already.

Evacuation staging at Grubbs / S. Villa / Reservoir Rd. Asking if SAR should be toned out for evac assistance along reservoir rd. Toning them out Code 2, mandatory evacs.

Need to go do critters, won't have much for about an hour. Someone else, pick it up please!

According to the Hotlist it is at 300 acres with 15% containment. Even the Hotlist it pretty quiet about it.

15857. Public perception: They didn't do anything!

Yahoo group: norcalfire (2005 — 2016)
Date: 2013-10-05 17:11:30 UTC
From: Pamela Alley
Topic: 15857 Message: 15857

Was just talking to someone in the middle of the Summit fire area, and their take on what they saw of the fire presence was absolutely abysmal. Said they saw fire *trucks*, but no action by firefighters; this person's husband went past trucks to help someone and was just watched by the FF's, with active fire nearby.

Of course, those not familiar with firefighting might misinterpret, but it would sure be nice to be able to explain what people are seeing. Apparently today they 'aren't even addressing hot spots, they're just watching'--how do I explain this to people who saw the men they expect to dive in and work to protect them and their homes, standing by while they burn?

(Note: El Medio engines and the Palermo engine were seen to be 'working their asses off' hitting the fire directly and received praise from the people who were complaining about lack of action otherwise.)

So help me out here--I'd like to defend what CalFire does, but it's really hard when confronted with opinions like this.

Just they'll them that firefighting is under a unified command and they cannot do anything without explicit orders from that command.

Public perception is a big issue with most government agencies. A majority of complaints come because people do not understand the how's and why's of emergency operations. They do not understand or consider accountability or safety and often have no idea of the bigger tactical picture. They look at someone squirting water and think that is always good and they see someone not squirting water and consider that as not-so-good.

If you were to ask ANY firefighter the answer would always be the same. They love to fight fire. Anytime. Anywhere. Sitting and watching is boring, monotonous and frustrating. There is a time and a place for everything however, and sometimes waiting is the better option when safety and overall tactics are considered. Some fire is better off left burning. Putting out ten miles of jagged fireline in the brush can be dangerous and not always effective. Waiting until that fireline reaches a manageable boarder like a road, a body of water or some other sort of fuel break is often much more efficient, safe, and requires a lot less resources to manage. This tactic lets the commanders assign those same resources to other areas of the fire where they may be needed more and where the work can be accomplished safely. There may be small "jackpots" of fuels that could be extinguished along that jagged line to help keep the fire in check as well as for structural fire protection where possible, but generally when firefighters are seen to be doing nothing, it is because they are waiting for the proper moment to do "something" intelligently and safely.

I was on the Summit fire. It was a wind driven fire that was moving quickly in heavy fuels. To jump out in front of it in many cases would have either been suicidal or a waste of time. As good as it looks to squirt water, extinguishing a few hundred (or thousand!) feet of line is useless if you cannot anchor your line where the advancing fire won't outflank you.

There is a place in Sacramento where we remember firefighters that either accidentally or intentionally could not stand by and "do nothing". It's known as the Fallen Firefighter's Memorial. CA FF Memorial <http://www.cafirefoundation.org/go/cff/about-ca-fire-foundation/california-firefighters-memorial/> It's a nice place to visit, but none of us want to live there.

Jim

They could be watching a purposely set back fire, they could be staging for

structure protection, they could be lining up to pull out and redeploy,
they could be waiting for IC to make a plan, they could be waiting for
pizza, they could be wondering why those stupid civilians are running
around putting out fire they just lit....

Thank you Jim. There are so many answers to this question, and you summed it up precisely into one perfect answer.

As an incident photographer, I'm well aware of the "snapshot" perception that the public gets by observing a small snapshot of a much larger picture, such as a firefighter standing there doing nothing for the 5 seconds you observed while driving by at 30mph. That 5 second window is what creates so much misconception of what firefighters actually do. Think of the perception the public has on Caltrans, there they only get a 1 second snapshot while driving (hopefully) at 55mph. "Just standing there" is what every Caltrans employee does.

And to set the record, no single resource on a fire has any list of residences that did or did not pay The Tax. Can you imagine every engine in the state having four 3ring binders of 800pages each listing the paid status of every land parcel in the state. Seriously?! The Tax doesn't pay a penny for any operations such as putting fire out etc. If you paid your regular state taxes each year, then you already paid your share for a year's worth of personal protection from every calfire engine, aircraft, and groundpounder, and the 300+ cal oes engines that supplement them when the smoke gets heavy.

They do not understand or consider accountability or safety and often have no idea of the bigger tactical picture. They look at someone squirting water and think that is always good and they see someone not squirting water and consider that as not-so-good.
>
> If you were to ask ANY firefighter the answer would always be the same. They love to fight fire. Anytime. Anywhere. Sitting and watching is boring, monotonous and frustrating. There is a time and a place for everything however, and sometimes waiting is the better option when safety and overall tactics are considered. Some fire is better off left burning. Putting out ten miles of jagged fireline in the brush can be dangerous and not always effective. Waiting until that fireline reaches a manageable boarder like a road, a body of water or some other sort of fuel break is often much more efficient, safe, and requires a lot less resources to manage. This tactic lets the commanders assign those same resources to other areas of the fire where they may be needed more and where the work can be accomplished safely. There may be small “jackpots” of fuels that could be extinguished along that jagged line to help keep the fire in check as well as for structural fire protection where possible, but generally when firefighters are seen to be doing nothing, it is because they are waiting for the proper moment to do “something” intelligently and safely.

>
> I was on the Summit fire. It was a wind driven fire that was moving quickly in heavy fuels. To jump out in front of it in many cases would have either been suicidal or a waste of time. As good as it looks to squirt water, extinguishing a few hundred (or thousand!) feet of line is useless if you cannot anchor your line where the advancing fire won't outflank you.

Jake and Jim and company:

Thank you so very much for such awesome answers! That's going to help a lot the next time I talk to this gal and have to listen to her vent about how CAL FIRE didn't do a darn thing. :) THIS time I will have some intelligent things for her to consider, and that helps people think, rather than rant.

MANY thanks from a lowly citizen who appreciates all CALFIRE does!

PA

If you paid your regular state taxes each year, then you already paid your share for a year's worth of personal protection from every calfire engine, aircraft, and groundpounder, and the 300+ cal oes engines that supplement them when the smoke gets heavy.

PS: And at that, Jake, it's cheap at the price. --PA

Thank you Jim Acker for taking the time to respond in a reasoned and thoughtful manner. There is no doubt that a fire, like any emergency situation, has the potential to provoke strong reactions on the part of those that are affected by the event. It is not at all uncommon for there to be bystander interpretations that are based on a mix of emotions (frustration, anger, confusion) rather than an understanding of tactics and strategy used to efficiently and effectively mitigate hazards associated with fire suppression. As it has already been said, the various scenarios that could have been playing out at the moment in question are many and varied. Conditions on the ground do not always allow for "going direct" on a fire, but this may not be easily understood by members of the public. The general perception of simply putting water on fire is the ultimate dumbing down of he very essence of firefighting and I say this with all due respect and with a clear understanding that I know only a fraction of what the seasoned firefighter knows

The notion of CAL FIRE personnel basing their actions on a list of those that may, or may not, have paid a tax isn't even worth addressing in this particular forum. It is absurd and insulting. Just my two pennies worth.

If you were to ask ANY firefighter the answer would always be the same. They love to fight fire. Anytime. Anywhere. Sitting and watching is boring, monotonous and frustrating. There is a time and a place for everything however, and sometimes waiting is the better option when safety and overall tactics are considered. Some fire is better off left burning. Putting out ten miles of jagged fireline in the brush can be dangerous and not always effective. Waiting until that fireline reaches a manageable boarder like a road, a body of water or some other sort of fuel break is often much more efficient, safe, and requires a lot less resources to manage. I was on the Summit fire. It was a wind driven fire that was moving quickly in heavy fuels. To jump out in front of it in many cases would have either been suicidal or a waste of time. As good as it looks to squirt water, extinguishing a few hundred (or thousand!) feet

of line is useless if you cannot anchor your line where the advancing fire won’t outflank you.

There is a place in Sacramento where we remember firefighters that either accidentally or intentionally could not stand by and “do nothing”. It’s known as the Fallen Firefighter’s Memorial. CA FF Memorial (http://www.cafirefoundation.org/go/cff/about-ca-fire-foundation/california-firefighters-memorial/) It’s a nice place to visit, but none of us want to live there.

changing topic slightly

Strictly as a side note, back east there have been a couple of news stories on houses burning to the ground and fire standing by--because a fire protection tax or fee was unpaid. :(

I am thankful that with the well-known morals and attitude of CAL FIRE, that's not a problem we will ever be likely to face!

back to the topic at hand

I can't tell you guys how much your input is helping here. I've spoken with people who had previously been baffled and upset, and the light bulb went 'click' and they went, "Oh! I never thought of it that way." and "Well that makes sense, then."

Thanks again, guys. :)

Everyone's given most of the good answers I could think of... :)

Additionally, just ask the crew - THEY know what they are doing!

How stupid one gets to feel if they answer "we just pulled up, saw this, called for and are waiting for a water tender and another crew so we can start to work..."

Of course if the question is too complicated or pressing they will defer to Public Information Office contact - and CalFire is real good about making "if you have any questions" contact info available.

I guess public mis-conceptions and ignorantly formed conclusions are better than getting out and trying to stomp out the fire themselves wearing fashion shoes and highly flammable fabrics... not much better though...

(reminds me of the recently running radio call-in show spoof with a lady complaining that 'they' should make deer cross the road in a safer place because she's hit deer 3 times... duh-oh... and these people get to vote...)

Grants Pass, Ore has private fire dept's in competion in same areas, whom collect a yearly fee from property owners.

If they show up and you haven't paid your fee they let your joint burn. There is no mutual aid to assist the other company's.

One company is family owned and the people that showed up are poorly trained if at all. There is a video on you tube someone shot in Grants Pass of these private company's responding to a working fire, what a circus, the fire continued out of control, lack of water, lack of turn out gear, people running amuck yelling. They lost the house. (see attached video)

I wonder if homeowner gets their money back. Wonder what the fire insurance premiums in the area are. This is not a poor area there are upscale homes there.

From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15881

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

I believe fire season is over in Butte and burning is allowed now? If so, there's your smoke. Or typically in fall and winter with inversions, chimney smoke can suffocate a neighborhood or area out.

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

I think lets move this to the ScanNorCal list instead of it getting
piece-mealed between 3 lists

Thanks, Kim. I'm not getting WX returns from stations down that way at
the moment, but here in Eureka at the coast wind is 5 MPH from the SSE,
37?, wind chill 33?

As the crow flies that probably 45 miles south, but twice that as the
roads go.

OK... Honeydew, maybe 10 miles away, wind is calm, 33? at midnight
http://www.wrh.noaa.gov/mesowest/getobext.php?wfo=eka&sid=HONC1&num=48
http://tinyurl.com/HoneyDew-WX

And so far, at 00:28 there's been no size up received yet. they may have
to find a farm and phone it in, really.

Harry

From: Harry Marnell
Topic: 15888 Message: 15892

01:00 update (if you can call it that)

Receiving *very* little radio traffic. Petrolia Base tried to call the Fortuna Command Center, who asked her to switch to Humboldt Local Tone 11, and either they didn't make contact, or THEY did but it was out of range to me.

E1268 just now reported he's behind the Rio Dell WT and not too far out from the scene, and will try to give a report on conditions as soon as possible.

Scanner Feed is tuned to the appropriate frequencies, but nothing is coming in (though I'm 40+ miles and a relatively high mountain range away).

Harry

15893. Re: "Light IC" - and now a SECOND fire out there

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-01-05 09:35:17 UTC
From: Harry Marnell
Topic: 15888 Message: 15893

At 01:15 Fortuna received by phone and broadcast these directions into the fire:

"Take Lighthouse Road toward the beach campground. If you get to the beach campground you've gone too far. There's a knoll above you and a road that veers to the left; go up that road approx 4.5 miles to the property owner's gate with a sign that says 'Keep out.' GO IN. Continue on that road til you reach a BLM cattle guard with another gate; there will be someone there to guide you..."

(I never gave anybody at LAPD or even Grass Valley directions like that)

At 01:26 Fortuna reported they had received cellphone contact with someone at the fire, reporting that this fire is 4-5 acres, no further details, but that there's another fire now visible over the ridge, unknown size. And then the other party's cellphone died.

E1268 has been in regular contact w/Fortuna and if *anyone* can/will give them a size-up it should be him.

Yep, I host the "Eureka and North" feed that I posted. There's a "Eureka & South" feed that *should* cover the fire region better (if that's possible considering the terrain). Hans' "South" feed is at http://www.broadcastify.com/listen/feed/7047 but I haven't given it a listen tonight.

Thanks for reminding me, I'll tune him in.

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-01-05 10:30:04 UTC
From: Harry Marnell
Topic: 15888 Message: 15896

At 01:42 E1268 notified Fortuna that he was assuming "Light IC," that the incident is about 4-5 acres and appears to be one single fire with several fingers

01:57 he gave lat/lon as 40?16.781' -124?20.611' with "fairly moderate" activity and some individual trees torched. Maps very close to previous one, http://tinyurl.com/Light-IC

I've heard about 4 or 5 CALFIRE engines report onscene in the last hour, but didn't note their numbers.

02:15 IC reports 3 acres, very slow ROS at this time, has died down significantly, most of ground cover burned off, numerous snags burning. Requests two hand crews continue (High Rock 1 & 3), cancel the other two (Eel River) and WT 7151; requests Prevention officer in the morning due to numerous fires in the past as well as "the recent activity in this area" (maybe referring to Thursday's arrest on Briceland Rd of the suspect from the Eureka priest's murder??)

My last report unless something happens to keep me awake.

Harry

15900. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-02-01 09:49:17 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15900

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

Rumor is the officer asked him to move the (fire) truck. He refused, since he was with the patient. Officer arrested him.

The CHP and FD met today, and everything has been 'resolved'. No charges filed against the FF, and the incident will be used 'for future training issues'.

This is a common issue in many departments that run incidents on highways and freeways. It's understood that lanes need to be opened however responder safety is much more important then lanes being opened! Many first responders have been injured and killed while working on freeway incidents. Shutting down a lane or two to protect responders is a must especially on busy and fast roadways.?

Just my 2 cents.

Chris

I think the CHP owes that FF an apology and they ought to hope he doesn't sue them.

I bet that when that officer is the one laying on his back on some freeway, he doesn't say "don't worry about me, just be sure you park that rig where the CHP officer thinks it ought to be..."

Amazing.

San Diego's channel 8 news has video of the orficer arresting
the FF. Newscasters made comment that he ordered all 3
engines to move. Two complied, effectively removing them
from the scene, or so said the newscasters, the 3rd FF refused
as he was the only one left treating a patient in a rollover vehicle.

FF was placed in the back of the CHP cruiser for about 30 minutes
and then released.

I had the link to the news video, but nuked it yesterday. Maybe
google can be your friend...

A few years ago, my local FD was dispatched to a MVA on I-5 (1 Battalion, 2 Engines, 1 Truck, 2 Medics). CHP got on-scene and cancelled the response as a non-injury accident. One of Engines was already committed to freeway, and had to pass the accident to return to quarters, so they stopped to check it out. In the end, for the MULTIPLE PIN-INs, they had 3 Engines, 2 Trucks, 5 medics, 1 AMR supervisor, and a rather upset Battalion Chief. I have also heard CHP cancel fire on accidents as non-injury, when fire is on scene, and no CHP units were. Give the impression the CHP doesn't play well with others.

Although the CHP air units, are some of the best I've heard, and do work well with fire. CHP H20 spotted a structure fire in a old farmhouse, came up on the FD channel, reported, and stayed on the radio to guide the units in, due to difficult access, being just one example. But then the air units work SAR, medivac, helping other law enforcement departments, in addition to CHP, so that may be why.

This is NOT the first, or the last time, that this kind of misunderstanding will occur. It’s absurd that the CHP makes these kinds of bad judgement calls. This is especially true in situations involving an EMS component and requiring “freeway safety support” through the use of fire apparatus. However, I don’t think your application of California statutes and/or laws is completely accurate in this case. I may be wrong, but from everyone I’ve talked to, or heard from, it is within the CHP’s authority to make these kinds of decisions. Detaining a FF is outrageous, but I think it came down to poor decision-making on the part of this officer. Clearly there needs to be better communication between fire and CHP. In other words, CHP’s SOPs need some serious updating.

"He said the CHP has jurisdiction over the interstates and it’s their judgment call. He admitted that the fire department did not have the officer's side of the altercation.”

However, I don't think your application of California statutes and/or laws is completely accurate in this case. I may be wrong, but from everyone I've talked to, or heard from, it is within the CHP's authority to make these kinds of decisions. Detaining a FF is outrageous, but I think it came down to poor decision-making on the part of this officer. Clearly there needs to be better communication between fire and CHP. In other words, CHP's SOPs need some serious updating.

"He said the CHP has jurisdiction over the interstates and it's their judgment call. He admitted that the fire department did not have the officer's side of the altercation."

I wasn’t suggesting that SOPs trump law in any way. However, SPOs should clearly be guided by law. I am familiar with the Health and Safety Code as it is currently written:

“...authority for the management of the scene of an emergency shall be vested in the appropriate public safety agency having primary investigative authority. The scene of an emergency shall be managed in a manner designed to minimize the risk of death or health impairment to the patient and to other persons who may be exposed to the risks as a result of the emergency condition, and priority shall be placed upon the interests of those persons exposed to the more serious and immediate risks to life and health. Public safety officials shall consult emergency medical services personnel or other authoritative health care professionals at the scene in the determination of relevant risks.”

Furthermore, I do not disagree with your outrage in this matter as was already suggested in my response. I stand corrected regardless of the way the statute is written and can be interpreted. Regardless of the “propaganda” I do hope that a mutually satisfactory resolution can be found between all involved.

Cheers!

15918. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-03-01 09:59:58 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15918

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

To:
norcalfire@yahoogroups.com

Just heard some traffic on PNF 170.550 WRT a possible fire at
grid coords: 120 43.4889 39 51.1773.

Puts it at around the Sloat area.

Just heard Dozer 1 canceled, so might not be too bad (yet)...

More to follow as I gather info.

PNF: 170.550
Plumas Fire 155.085

Todd KH2TJ

.....Since I hadn't seen any traffic hear in a while,
forgot which email address I used to monitor this
list.....

Appears most units are being released from scene. Guess they got a quick handle on it. I must have missed the initial call out. Glad to see I at least
got my email accounts sorted out ;-)

Iffen I recall correctly, you guys down in the valley should be able to hear PNF on their UHF links ?? Probably better than we can hear them on the VHF up here. PNF seems to have some bad radio locations....
I hear Tahoe 10X better...

>U.S. Forest Service Increases its Firefighting Aircraft Fleet as Fire Season Begins
>
>WASHINGTON, May 20, 2014 - In the face of what is shaping up to be a catastrophic fire season in the Southwest, the U.S. Forest Service is adding four additional aircraft to its next-generation firefighting fleet, bringing the total amount of aircraft to 21 large airtankers (with opportunities to add additional aircraft, if needed) and more than 100 helicopters. The new aircraft will enter service in the coming weeks and support over 10,000 firefighters for the 2014 wildfire season.
>"We continue to increase and modernize the fleet of aircraft available for wildland fire suppression activities," said Forest Service Chief Tom Tidwell. "These new planes will combine with our existing fleet to support to our heroes on the ground fighting wildfires to keep our resources and communities safe."
>The Forest Service is bringing into duty the first time this fire season a second DC10, and three BAe-146s. The DC10 cruises at 430 mph and can carry up to 11,600 gallons of retardant. Both the BAe-146 and a C130 originally brought on last fall cruise at roughly 350 mph and can carry more than 3,000 gallons of retardant. Eight C130s equipped with Modular Airborne Fire Fighting Systems (MAFFS) are also now completing their recertification and training for this season. The Forest Service will also bring additional large airtankers in from Canada if needed. Airtankers drop fire retardant that reduces the intensity and rate of spread of wildfires so that firefighters can construct firelines safely.
>Climate change, pests and disease, and suburban sprawl have combined to portend more severe wildfire seasons in recent years. Over the last three decades, fire season lengths have increased by 60-80 days and annual acreages burned have more than doubled to over 7 million acres annually. In addition, growing housing development in forests has put more people and houses in harms' way, also making firefighting efforts more expensive.
>Earlier this year, the Forest Service announced that it was projected to exceed its annual

firefighting budget in July, two months before the end of the fiscal year. In its 2015 budget proposal, the Obama Administration proposed a special disaster relief cap adjustment for use when costs of fighting fires exceed Forest Service and Department of the Interior budgets. The proposal tracks closely with legislation authored by Oregon Senator Ron Wyden, Senator Mike Crapo of Idaho, and Representatives Mike Simpson of Idaho and Kurt Schrader of Oregon.

15928. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-06-01 09:34:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15928

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

It's now 31 years and it's still going to be the worst fire season. It's going to burn. Squirt A lil water.... It shrinks and goes out. End of season except its year round and not seasonal anymore

The Hotlist and Twitter have supplanted Yahoo Groups as the social networks of choice by fire people for info and social interaction.

Kim and the group,

For those like me who are still on Yahoo and not on Hotlist or Twitter
here is some info on the Garden Fire Incident from this morning.

Cal Fire's Air Attack 230, Tanker 88, and Tanker 89 out of Grass Valley
worked the Garden Fire Incident near Yankee Jim's on Spring Garden Rd.
in Placer County. USFS Helicopter 514 out of White Cloud and
USFS Helicopter 516 out of Big Hill also worked the fire.

Communications used for this incident
122.925 Cal Fire Air to Air
123.975 Grass Valley Tanker Base
151.280 Cal Fire Air Tactics 4.

Bill Truscott
Rancho Cordova, CA.

The □#□MonticelloFire□ https://www.facebook.com/hashtag/monticellofire?source=feed_text&story_id=310762229098037 in Solano/NapaCounties is at 1000 Acres and as of 0830 it was 25% contained. I'm can hear the Air Operations going on. On 151.3125 Mhz. So Far I have heard Air Tanker 60,85,86, Air Attack 90 and Copter 901 (unconfirmed). They are giving Latitude 38 31 44 Longitude 121 58 55. for the area where the fire is and where to drop retardant. I'm getting some intermittent interference also

I have a personal friend who lives on Tehama Street in Oroville. She called a couple hours ago to say there was a fire behind her place that came onto her property and took out her new little barn full of hay for her goats. Also took out her small orchard. Her house is fine as are her goats, chickens and dogs. I asked what started it and she said they are investigating as it probably was firecrackers.

I was driving down Ophir Road at about 2:00 PM. A small column of smoke was apparent just East of Lincoln Blvd. As I arrived at the fire, a CHP officer was handcuffing a woman just across the road from the obvious location where the fire started, so the cause of the fire might have been arson. I was in my loaded water truck. I was held up for quite a bit at the traffic light, so by the time I got to the fire it had grown too large for me to reach with my side spray. I did spray the left and right edges of the fire but it spread very quickly. This might be the fire causing smoke in Oroville.

Odd, but yesterday I was at a hydrant on the corner of Olive Highway and Old Olive Highway. I could hear the crackling of a small fire just off of the road behind Casagrande Storage. It also grew very quickly, and as I approached I saw a man who appeared to be homeless leaving the area. It seems odd that anyone needs a fire for warmth. Cooking?

Wow. I went to the little store (neighborhood gossip point :)) and they told me Ophir and maybe Thermalito. Went down Ophir on my way to dinner and saw several hot spots, which I called in...they didn't have a total acreage, but according to the gal at Oroville FD, it was a nasty one to fight.

Bless these guys, (And John!) for getting on all the fires up here lately and getting them OUT as quickly as they have.

Scary times.

Thanks again both of you for the updates! :)
PA

ps and what did I see on the way home? Idiots out in a field doing fireworks! AUGH!

Monitoring Helo/Copter traffic on 132.575 Mhz. Multiple Airships in and outbound. 2 Copters have had Bucket malfunctions and had to return to base for repairs. To many tail numbers to mention but CAL FIRE #901 from McClellan is making runs. Sounds like they are taking water from Lake Berryessa to fight the fire.

A few of the copters are using Yolo Airport to refuel

WILDLIFE INCIDENT: Wildlife area west of Oroville, two tac nets (23?and 12). Staging at Larkin Road campground, water tender all-call.
Also working with BCSO helicopter, AirTac, 2 tankers. Anyone got more details?

PA 1850h

Per 411net.net's FB page:
50
acre vegetation fire reported in the Wildlife area near the Afterbay
Outlet camping area. There is no structure threat at this time. Several
engines and water tenders responding.

The fishermen are going to love this (not)...salmon season starts Wednesday and the best spots are all in or near the fire area.

Making progress, prioritizing holding the levy road. Head getting knocked down a bit, but ROS still moderate/rapid-at-times with heavy spotting. Aircraft dropping, making good progress.

Multiple reports of fire in the grass at Wheelock and 99 north of Oroville. Wheelock IC is on Tac 11.

2332h
Initial report at 2340 says spot 100'x100'.

Nothing further unless something happens.

Vegetation, just south of Forest Ranch on Hwy 32 on the top of the ridge. Some north wind on it, requesting additional crews and traffic control as well as PG/E on top of the already-called water tenders, aircraft, engines, and dozers. Crown IC on Tac 9 for those listening. Bald Mountain lookout also has it in sight.

Update 1610: Fire holding about 1 acre on top of the bluff; continuing resources.

15955. BTU: Web IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-07-28 20:41:34 UTC
From: mikelarish@...
Topic: 15955 Message: 15955

Timber fire near 130 G-Line off of Hwy 32. Web IC, Tacnet is Tac 9. Currently 5 acres, Air Attack expects at least 100 acres. Ordered 15 more Type 3 engines, 2 more fixed wing, 1 more helicopter, 2 more dozers, 3 more crews.

Updates to follow.

15956. Re: BTU: Web IC

Yahoo group: norcalfire (2005 — 2016)

From: mikelarish@...
Topic: 15955 Message: 15956

Update: Holding to 20 acres with tanker drops. IC worried about one area tankers can drop. If it gets into that drainage, it could run.

Most initial and first-update response resources have arrived.

Location on Hwy 32 approximately 8 miles north of Forest Ranch.

Near 39 degrees 58.729 minutes N by 121 degrees 38.668 minutes W. This will give you the general location but unsure of exact fire start.

Tacnet is still Tac 9
Command Net is now Butte Support (154.415 MHz)

15957. Re: [NorCalFire] Re: BTU: Web IC

From: Mike Larish
Topic: 15955 Message: 15957

Update:

100+ acres. Fire has jumped the line in a few areas and is making a run towards Hwy 32.

No structures threatened and nothing nearby. All timber and heavy brush and fuel, mostly SPI land. Federal land nearby.

Command Net: butte support (154.415)
Tacnet #1: tac 9 (151.385)
Tacnet #2: Tac 12 (151.460)
Air to Ground: CDF Air to Ground (151.220)
Air Tactics: air tactics 5 (151.295)

Tomorrow's request:

8 hand crews
15 type 3 engines
6 water tenders
Plus some dozers I didn't catch

15961. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-08-01 09:17:58 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15961

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

The article in the Sacramento Bee was similar but at that time they didn't know the type of aircraft involved.

Air Tanker Crash In Yosemite
10/07/2014 6:09 pm PST

Tracey Petersen, MML News Reporter
Foresta, CA – Yosemite National Park Officials confirm an air tanker has crashed while battling the Dog Rock fire. The 130-acre vegetation fire is on the western side of the Park in the Foresta area.
Park Spokesperson Ashley Mayer says, "We can confirm a plane has crashed, but we do not know any other details."
Cal Fire Spokesperson Daniel Berlant reports contact was lost with one of its air tankers flying over the fire. Emergency personnel are currently responding to the last known location of the aircraft. The status of the aircraft and the pilot has not been determined according to Berlant.
About 60 homes in the Foresta Park area have been evacuated. No structures have been affected or damaged by the flames at this time. Highway 140 is closed at the park entrance for all incoming and outgoing traffic. There is no estimate on when the road will reopen. The cause of the fire is under investigation.
Updated at 6:20pm: CAL Fire reports that it was an S-2T air tanker.

15971. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2014-11-01 11:35:17 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 15971

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

Topic: 12013 Message: 15977

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

Interesting. I heard this description of what seems like the same fellow
go out earlier today on the CHP channels up here in Plumas county.
Went out as a "SILVER Alert". First time I've heard that term. I'm sure
it's an established term, but 1st time hearing it...

Topic: 12013 Message: 15987

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

15988. BTU Dozer & Water Tender Notification

For the last several years, I've had a system that notifies me of by E-mail of certain types of fire related tone-outs for Butte County. My system records the audio of the dispatch and then uses Yahoo Groups to E-mail the notification and audio attachment to a group of people.

If you are interested in receiving any of the following automatically, let me know by sending E-mail to larishpage@gmail.com.

CalFire Water-Tender All-Call (tones out all the water tenders) for Butte County
CalFire Dozers 2140 and 2142 toneouts for Butte County
CalFire "Rescue All-Call" for Butte County

Mike

Topic: 12013 Message: 15996

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

10. Have fun, enjoy the hobby, stay safe!

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. It might be smoke drift from the ForestHill fire in Placer / El Dorado County. The winds switched last night from a upslope to a downslope breeze. Last heard it was at 350 acres.

Hey Bob, got anything on the Nelson fire beyond what Inciweb has? Hard to find anything!
Thanks!

PA

No fires in the Oroville/Thermalito area of which I'm aware; next time you are smelling smoke, do call in and ask for a smoke check in the area if you can't find the actual fire.

Hi Pam,

A couple of good resources during fire season.

YubaNet: http://yubanet.com/fire.php

Wildlandfire.com: http://hotlist.wildlandfire.com/forums/18-IA-California-amp-Hawaii

Nothing new for the fire in your area:
http://hotlist.wildlandfire.com/threads/52941-CA-PNF-Nelson?highlight=Nelson

Thanks, Brad, appreciate the suggestions :). Checked all of the below last night and couldn't find anything we didn't already have (I'm helping out with the FB page Butte County Public Safety Scanner). Glad to see it shows up on the hotlist now. :)

Seems odd to see stuff on this list again; maybe we can do this more often! :)

Hi Pam,

No problem. I'm currently in-between jobs, so I have more time to devote to my friends up in the mountains. I live in the Bay Area, so I've heard all the "Flatlander" jokes. I continue to keep a network of friends in the loop that live off the 80 and FRC corridors updated. I'm your out-of-town contact in case of emergency, and ready to assist when possible, in whatever way I can.

It's going to be a very long summer. Be safe, and ready to evacuate at a moment's notice.

Brad

Hi Pam,
No problem. I'm currently in-between jobs, so I have more time to devote to my friends up in the mountains. I live in the Bay Area, so I've heard all the "Flatlander" jokes. I continue to keep a network of friends in the loop that live off the 80 and FRC corridors updated. I'm your out-of-town contact in case of emergency, and ready to assist when possible, in whatever way I can.
It's going to be a very long summer. Be safe, and ready to evacuate at a moment's notice.
Brad

Thanks, Brad, appreciate the suggestions :). Checked all of the below last night and couldn't find anything we didn't already have (I'm helping out with the FB page Butte County Public Safety Scanner). Glad to see it shows up on the hotlist now. :)

Seems odd to see stuff on this list again; maybe we can do this more often! :)

Wow NorCalFire still lives? I was thinking of shutting this down since it is well past its prime in 2016 with the fire intel options now.

In the meantime while I look for the shutdown button, remember list etiquette of taking emails that are "direct" between two or few parties off list.

Thanks!
Jake

Maybe as a last message before you pull the plug, a list of those
options would be great.

Thanks,

/jordan

16035. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2016-07-01 11:07:36 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 16035

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://www.scancal.org/glossary.html

7. Sphere of Influence

If it isn't of direct importance to you or your family, don't ask back about details to a fire 200 miles away from you. Chances are the original poster posted all the info they had and will post again when new info is had. Don't ask about updates, or size etc. If it's significant, it will be updated as needed. Do not live vicariously through the list.

8. No Burn-overs, firefighter injuries, etc.
Lots of firefighter families follow their loved ones intently through this list and others. Let the proper notification process take place for any injuries etc. WE ARE NOT the proper notification process. The media IS NOT the proper notification process. The media sit and poach on this list also for their headline news. If you hear of something over your scanner, listen intently and pray. Do not share until the proper notification process has been followed. The proper notification process for us, the public, is a public information release by an official agency. Nothing.Else.But

9. Moderation
All new members are on moderation until shown they are real live breathing human beings interested in Northern California Fire Radio, and not selling us a magic pill or lottery winnings from Nigeria.

16036. Butte County Notifications

Yahoo group: norcalfire (2005 — 2016)
Date: 2016-07-01 20:37:22 UTC
From: mikelarish@...
Topic: 16036 Message: 16036

For those that live in Butte County, I have a system that I put together to monitor for specific tones and when those tones are heard, record 120 seconds of the dispatch audio and then Email that to a Yahoo Group (for each resource). I did this initially for myself since I can't listen to a scanner much during the day but figured I'd offer it to anyone interested. It's free.

I currently provide notifications via individual groups for:

Butte County Company 24 (Forest Ranch)
Butte County Company 33 (Magalia)
Dozer Transport pages (2140 & 2142)
Water Tender All-Call pages

You can pick any combination to receive.

In addition to the email with the dispatch recording snippet, I can also provide a text notification to smart phones if interested.

If you are interested in receiving any of these, please Email me off group (directly) at Larishpage@gmail.com

This will be the only post to this group about this...

16041. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2016-08-01 09:13:30 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 16041

How and what to post on NorCalFire.

The following rules address the most common complaints moderators run into on the list. Following these rules will help keep the sanity on a busy list of 700+ readers. Thank you!

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California. If it's off topic, you're moderated for good. Moderators have lives too and we hate to babysit.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a proper subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that typically please everyone include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

And if someone forgets to make a location easily known, use Google before complaining back to the list please.

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15 minutes about a fire, you're posting too much. Wait for a size-up of the fire or other significant situational update (such as freq announcements etc.) before posting.

No Strike Team deployments - it's more noise than valuable info to us.

Don't send "thank you's" (or if one gets through, don't send "you're welcomes" back) to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

If checking your email after a busy day on the list, please read all new messages before replying. You might be replying to a question that got answered ten times already. Also try to use one message to reply to all items for any particular topic.

6. Acronyms

Learn them. Do not complain about them. Too many people on the list use these acronyms in their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
